General information on the Fund

CoRe Series is a common fund (fonds commun de placement, “FCP”, hereinafter referred to as the “Fund”) with 36 separate Sub-Funds (individually a “Sub-Fund” and collectively the “Sub-Funds”). The Fund is established under Part I of the Luxembourg Law of December 17, 2010 as amended and is governed by the Management Regulations effective as of December 19, 2019.

The Fund is managed by Fineco Asset Management DAC (the “Management Company”), a company organized in the form of designated activity company under the Irish Companies Act 2014 and having its registered office in Dublin, Ireland.

The Fund is an “umbrella Fund” enabling investors to choose between one or more investment objectives by investing in the various Sub-Fund(s).

Information to the Unitholders

The accounts of the Fund shall be kept in euro and are closed each year on December 31.

Unaudited semi-annual accounts shall also be issued each year for the period closed on June 30.

Audited annual reports and unaudited semi-annual reports will be provided free of charge by the Management Company to the Unitholders at their request and in line with applicable law. In addition, such reports will be available at the registered offices of the Management Company/Distributor or its Agent(s) (if any) and the Depositary as well as at the offices of the information agents of the Fund in any country where the Fund is marketed.

A list of changes in the portfolio for the year ended December 31, 2024 is available free of charge at the registered office of the Management Company of the Fund.

Report of the Board of the Directors

CoRe Series - FAM Park

The FAM Park Fund achieved a net performance of +4.1% near the top of its peer group. This strong performance helped the fund outperformed outperform money market rates by ~17bps. Key contributors to this success included the Amundi Enhanced Ultra Short Term Fund and the Amundi Ultra Short Term Bond Fund, both of which significantly boosted the fund's overall performance.

CoRe Series - CoRe Coupon

CoRe Coupon returned 4% net of fees in 2024.

On a YTD basis, FED pivot and central cut rates have supported fixed income markets. The fund has delivered positive returns thanks to 4 building blocks: EUR AGG, EUR Corp, EUR HY and notably EM HC. The best performers have been Euro Bond FAM Fund, Euro Corporate Fixed Income FAM Fund, Euro High Yield Bond FAM Fund, and Vontobel Emerging Markets Debt FAM Fund. The unique detractor has been Fineco AM Euro Inflation Linked Government Bond Fund.

On a QTD, the key drivers of performance came from first of all of EM HC (+0.92%) building blocks benefiting from US Dollar surge over the quarter following less dovish stance from the FED and following Trump elections. Amundi Emerging Markets Bond FAM Fund has been the best performer thanks notably to exposure over Sovereign bonds in countries such as Argentina, Ukraine or Lebanon.

The second main contributor have been EUR Corp (+0.26%) benefitting from robust fundamentals over the asset class (attractive carry, low default rate, issuances with high bid to cover) which has led to spreads compression notably over financials. Euro Corporate Fixed Income FAM Fund has delivered the best absolute returns over the quarter thanks to AT1 exposure notably over Unicredit, Caixabank, Intesa and Credit Agricole.

The third main contributor has been EUR HY building block (+0.44%) with notably Euro High Yield Bond FAM Fund (+1.82% over the quarter) which has taken profit positioning over B range notably over retailers and refining.

As for our active bets, EUR linker have been slight negative with Fineco AM Euro Inflation Linked Government Bond Fund over the quarter where as on flexibles Invesco Global Total Return Bond FAM Fund has dropped by -2% hurt by lower exposure over HY side and higher duration on US Govies side following Trump's election.

CoRe Series - CoRe Income Opportunity

CoRe Income Opportunity returned +3.1% net of fees in 2024.

The key drivers of performance came from first of all of EUR AGG (+1.32%) building blocks benefiting from FED pivot and ECB policy rates cut From 3.75% to 3.25% over the third quarter. Thus, the fund which has the highest duration has overperformed (Fidelity Euro Bond FAM Fund: +4.71%), followed by Euro Bond FAM Fund +4.20% benefitting from his steepener position long 2yr rate short 30yr buxl.

The second main contributor have been EUR Corp (+0.96%) benefitting from robust fundamentals over the asset class (attractive carry, low default rate, issuances with high bid to cover) which has led to spreads compression notably over financials. Fineco AM MSCIEURIGSRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF has delivered the best absolute returns over the quarter.

The third main contributor has been EUR Corp Short Term building block (+0.21%) with notably Fineco AM MSCIEURIGSRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF (+2.15% over the quarter) which has taken profit positioning over financials (60% of overall portfolio) and subordinated banks.

The fourth main contributor has been EUR AGG Short Term building block (+0.19%) with notably Fidelity Euro Short Term Bond FAM Fund thanks to financials and covered bonds.

The fifth main contributor has been EUR HY building block (+0.13%) with notably Euro High Yield Bond FAM Fund (+3.37% over the quarter) which has taken profit positioning over B and CCC ranges notably over energy and industrials.

The sixth positive contributor has been Emerging HC unhedged shareclass (+0.06%) notably over Vontobel Emerging Markets Debt FAM Fund (+2.93%) and Emerging Markets Bond Hard Currency FAM Fund (+1.70%) which have benefitted

Report of the Board of the Directors (continued)

from their credit selection and allocation thanks to their overweight over HY sovereign and corporates.

As for our active bets, EUR linker have been slight positive with Fineco AM Euro Inflation Linked Government Bond Fund adding +2.63% over the quarter where as on flexibles Invesco Global Total Return Bond FAM Fund has benefitting from duration effect over US Treasuries during the summer. The three others US fixed income building block (US Corp, US Govies and US HY) have been pretty stable due to USD weakness during the quarter with EUR/USD which has risen from 1.0713 to 1.1135 offsetting yields decline effect.

CoRe Series - CoRe Emerging Markets Bond

CoRe Emerging Markets Bond returned 6.4% net of fees in 2024.

The fund currently has 70% allocated to hard currency bonds, the majority of which is hedged back to euros to reduce currency risk and volatility, and 30% to local currency bonds.

The primary contributor to positive performance has been the hard currency unhedged Vontobel EM Debt Fund, which outperformed its benchmark by 8.83% year-to-date driven by country allocation as well as bond selection.

Local currency strategies, including DPAM L Bonds Sustainable Emerging Markets and PIMCO GIS Emerging Local Bonds, delivered moderate returns but underperformed compared to the hard currency allocation.

CoRe Series - CoRe Global Currencies

CoRe Global Currencies returned 3.53% net of fees in 2024.

Main active bets were Gold overweight, as well as short-term liquidity in EUR-denominated papers, while as underweights GBP, SEK and JPY. Main positive contributors were Amundi Physical Gold ETC and Amundi Cash USD Capitalisation, while main detractors were HSBC Global Liquid Canadian Dollar and Goldman Sachs Yen Liquid Reserves.

CoRe Series - Global Macro Credit FAM Fund

January was a mixed month for fixed income, after the 2023 Q4 rally. The fund was able to outperform the market via a relatively low duration and alpha generation within the credit book. We cut duration, which further helped insulate the fund from the rates re-pricing. February was a strong month for credit markets followed by March which proved to be positive for risk assets. High yield spreads tightened almost 40bps, and cash markets outperformed, displaying strong investor appetite for bonds in both primary and secondary markets. Credit benefited as spreads tightened in the context of stable rates in March. We ran risk on the cautious side vs the past two-year range, keeping cash levels higher than our two-year average and held protection via US IG and HY spreads, European HY spreads and EM spreads. In April we saw a rapid pick-up in inflation fears. Stronger than expected US inflation data triggered a meaningful re-pricing in the US treasury, with the curve up broadly 40bps over the month, and just shy of October levels. Geopolitical tensions took a step back in May, as the ongoing Gaza conflict failed to extend to broader fronts. Noise on bottom-up credit stress attenuated. As a result, rates and equity volatility moved lower, and risk markets rallied. Credit continued its unique YTD divergence from government bonds, and US equities made new highs. June was an eventful month, marked by significant macroeconomic data and pivotal election headlines globally. Overall, uncertainties surrounding the European political landscape led to an increase in credit spreads but also pushed down base rates, which ultimately drove positive performance in the credit market across asset classes.

The fund maintained a high level of protection on risk assets, particularly equities, that helped shield performance in July. The number of cuts priced in global curves was now appropriate if not excessive, and fiscal risks persist, hence we maintained a moderate degree of duration. We reduced conviction on stronger yen and reduced exposure to EM FX. August started with a circuit breaker in global carry trades, triggered by the unwind of long risk positions funded in Japanese Yen, and fears about a US hard landing. In September, credit markets continued to grind despite an ample wall of worry from domestic politics to international conflict. While credit spreads closed the month broadly where they started, the continued easing stance from the ECB and the first cut from the Fed supported another positive month. We entered October with low duration and a light net exposure. We warned in September that duration rallies tend to exhaust post first Fed cut and 2024

Report of the Board of the Directors (continued)

made no exception. US elections jitters added to pressure on duration. Resilient US macro continued to be a challenge for global rates in November. In US, healthy labor markets and sticky service inflation meant a pause in cuts is in the cards. In Europe, the economy and inflation were softer, and the ECB step up the pace of cuts, but a sustained divergence of European rates translated into further Euro weakness, unwelcome by the central bank. As a result, we kept cautious on both curves. Global risk entered 2025 with tight valuations and long positioning across asset classes. Credit spreads were close to 2021 tightness and cash levels are low despite sustained inflows. A pickup in rates volatility or an equity market correction would hurt credit, particularly given the negatively asymmetric starting point. Tight valuations and high uncertainty usually meant trouble, and we suspect 2025 will make no exception. As per our current positioning, we are well placed if a risk correction in 1Q25 materializes and have space to add risk in our cash book in this instance.

The CoRe Series – Global Macro Credit FAM Fund 2024 YTD performance was 7.68%. The funds net credit exposure remained at 33%, net financial exposure (incl. cash short and single name CDS) at 22%, net corporate exposure (incl. cash short and single name CDS) at 32% and net EM exposure (incl. cash short and single name CDS) at 11% as of December 2024. The Fund duration was 2yrs (on the low side of our historical range), blended YTM was 5.3%.

CoRe Series - Bond 6M Fineco AM Fund

The US federal funds target rate, which had been raised into the 5.25%-5.50% range in July 2023 after the tightening cycle that started in March 2022 (+425bps), was kept at this level until September 2024. Expectations for US Federal Reserve (Fed) monetary policy were nonetheless very volatile during the year. In January, the Overnight Swap Index (OIS) market showed the equivalent of seven 25bps cuts in 2024 with a high probability of a first cut in March. Jerome Powell initially tempered these expectations and then, faced with the resilience of the US economy and with upside surprises on inflation in the first months of the year, he had to reassure investors that policy rates would fall in 2024. In the press conference following the meeting on 30/31 July, the Fed Chair highlighted that 'second quarter inflation data has added to confidence' that inflation is approaching 2%. In addition, the Federal Open Market Committee (FOMC) explained that it was now 'attentive to the risks facing both sides of its dual mandate' (that is, inflation but also employment). It took until 18 September for the Fed to announce a 50bps cut. Such a magnitude surprised and worried investors. In the minds of some, it could mean the FOMC was seeing signs of weakness in the labour market. From this perspective, Jerome Powell reassured them by stating that they should not expect 50bps cuts to be the new norm in this easing cycle. At the end of September, he said the economy remained solid and that the committee did not see any urgent need to cut rates quickly. After a 25bps cut in November, with comments suggesting a gradual approach to monetary policy, another cut was announced in December, taking the federal funds target rate into the 4.25%-4.50% range. The tone of the official communiqué, the FOMC forecasts and Fed Chair Powell's comments were far more hawkish than expected. The most striking adjustment in the projections was to the level of the key rate deemed 'appropriate': the median level now shows only two cuts of 25bps in 2025, whereas in September, it had concluded that four cuts would be necessary in 2025. This change can partly be explained by the upward revision of inflation forecasts. The core personal consumption expenditures (PCE) deflator (excluding food and energy), the Fed's preferred inflation measure, is expected to be 2.5% year-on-year at the end of 2025, i.e., still significantly above the 2% target. In October and November, it came in at 2.8% after having risen by 2.7%/2.6% from May to September. At the beginning of 2024, it exceeded 3%. Powell clarified that some FOMC members' forecasts have taken into account, to some extents, Donald Trump's a priori inflationary economic policy.

The European Central Bank (ECB) raised its three key rates by 25bps in September 2023 (deposit rate to 4.00%, marginal lending facility to 4.75% and main refinancing operations to 4.50%) for the last time in its tightening cycle that started in July 2022 (+425bps in total). In January and February 2024, official comments sought to push back the expectations that had appeared at the end of 2023 of a rapid rate cut, with the Board of Governors judging it 'premature to discuss it.' In March, however, the overall tone of the communiqué, the press conference and the latest set of inflation and growth forecasts confirmed that a first cut in key rates would be announced in June. On 6 September, the ECB cut its three key rates by 25bps, taking the deposit rate to 3.75%. After a status quo in July and despite some dissensions in the inflation analysis, investors were quickly convinced that a further rate cut would be announced in September, with risks to growth being identified as 'downside'. There were no surprises at the 12 September meeting. The main policy rate was cut by 25bps. In line with the announcements made in March, the ECB tightened (from 50bps to 15bps) the corridor between the refinancing rate (cut by 60bps to 3.65%) and the deposit rate to limit money market volatility. During the September press conference, ECB President Christine Lagarde adopted an optimistic tone on activity and excluded a cut in October before going back on her comments when inflation fell below 2% in September (from 4.30% a year earlier). The 17 October meeting

Report of the Board of the Directors (continued)

ended with a 25bps cut in the three key rates. Lagarde then hinted that the ECB intends to continue easing faster than the pace of a quarterly cut initially planned. In December, a further 25bps cut was announced, taking the deposit rate to 3.00%. The decision had been expected but the central bank's tone was not judged by observers to be dovish enough. Yet, the reference to the need to keep policy 'sufficiently restrictive' was dropped from the monetary policy decisions press release. In addition, Lagarde described on several occasions the disinflation process as being 'well on track', showing particular confidence in eurozone inflation forecasts and clarifying that a 50bps cut had been discussed. These comments, the downward revision of growth forecasts in 2025 and recent weak economic indicators have convinced investors that there will be numerous additional policy rate cuts. However, some members of the Governing Council (notably Isabel Schnabel and Olli Rehn) have tried to temper these expectations by indicating that the ECB is already close to its neutral rate.

The yield on the US 10-year T note (3.90% at the end of 2023) rose from the beginning of 2024. The ebb in expectations of Fed rate cuts and then price indices revealing stickier-than-expected inflation sent it back above 4.70% by the end of April, the highest since November. The adjustment in expectations on monetary policy (in futures markets but also in market economists' forecasts) was at the root of the rise in yields throughout the curve. In May and June, yields moved erratically as investors hesitated to adopt directional positioning. The inflation data published from mid-June finally reassured investors, while economic indicators showed that growth was slowing. The yield on the 10-year T-note then moved towards 4.20% and stabilised at around this level before plunging to 3.80% in early August in a flight to safety during the financial turmoil. The Fed's more-dovish-than-expected comments, paving the way for a first policy rate cut in September, allowed the fall in yields to accentuate, with the short end outperforming. The session on 11 September thus marked the end of the inversion of the yield curve on the 2-year/10-year segment, which had been seen since July 2022.

In mid-September the 10-year yield reached its year-low of 3.62% while the 2-year yield fell to 3.55% when the Fed first cut policy rates. Yields subsequently rose on the back of several factors: Economic indicators, which reflected the strength of US growth, adjustments in expectations about the Fed's monetary policy and the elections on 5 November. On the last point, the behaviour of government bonds gives the impression that investors had correctly anticipated the election result despite opinion polls that suggested it would be very tight. The speed of this movement (which had been accompanied by a rise in the term premium on the 10-year yield) and the publication of inflation data considered reassuring, allowed for a slight easing of yields in early December. However, the upward trend on yields quickly resumed and strengthened at the end of the year when it became clear that the Fed's monetary policy easing would be modest in 2025. The 10-year yield reached 4.63% on 27 December in weak trading volumes between Christmas and New Year's Day. It ended at 4.57%, a rise of 69bps compared to the end of 2023. The 2-year yield, 4.25% at end-2023, ended at 4.24%.

The 10-year Bund yield (2.02% at the end of 2023) rose in early 2024 as inflation surprised to the upside. At the same time, the assumption of a first cut in the ECB's key rates in June eventually prevailed. The sudden movements from June were rooted in the political situation in France and the behaviour of the OAT market after the unexpected announcement of a dissolution of the National Assembly and early legislative elections on 30 June and 7 July in France. In a flight to safety, the yield on the German Bund fell sharply to 2.36% in mid-June and the France-Germany 10-year yield spread widened to above 80bps (from around 50bps previously). In July, the movements remained influenced by politics. After the second round of French legislative elections, no party/coalition emerged with an absolute majority in the National Assembly. Despite the uncertainties this created, investors were reassured by the result, which had been a key focal point for them. Against this background, the yield of the 10-year OAT eased. This may have initially weighed on the German market, which had previously benefited from a flight to safety. Apart from this particular situation, expectations of ECB monetary policy easing, disappointing eurozone economic data and slowing inflation supported government bonds until the autumn, with the fall in yields accelerating when inflation fell below 2% in September.

Erratic movements on eurozone bond markets at the end of the year reflected, on the one hand, the behaviour of the US markets due to the high correlation on both sides of the Atlantic, and, on the other hand, the reality of economic conditions and ECB monetary policy. The yield on the German 10-year Bund moved between 2.05% and 2.45% to end at 2.37%, an annual rise of 34bps. At the same time, the German 2-year yield, supported by the cumulative 100bps cut in the ECB's key rates in 2024, fell by 32bps to end at 2.08%. The breakup of the German government coalition and the difficulties of adopting a budget in France given the balance of forces in the National Assembly may prompt economic agents to be somewhat cautious. While in December Moody's announced its sovereign rating downgrade of France to Aa3 with a stable outlook in the face of 'political fragmentation more likely to prevent significant fiscal consolidation,' the underperformance of the French 10-year OAT in 12 months (+64bps to 3.20%) is significant relative to the Bund. At the same time, the Portuguese (-28bps

Report of the Board of the Directors (continued)

to 2.85%), Spanish (-23bps to 3.06%), and Italian (-18bps to 3.52%) markets performed well. As a result, despite the difficulties of the French market, eurozone bonds as a whole rose by 1.8% in 2024 (compared to only 0.5% for the US Treasury market).

In 2024, the portfolio delivered a strong performance of + 4.49 % (gross of fees). This strong performance is mainly due to the positive contribution of the carry effect (+ 3.40 %) and the spread effect (+ 0.87 %).

We stuck to a relatively low exposure to both rates (modified duration: 0.24 year) and credit (Duration Times Spread- DTS: 0.46 year) in a very volatile context. The portfolio offers a very significant yield (3.30 % annualized) which represents in our view a very good investment opportunity for the year to come.

CoRe Series - Enhanced Bond 6M Fineco AM Fund

The US federal funds target rate, which had been raised into the 5.25%-5.50% range in July 2023 after the tightening cycle that started in March 2022 (+425bps), was kept at this level until September 2024. Expectations for US Federal Reserve (Fed) monetary policy were nonetheless very volatile during the year. In January, the Overnight Swap Index (OIS) market showed the equivalent of seven 25bps cuts in 2024 with a high probability of a first cut in March. Jerome Powell initially tempered these expectations and then, faced with the resilience of the US economy and with upside surprises on inflation in the first months of the year, he had to reassure investors that policy rates would fall in 2024. In the press conference following the meeting on 30/31 July, the Fed Chair highlighted that 'second quarter inflation data has added to confidence' that inflation is approaching 2%. In addition, the Federal Open Market Committee (FOMC) explained that it was now 'attentive to the risks facing both sides of its dual mandate' (that is, inflation but also employment). It took until 18 September for the Fed to announce a 50bps cut. Such a magnitude surprised and worried investors. In the minds of some, it could mean the FOMC was seeing signs of weakness in the labour market. From this perspective, Jerome Powell reassured them by stating that they should not expect 50bps cuts to be the new norm in this easing cycle. At the end of September, he said the economy remained solid and that the committee did not see any urgent need to cut rates quickly. After a 25bps cut in November, with comments suggesting a gradual approach to monetary policy, another cut was announced in December, taking the federal funds target rate into the 4.25%-4.50% range. The tone of the official communiqué, the FOMC forecasts and Fed Chair Powell's comments were far more hawkish than expected. The most striking adjustment in the projections was to the level of the key rate deemed 'appropriate': the median level now shows only two cuts of 25bps in 2025, whereas in September, it had concluded that four cuts would be necessary in 2025. This change can partly be explained by the upward revision of inflation forecasts. The core personal consumption expenditures (PCE) deflator (excluding food and energy), the Fed's preferred inflation measure, is expected to be 2.5% year-on-year at the end of 2025, i.e., still significantly above the 2% target. In October and November, it came in at 2.8% after having risen by 2.7%/2.6% from May to September. At the beginning of 2024, it exceeded 3%. Powell clarified that some FOMC members' forecasts have taken into account, to some extents, Donald Trump's a priori inflationary economic policy.

The European Central Bank (ECB) raised its three key rates by 25bps in September 2023 (deposit rate to 4.00%, marginal lending facility to 4.75% and main refinancing operations to 4.50%) for the last time in its tightening cycle that started in July 2022 (+425bps in total). In January and February 2024, official comments sought to push back the expectations that had appeared at the end of 2023 of a rapid rate cut, with the Board of Governors judging it 'premature to discuss it.' In March, however, the overall tone of the communiqué, the press conference and the latest set of inflation and growth forecasts confirmed that a first cut in key rates would be announced in June. On 6 September, the ECB cut its three key rates by 25bps, taking the deposit rate to 3.75%. After a status quo in July and despite some dissensions in the inflation analysis, investors were quickly convinced that a further rate cut would be announced in September, with risks to growth being identified as 'downside'. There were no surprises at the 12 September meeting. The main policy rate was cut by 25bps. In line with the announcements made in March, the ECB tightened (from 50bps to 15bps) the corridor between the refinancing rate (cut by 60bps to 3.65%) and the deposit rate to limit money market volatility. During the September press conference, ECB President Christine Lagarde adopted an optimistic tone on activity and excluded a cut in October before going back on her comments when inflation fell below 2% in September (from 4.30% a year earlier). The 17 October meeting ended with a 25bps cut in the three key rates. Lagarde then hinted that the ECB intends to continue easing faster than the pace of a quarterly cut initially planned. In December, a further 25bps cut was announced, taking the deposit rate to 3.00%. The decision had been expected but the central bank's tone was not judged by observers to be dovish enough. Yet, the

Report of the Board of the Directors (continued)

reference to the need to keep policy 'sufficiently restrictive' was dropped from the monetary policy decisions press release. In addition, the Lagarde described on several occasions the disinflation process as being 'well on track', showing particular confidence in eurozone inflation forecasts and clarifying that a 50bps cut had been discussed. These comments, the downward revision of growth forecasts in 2025 and recent weak economic indicators have convinced investors that there will be numerous additional policy rate cuts. However, some members of the Governing Council (notably Isabel Schnabel and Olli Rehn) have tried to temper these expectations by indicating that the ECB is already close to its neutral rate.

The yield on the US 10-year T note (3.90% at the end of 2023) rose from the beginning of 2024. The ebb in expectations of Fed rate cuts and then price indices revealing stickier-than-expected inflation sent it back above 4.70% by the end of April, the highest since November. The adjustment in expectations on monetary policy (in futures markets but also in market economists' forecasts) was at the root of the rise in yields throughout the curve. In May and June, yields moved erratically as investors hesitated to adopt directional positioning. The inflation data published from mid-June finally reassured investors, while economic indicators showed that growth was slowing. The yield on the 10-year T-note then moved towards 4.20% and stabilised at around this level before plunging to 3.80% in early August in a flight to safety during the financial turmoil. The Fed's more-dovish-than-expected comments, paving the way for a first policy rate cut in September, allowed the fall in yields to accentuate, with the short end outperforming. The session on 11 September thus marked the end of the inversion of the yield curve on the 2-year/10-year segment, which had been seen since July 2022.

In mid-September the 10-year yield reached its year-low of 3.62% while the 2-year yield fell to 3.55% when the Fed first cut policy rates. Yields subsequently rose on the back of several factors: Economic indicators, which reflected the strength of US growth, adjustments in expectations about the Fed's monetary policy and the elections on 5 November. On the last point, the behaviour of government bonds gives the impression that investors had correctly anticipated the election result despite opinion polls that suggested it would be very tight. The speed of this movement (which had been accompanied by a rise in the term premium on the 10-year yield) and the publication of inflation data considered reassuring, allowed for a slight easing of yields in early December. However, the upward trend on yields quickly resumed and strengthened at the end of the year when it became clear that the Fed's monetary policy easing would be modest in 2025. The 10-year yield reached 4.63% on 27 December in weak trading volumes between Christmas and New Year's Day. It ended at 4.57%, a rise of 69bps compared to the end of 2023. The 2-year yield, 4.25% at end-2023, ended at 4.24%.

The 10-year Bund yield (2.02% at the end of 2023) rose in early 2024 as inflation surprised to the upside. At the same time, the assumption of a first cut in the ECB's key rates in June eventually prevailed. The sudden movements from June were rooted in the political situation in France and the behaviour of the OAT market after the unexpected announcement of a dissolution of the National Assembly and early legislative elections on 30 June and 7 July in France. In a flight to safety, the yield on the German Bund fell sharply to 2.36% in mid-June and the France-Germany 10-year yield spread widened to above 80bps (from around 50bps previously). In July, the movements remained influenced by politics. After the second round of French legislative elections, no party/coalition emerged with an absolute majority in the National Assembly. Despite the uncertainties this created, investors were reassured by the result, which had been a key focal point for them. Against this background, the yield of the 10-year OAT eased. This may have initially weighed on the German market, which had previously benefited from a flight to safety. Apart from this particular situation, expectations of ECB monetary policy easing, disappointing eurozone economic data and slowing inflation supported government bonds until the autumn, with the fall in yields accelerating when inflation fell below 2% in September.

Erratic movements on eurozone bond markets at the end of the year reflected, on the one hand, the behaviour of the US markets due to the high correlation on both sides of the Atlantic, and, on the other hand, the reality of economic conditions and ECB monetary policy. The yield on the German 10-year Bund moved between 2.05% and 2.45% to end at 2.37%, an annual rise of 34bps. At the same time, the German 2-year yield, supported by the cumulative 100bps cut in the ECB's key rates in 2024, fell by 32bps to end at 2.08%. The breakup of the German government coalition and the difficulties of adopting a budget in France given the balance of forces in the National Assembly may prompt economic agents to be somewhat cautious. While in December Moody's announced its sovereign rating downgrade of France to Aa3 with a stable outlook in the face of 'political fragmentation more likely to prevent significant fiscal consolidation,' the underperformance of the French 10-year OAT in 12 months (+64bps to 3.20%) is significant relative to the Bund. At the same time, the Portuguese (-28bps to 2.85%), Spanish (-23bps to 3.06%), and Italian (-18bps to 3.52%) markets performed well. As a result, despite the difficulties of the French market, eurozone bonds as a whole rose by 1.8% in 2024 (compared to only 0.5% for the US Treasury market).

Report of the Board of the Directors (continued)

In 2024, the portfolio delivered a strong performance of + 5.15 % (gross of fees). This strong performance is mainly due to the positive contribution of the carry effect (+ 2.82 %) and the spread effect (+ 1.72 %). We stuck to a relatively low exposure to both rates (modified duration: 1.23 year) and credit (Duration Times Spread- DTS: 1.26 year) in a very volatile context. The portfolio offers a very significant yield (3.54 % annualized) which represents in our view a very good investment opportunity for the year to come.

CoRe Series - Sustainable Enhanced Bond 12M Fineco AM Fund

The US federal funds target rate, which had been raised into the 5.25%-5.50% range in July 2023 after the tightening cycle that started in March 2022 (+425bps), was kept at this level until September 2024. Expectations for US Federal Reserve (Fed) monetary policy were nonetheless very volatile during the year. In January, the Overnight Swap Index (OIS) market showed the equivalent of seven 25bps cuts in 2024 with a high probability of a first cut in March. Jerome Powell initially tempered these expectations and then, faced with the resilience of the US economy and with upside surprises on inflation in the first months of the year, he had to reassure investors that policy rates would fall in 2024. In the press conference following the meeting on 30/31 July, the Fed Chair highlighted that 'second quarter inflation data has added to confidence' that inflation is approaching 2%. In addition, the Federal Open Market Committee (FOMC) explained that it was now 'attentive to the risks facing both sides of its dual mandate' (that is, inflation but also employment). It took until 18 September for the Fed to announce a 50bps cut. Such a magnitude surprised and worried investors. In the minds of some, it could mean the FOMC was seeing signs of weakness in the labour market. From this perspective, Jerome Powell reassured them by stating that they should not expect 50bps cuts to be the new norm in this easing cycle. At the end of September, he said the economy remained solid and that the committee did not see any urgent need to cut rates quickly. After a 25bps cut in November, with comments suggesting a gradual approach to monetary policy, another cut was announced in December, taking the federal funds target rate into the 4.25%-4.50% range. The tone of the official communiqué, the FOMC forecasts and Fed Chair Powell's comments were far more hawkish than expected. The most striking adjustment in the projections was to the level of the key rate deemed 'appropriate': the median level now shows only two cuts of 25bps in 2025, whereas in September, it had concluded that four cuts would be necessary in 2025. This change can partly be explained by the upward revision of inflation forecasts. The core personal consumption expenditures (PCE) deflator (excluding food and energy), the Fed's preferred inflation measure, is expected to be 2.5% year-on-year at the end of 2025, i.e., still significantly above the 2% target. In October and November, it came in at 2.8% after having risen by 2.7%/2.6% from May to September. At the beginning of 2024, it exceeded 3%. Powell clarified that some FOMC members' forecasts have taken into account, to some extents, Donald Trump's a priori inflationary economic policy.

The European Central Bank (ECB) raised its three key rates by 25bps in September 2023 (deposit rate to 4.00%, marginal lending facility to 4.75% and main refinancing operations to 4.50%) for the last time in its tightening cycle that started in July 2022 (+425bps in total). In January and February 2024, official comments sought to push back the expectations that had appeared at the end of 2023 of a rapid rate cut, with the Board of Governors judging it 'premature to discuss it.' In March, however, the overall tone of the communiqué, the press conference and the latest set of inflation and growth forecasts confirmed that a first cut in key rates would be announced in June. On 6 September, the ECB cut its three key rates by 25bps, taking the deposit rate to 3.75%. After a status quo in July and despite some dissensions in the inflation analysis, investors were quickly convinced that a further rate cut would be announced in September, with risks to growth being identified as 'downside'. There were no surprises at the 12 September meeting. The main policy rate was cut by 25bps. In line with the announcements made in March, the ECB tightened (from 50bps to 15bps) the corridor between the refinancing rate (cut by 60bps to 3.65%) and the deposit rate to limit money market volatility. During the September press conference, ECB President Christine Lagarde adopted an optimistic tone on activity and excluded a cut in October before going back on her comments when inflation fell below 2% in September (from 4.30% a year earlier). The 17 October meeting ended with a 25bps cut in the three key rates. Lagarde then hinted that the ECB intends to continue easing faster than the pace of a quarterly cut initially planned. 1.11 years) in a very volatile context. The portfolio offers a very significant yield (3.31 % annualized) which represents in our view a very good investment opportunity for the year to come.

CoRe Series - CoRe Champions

CoRe Champions returned 8.3% net of fees in 2024.

Two third of positive performance came from of fixed income side with first EUR AGG (+0.99%) building blocks benefiting from FED pivot and ECB policy rates cut From 3.75% to 3.25% over the third quarter. Thus, the fund which has the highest duration has overperformed (Fidelity Euro Bond FAM Fund: +4.71%), followed by Euro Bond FAM Fund +4.20% benefitting from his steepener position long 2yr rate short 30yr buxl.

The second main contributor have been EUR Corp (+0.3%) benefitting from robust fundamentals over the asset class (attractive carry, low default rate, issuances with high bid to cover) which has led to spreads compression notably over financials. Fineco AM MSCIEURIGSRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF has delivered the best absolute returns over the quarter.

The others main contributors on fixed income side have been our active bets over EUR linker have been slight positive with Fineco AM Euro Inflation Linked Government Bond Fund adding +2.63% over the quarter where as on flexibles Invesco Global Total Return Bond FAM Fund (+4.23% over the quarter) and M&G Optimal Income FAM Fund have benefitted from duration effect over US Treasuries during the summer. The three others US fixed income building block (US Corp, US Govies and US HY) have been pretty stable due to USD weakness during the quarter with EUR/USD which has risen from 1.0713 to 1.1135 offsetting yields decline effect.

At last, on equity side, overall contribution has been positive (+0.78%), with small returns as for Equity North America building block (+0.07% over the quarter), European building block (+0.03% over the quarter) and similarly as for Equity Japan block (+0.04% over the quarter). Equity Developed building has been positive (+0.65% over the quarter) but has been hurt by Fidelity Focus Equity FAM Fund and Fineco AM MSCI World Semiconductors and Semiconductor Equipment 20% Capped UCITS ETF.

CoRe Series - CoRe Balanced Opportunity

CoRe Balanced Opportunity returned 4.8% net of fees in 2024.

The key drivers of performance came from of fixed income side with first EUR AGG (+1.39%) building blocks benefiting from FED pivot and ECB policy rates cut From 3.75% to 3.25% over the third quarter. Thus, the fund which has the highest duration has overperformed (Fidelity Euro Bond FAM Fund: +4.71%), followed by Euro Bond FAM Fund +4.20% benefitting from his steepener position long 2yr rate short 30yr buxl.

The second main contributor have been EUR Corp (+0.78%) benefitting from robust fundamentals over the asset class (attractive carry, low default rate, issuances with high bid to cover) which has led to spreads compression notably over financials. Fineco AM MSCIEURIGSRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF has delivered the best absolute returns over the quarter.

The others main contributors on fixed income side have been our active bets over EUR linker have been slight positive with Fineco AM Euro Inflation Linked Government Bond Fund adding +2.63% over the quarter where as on flexibles Invesco Global Total Return Bond FAM Fund (+4.23% over the quarter) and M&G Optimal Income FAM Fund have benefitted from duration effect over US Treasuries during the summer. The three others US fixed income building block (US Corp, US Govies and US HY) have been pretty stable due to USD weakness during the quarter with EUR/USD which has risen from 1.0713 to 1.1135 offsetting yields decline effect.

At last, on equity side, overall contribution has been slightly positive (+0.34%), with small returns as for Equity North America building block (+0.11% over the quarter) penalized by for North American STARS Equity FAM Fund (-1.12% over the quarter due to negative selection over Alphabet, Edward Lifesciences, and Applied Materials). Equity Developed building has been positive (+0.23% over the quarter) but has been hurt by Fineco AM Smart Factors World Fund and Fineco AM MSCI World Semiconductors and Semiconductor Equipment 20% Capped UCITS ETF.

Report of the Board of the Directors (continued)

CoRe Series - CoRe Champions Emerging Markets

The fund maintains an equal allocation between emerging market equities and a mix of local and hard currency bonds. Equities were the primary driver of positive performance, with standout contributions from the Invesco Emerging Markets Equity FAM Fund, the FAM MSCI EM Index, and the Vontobel mtX Sustainable Emerging Markets Fund. On the fixed-income side, the hard currency euro-hedged Vontobel EM Debt FAM Fund delivered strong positive returns for the year, while the local currency DPAM fund underperformed.

CoRe Series - CoRe Balanced Conservative

CoRe Balanced Conservative returned +3.6% net of fees in 2024.

The key drivers of performance came from the fixed income side with first EUR AGG (+1.62%) building blocks benefiting from FED pivot and ECB policy rates cut from 3.75% to 3.25% over the third quarter. Thus, the fund which has the highest duration has overperformed (Fidelity Euro Bond FAM Fund: +4.71%), followed by Euro Bond FAM Fund +4.20% benefitting from its steeper position long 2yr rate short 30yr bux1. The second main contributor has been EUR Corp (+0.97%) benefitting from robust fundamentals over the asset class (attractive carry, low default rate, issuances with high bid to cover) which has led to spreads compression notably over financials. Fineco AM MSCIEURIGSRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF has delivered the best absolute returns over the quarter.

The other main contributors on the fixed income side have been our active bets over EUR linker have been slightly positive with Fineco AM Euro Inflation Linked Government Bond Fund adding +2.63% over the quarter whereas on flexibles Invesco Global Total Return Bond FAM Fund (+4.23% over the quarter) and M&G Optimal Income FAM Fund have benefitted from duration effect over US Treasuries during the summer. The three others US fixed income building block (US Corp, US Govies and US HY) have been pretty stable due to USD weakness during the quarter with EUR/USD which has risen from 1.0713 to 1.1135 offsetting yields decline effect.

At last, on equity side, overall contribution has been slightly positive (+0.21%), with small returns as for Equity North America building block (+0.06% over the quarter) penalized by North American STARS Equity FAM Fund (-1.12% over the quarter due to negative selection over Alphabet, Edward Lifesciences, and Applied Materials). Equity Developed building has been positive (+0.15% over the quarter) but has been hurt by Fineco AM Smart Factors World Fund and Fineco AM MSCI World Semiconductors and Semiconductor Equipment 20% Capped UCITS ETF.

CoRe Series - CoRe Multi-Asset Income

The CoRe Multi Asset Income Fund returned +7.4% net of fees in 2024.

The fund has been positioned neutral in equities and overweight to HY, Emerging market Debt and Linkers. The fund is slightly overweight duration relative to comparator and has a higher yield.

Within Equities top contributions to performance have come from the funds Income and Value tilted holdings with The Fidelity Global Dividend FAM and Fineco AM Global Premium Equities funds aiding performance. The principal detractors here were the Fineco AM Global Equities income Fund and the Global Listed Infrastructure FAM fund.

In Fixed Income, the standout performers remain the funds Emerging Market Hard Currency (Euro hedged) allocations with the Vontobel EM Debt FAM fund the best performer here, benefitting from its High Yield exposures and positive selection in Ecuador, Columbia, Pakistan and Brazil. The funds US IG allocation and the Euro Bond FAM fund also contributed well while the main detractors to performance came from the fund Euro inflation linked allocation and the M&G Optimal Income FAM fund.

In the Flexibles building block, both the Flexible Income FAM fund and the Banor Club FAM fund detracted from performance with the Flexible Income Fam fund in particular losing ground during Q4 hurt by its positions in the US and UK long end.

CoRe Series - CoRe Aggressive

CoRe Aggressive returned 13.8% net of fees in 2024.

One third of positive performance came from the fixed income side with first EUR AGG (+0.51%) building blocks benefiting from FED pivot and ECB policy rates cut from 3.75% to 3.25% over the third quarter. Thus, the fund which has the highest

Report of the Board of the Directors (continued)

duration has overperformed (Fidelity Euro Bond FAM Fund: +4.71%), followed by Euro Bond FAM Fund +4.20% benefitting from his steepener position long 2yr rate short 30yr buxl.

The others fixed income contributors have been our active bets over EUR linker have been slight positive with Fineco AM Euro Inflation Linked Government Bond Fund adding +2.63% over the quarter where as on flexibles M&G Optimal Income FAM Fund has benefitted from duration effect over US Treasuries during the summer. US Govies have been pretty stable due to USD weakness during the quarter with EUR/USD which has risen from 1.0713 to 1.1135 offsetting yields decline effect.

As for equity flexibles, they have added +0.12% thanks to Nordea Stable Performance FAM Fund (+5.99% over the quarter) benefitting from exposure over US govies futures exposure and also IT US stocks like Microsoft and Alphabet.

At last, on equity side, overall contribution has been positive (+1.24%), with small returns as for Equity North America building block (+0.13% over the quarter), European building block (+0.05% over the quarter) and similarly as for Equity Asia ex Japan (+0.03% over the quarter) and Equity Japan block (+0.07% over the quarter). Equity Developed building has been positive (+0.97% over the quarter) but has been hurt by Fidelity Focus Equity FAM Fund and Fineco AM MSCI World Semiconductors and Semiconductor Equipment 20% Capped UCITS ETF.

CoRe Series - CoRe Target Allocation 25

CoRe Target Allocation 25 returned 5.99% net of fees in 2024.

The key drivers of performance came from of fixed income side with first EUR AGG (+1.58%) building blocks benefitting from FED pivot and ECB policy rates cut From 3.75% to 3.25% over the third quarter. Thus, the fund which has the highest duration has overperformed (Fidelity Euro Bond FAM Fund: +4.71%), followed by Euro Bond FAM Fund +4.20% benefitting from his steepener position long 2yr rate short 30yr buxl.

The second main contributor have been EUR Corp (+0.85%) benefitting from robust fundamentals over the asset class (attractive carry, low default rate, issuances with high bid to cover) which has led to spreads compression notably over financials. Fineco AM MSCIEURIGSRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF has delivered the best absolute returns over the quarter.

The others main contributors on fixed income side have been our active bets over EUR linker have been slight positive with Fineco AM Euro Inflation Linked Government Bond Fund adding +2.63% over the quarter. The three others US fixed income building block (US Corp, US Govies and US HY) have been pretty stable due to USD weakness during the quarter with EUR/USD which has risen from 1.0713 to 1.1135 offsetting yields decline effect.

At last, on equity side, overall contribution has been slightly positive (+0.43%), with small returns as for Equity North America building block (+0.07% over the quarter) penalized by for North American STARS Equity FAM Fund (-1.06% over the quarter due to negative selection over Alphabet, Edward Lifesciences, and Applied Materials). Equity Developed building has been positive (+0.35% over the quarter) but has been hurt by Fidelity Focus Equity FAM Fund and Fineco AM MSCI World Semiconductors and Semiconductor Equipment 20% Capped UCITS ETF.

CoRe Series - CoRe Target Allocation 25 (II)

ICoRe Target Allocation 25 (II) returned 6% net of fees in 2024.

The key drivers of performance came from of fixed income side with first EUR AGG (+1.58%) building blocks benefitting from FED pivot and ECB policy rates cut From 3.75% to 3.25% over the third quarter. Thus, the fund which has the highest duration has overperformed (Fidelity Euro Bond FAM Fund: +4.71%), followed by Euro Bond FAM Fund +4.20% benefitting from his steepener position long 2yr rate short 30yr buxl.

The second main contributor have been EUR Corp (+0.85%) benefitting from robust fundamentals over the asset class (attractive carry, low default rate, issuances with high bid to cover) which has led to spreads compression notably over financials. Fineco AM MSCIEURIGSRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF has delivered the best absolute returns over the quarter.

The others main contributors on fixed income side have been our active bets over EUR linker have been slight positive

Report of the Board of the Directors (continued)

with Fineco AM Euro Inflation Linked Government Bond Fund adding +2.63% over the quarter. The three others US fixed income building block (US Corp, US Govies and US HY) have been pretty stable due to USD weakness during the quarter with EUR/USD which has risen from 1.0713 to 1.1135 offsetting yields decline effect.

At last, on equity side, overall contribution has been slightly positive (+0.43%), with small returns as for Equity North America building block (+0.07% over the quarter) penalized by for North American STARS Equity FAM Fund (-1.06% over the quarter due to negative selection over Alphabet, Edward Lifesciences, and Applied Materials). Equity Developed building has been positive (+0.35% over the quarter) but has been hurt by Fidelity Focus Equity FAM Fund and Fineco AM MSCI World Semiconductors and Semiconductor Equipment 20% Capped UCITS ETF.

CoRe Series - CoRe Target Allocation 25 (III)

CoRe Target Allocation 25 (III) returned 5.81% net of fees in 2024.

The key drivers of performance came from of fixed income side with first EUR AGG (+1.58%) building blocks benefiting from FED pivot and ECB policy rates cut From 3.75% to 3.25% over the third quarter. Thus, the fund which has the highest duration has overperformed (Fidelity Euro Bond FAM Fund: +4.71%), followed by Euro Bond FAM Fund +4.20% benefitting from his steepener position long 2yr rate short 30yr buxl.

The second main contributor have been EUR Corp (+0.85%) benefitting from robust fundamentals over the asset class (attractive carry, low default rate, issuances with high bid to cover) which has led to spreads compression notably over financials. CoRe Series - CoRe Target Allocation 100

The CoRe Series – Target Allocation 100 fund returned 17.64% net of fees in 2024.

Sector wise the fund has been overweight defensives such as Health Care and Consumer Staples while being underweight Information Technology, Consumer Discretionary, and Communication Services.

All of the funds developed global equity allocations contributed positively in 2023. Top performances coming from the CoRe FAM MSCI World Index Fund, the Fidelity Global Dividend FAM fund and the Fineco AM Global Equity Fund.

The Fidelity Global Dividend FAM fund has benefitted from its quality growth style tilt and positive stock selection in Financials (Progressive Corp and Munich Re), Industrials (Relx and Schneider) and IT (TSMC). The Fineco AM Global

Report of the Board of the Directors (continued)

Equity Fund has benefited from its overweight to Energy and positive stock picking in IT (Microsoft), Financials (London SE) and Industrials (Kingspan).

The main detractors in 2023 have been the Fineco AM Global Premium Equities Fund hurt by stock selection in healthcare (Bayer, CVS Health) and Consumer goods (Estee Lauder) and the other detractor has been the Fineco AM Global Equities Income Fund which has underperformed the broader markets due to Income Style tilts .

CoRe Series - CoRe Target Allocation 100 (II)

The CoRe Series – Target Allocation 100 (II) fund returned 17.64% net of fees in 2024.

The fund is a globally diversified fund of funds strategy designed to provide long-term capital appreciation to investors. The fund is actively managed and remains positioned with a defensive tilt and a preference for CoRe allocations over growth or value.

On an absolute basis all of the funds developed global equity allocations contributed positively in 2024. Top performances coming from the CoRe FAM MSCI World Index Fund, the Fineco AM MSCI World IT ESG Leaders ETF and the Fineco AM Global Premium Equities Fund.

The main laggards on a YTD basis have been the Fineco AM Metals and Mining ETF and the Diversity and Inclusion FAM fund.

CoRe Series - CoRe Target Allocation 100 (III)

The CoRe Series – Target Allocation 100 (III) fund returned 17.57% net of fees in 2024.

The fund is a globally diversified fund of funds strategy designed to provide long-term capital appreciation to investors. The fund is actively managed and remains positioned with a defensive tilt and a preference for CoRe allocations over growth or value.

On an absolute basis all of the funds developed global equity allocations contributed positively in 2024. Top performances coming from the CoRe FAM MSCI World Index Fund, the Fineco AM MSCI World IT ESG Leaders ETF and the Fineco AM Global Premium Equities Fund.

The main laggards on a YTD basis have been the Fineco AM Metals and Mining ETF and the Diversity and Inclusion FAM fund.

CoRe Series - CoRe Target Allocation 100 (IV)

The CoRe Series – Target Allocation 100 (IV) fund returned 17.62% net of fees in 2024.

The fund is a globally diversified fund of funds strategy designed to provide long-term capital appreciation to investors. The fund is actively managed and remains positioned with a defensive tilt and a preference for CoRe allocations over growth or value.

On an absolute basis all of the funds developed global equity allocations contributed positively in 2024. Top performances coming from the CoRe FAM MSCI World Index Fund, the Fineco AM MSCI World IT ESG Leaders ETF and the Fineco AM Global Premium Equities Fund.

The main laggards on a YTD basis have been the Fineco AM Metals and Mining ETF and the Diversity and Inclusion FAM fund.

CoRe Series - Invesco Pan European High Income FAM Fund

In 2024, the US equity markets experienced a dynamic year marked by significant milestones and fluctuations. The year began with a strong rally in the first quarter, highlighted by the S&P 500 Index closing above the 5,000 milestone for the first time in February. This surge was underpinned by the US economy's resilience, which defied recession predictions by achieving a 2.5% growth rate in 2023, with a robust fourth-quarter GDP growth of 3.4%. The labor market remained strong,

Report of the Board of the Directors (continued)

with continued payroll gains and historically low unemployment rates below 4%. However, persistent inflation led to higher-than-expected increases in the Consumer Price Index (CPI) in January and February, prompting the Federal Reserve to delay proposed interest rate cuts to the second half of the year. Despite overall inflation being below its peak, consumer spending showed signs of caution, likely due to "cost fatigue," as evidenced by declining retail sales. Investors were generally pleased with corporate earnings growth, although three of the "Magnificent Seven" stocks—Apple, Alphabet, and Tesla—suffered due to disappointing earnings and weak forward guidance.

In the second quarter, equity market performance diverged. Stocks related to Artificial Intelligence (AI) continued to rally, driving several equity indexes to all-time highs, while other market segments declined. High inflation in April raised concerns that the Federal Reserve might maintain higher interest rates for longer. However, stocks rallied in May and June as inflation showed signs of cooling, with the 12-month CPI falling to 3.3%. First-quarter GDP growth came in below expectations, suggesting a slowing economy, and nonfarm payrolls moderated with the unemployment rate steady at 4.0%. Corporate earnings were generally positive, with most S&P 500 constituents beating expectations, though earnings growth was concentrated among the "Magnificent Seven" stocks. The Federal Reserve's June meeting resulted in no change to the federal funds rate, with only one rate cut anticipated in 2024 due to persistent inflation.

The third quarter saw US equity markets post gains despite a sharp decline in early August, as inflation cooled, and the Federal Reserve began its long-awaited monetary easing cycle. Inflation reached its lowest level since 2021, with the 12-month CPI for August at 2.5%. The economy remained resilient, with second-quarter GDP growth at 3.0%, well above the first quarter's 1.4%. However, a weaker-than-expected payroll report in August and unchanged employment data in September led the Fed to cut the federal funds rate by 0.5% in September. With greater certainty about interest rates, investors rotated out of AI and technology stocks into small-cap and value stocks that could benefit from lower interest rates. In the fourth quarter, despite declines in October and December, US equity markets finished with gains, buoyed by a strong post-election rally in November. The economy remained resilient, with strong consumer spending and low unemployment. Over 200,000 new jobs were created in November, and the unemployment rate remained historically low at 4.2%. The final estimate for third-quarter GDP growth was 3.1%, higher than the second quarter. The 12-month headline CPI fell below 3% for the first time since February 2021, though a slight uptick in November suggested entrenched inflation. Sticky inflation data and uncertainty about Trump administration policy led the Fed to reduce its forecast for 2025 interest rate cuts, dampening investor sentiment. Rising geopolitical tensions and high US debt levels also pressured stocks, and equities finished December without the typical "Santa Claus" rally. Fixed income markets suffered as yields rose, particularly on longer-maturity bonds.

CoRe Series - MFS Prudent Capital FAM Fund

For the twelve months ended December 31, 2024, the Core Series - MFS Prudent Capital FAM Fund (portfolio) provided a total return of 9.91% (EUR). This compares with a return of 26.60% (EUR) for the portfolio's benchmark, the MSCI World Index (net div).

Moderating inflation pressures allowed many global central banks to ease monetary policy during the period. However, the pace of disinflation slowed toward the end of the period, particularly in the United States. Geopolitical strains remained high amid ongoing conflicts in Ukraine and in the Middle East, while relations between China and the US remained tense. At the end of the period, China unveiled a sizable stimulus package aimed at shoring up its property sector and the finances of highly indebted local governments. Toward the end of the period, labor markets loosened modestly, particularly in the US, brightening the inflation outlook as economic growth remained solid. Global equity markets reached record levels during the period as they withstood the adversity of the unsettled geopolitical climate and a higher interest rate environment amid optimism over the wide-scale adoption of artificial intelligence and continued healthy earnings growth. Global bond yields climbed to close out the calendar year on the back of the US election result, resilient economic growth and concerns that global disinflationary progress may have stalled. Reflecting increased inflation uncertainty, market expectations for future Federal Reserve interest rate cuts in 2025 have been paired back while already compressed credit spreads tightened further. Global bond market volatility, as measured by the MOVE index, declined in the fourth quarter after peaking before the US election. On aggregate, position weightings (i.e., security selection) and sector allocation decisions relative to the MSCI World Index detracted from relative performance.

Security selection and an underweight position in both the information technology and financials sectors held back relative performance. Stock selection in the communication services and consumer staples sectors also weighed on relative results.

Report of the Board of the Directors (continued)

The portfolio's defensive asset allocation and its exposure to US Treasuries, cash & cash equivalents and corporate debt, as well as the allocation to index options, further dampened relative results. Individual holdings: Not owning shares of NVIDIA, holdings of Samsung Electronics and an overweight position in Edenred.

An underweight position and stock selection within the materials sector supported relative results. An underweight position in the health care sector, and not owning any securities within the energy sector also supported relative returns. The portfolio's position in currency forwards also contributed to relative performance. Individual holdings: Being overweight Booking, Euronext and Zalando."

CoRe Series - CoRe Dividend

The CoRe Dividend fund returned +14.3% net of fees in 2024.

The fund is a diversified global equity fund of funds strategy with the objective to provide capital appreciation to investors over the long term. The fund performed in line over the first half of the year but lost ground during Q3 as a sharp market rotation saw Value outperform and further in Q4 as the fund's income allocations suffered negative selection.

Top contributions to performance on the year have come from The Fidelity Global Dividend FAM and the quality focused Fidelity Focus FAM Equity fund. The Fidelity European Equity FAM fund also contributed positively.

The main detractors to performance came from the Fineco AM Global Equities Income Fund, the Global Listed Infrastructure FAM fund and the Amundi European Equity Value FAM fund.

CoRe Series - CoRe Emerging Markets Equity

CoRe Emerging Markets Equity returned 11.5% net of fees in 2024.

The portfolio allocation includes approximately 33% in region-specific funds, with 25% in Asian markets, 3% in Emerging Europe, 1% in Latin America, 2% in China, and 2% in India. The remaining 66% is invested in global emerging market strategies.

The primary driver of positive performance has been the Invesco Emerging Markets Equity FAM Fund, which outperformed the MSCI Emerging Markets Net Total Return Index by 2.12% year-to-date.

The Schroder ISF Emerging Europe Fund also delivered significant outperformance relative to its benchmark, contributing positively to the portfolio.

Underperformance came primarily from the Amundi MSCI EM Latin America ETF, along with the Federated Hermes Global EM SMID Equity Fund and JP Morgan Emerging Markets Equity Fund, both of which have since been removed from the portfolio.

Regionally, the fund remains significantly underweight in Emerging Asia and Africa & the Middle East, while maintaining overweight positions in Latin America, Emerging Europe, and Developed Asia.

CoRe Series - CoRe US Strategy

CoRe US Strategy returned 24% net of fees in 2024.

The portfolio has been moved toward a more neutral stance at the beginning of the year, to let fund selection being the main driver of returns.

Most active managers in the portfolio underperformed their comparators, with Brown US Sustainable Growth fund and Amundi US Equity Fundamental Growth underperforming the most on a relative basis.

Healthcare, communication services and technology were the three top overweighted sectors in Q3, while industrials, real estate and consumer discretionary the most underweighted. These active bets mainly stem from underlying managers' positioning and are well within +/-2% range.

From a style perspective, the portfolio remains in line with the benchmark in terms of valuation multiples (e.g., P/E, P/B and P/S) and quality ratios (e.g., ROE and D/E).

Top contributors have been passive investments like the Smart Factors US FAM and S&P 500 Index FAM. Growth strategies

Report of the Board of the Directors (continued)

like Brown Advisory US Sustainable Growth and the SPDR S&P US Technology Select UCITS ETF lagged behind, despite contributing positively.

CoRe Series - CoRe All Europe

CoRe All Europe returned 1.4% net of fees in 2024.

The portfolio manager was only able to start moving the portfolio toward a more neutral allocation after the middle of February. All underlying active managers in Western Europe underperformed their comparators, with Amundi European Equity Value FAM and European Equity FAM underperforming the most. The Schroder Emerging Europe fund was the only active manager reporting a positive relative return. Over Q4, the portfolio remained overweighted in defensive sectors like staples, communication services and health care, while underweighting utilities, materials and industrials. Such active bets mainly stemmed from underlying managers' positioning and are well within $-/+2\%$ range. From a style perspective, the portfolio remains in line with the benchmark in terms of valuation multiples (e.g., P/E, P/B and P/S) and quality ratios (e.g., ROE and D/E).

Top contributors have been large cap blend active strategies like European Stars Equity FAM, as well as passive vehicles like Stoxx Europe 600 Index FAM. On the contrary, sector ETFs in the European energy and consumer space via the SPDR MSCI Europe Energy ETF and the iShares MSCI Europe Consumer Discretionary ETF were the main detractors (these products were held in the portfolio for managing active bets, rather than for expressing sector views).

CoRe Series - FAM Sustainable

The CoRe Series – FAM Sustainable fund returned 17.4% net of fees in 2024.

Relative to the broader market the fund remains positioned with an overweight to Industrials, Utilities and Financial Services while the fund has been underweight Communication Services, Consumer Discretionary and Energy. This positioning relative to the broader market is largely driven by the Thematic building block which focuses on best in class Sustainability focused funds.

Top contributors to performance were the Smart Factors US FAM Fund, Smart factors World FAM fund and the Fineco AM MarketVector Japan Quality Tilt ETF.

Within the Thematic building block the main detractor from performance during 2024 was the Global Paris Aligned FAM fund which suffered due to its underweight to technology and negative selection in the technology and Health Care Sectors. The Global Listed Infrastructure FAM Fund also detracted from performance with negative selection in Utilities and Real Estate while the Diversity and Inclusion FAM fund was hurt by poor stockpicking in technology, consumer discretionary, financials and healthcare. This fund has lagged the broader market due to its significant overweight to the Utilities and Real Estate sectors and zero weights in Information Technology and Consumer Discretionary sectors. During 2024 we have reduced our allocation to both fund and increase the regional and global building blocks.

CoRe Series - CoRe Global Opportunity

CoRe Global Opportunity returned +3.53% net of fees in 2024.

Equities and US bonds contributed the most to final results, while inflation-linked and long duration strategies dragged the most.

Within the fixed income block we kept duration in line with the Bloomberg Global Aggregate index, while from an asset allocation standpoint, we have maintained equities around 15%, in line with the Morningstar category.

Main positive contributors were Global Stars Equity FAM and Fineco AM US Dollar Bond, while worst detractors were Fineco AM Bloomberg Euro Government Inflation-Linked Bond Index FAM and Fineco AM Bloomberg Euro Treasury 10+ Y Index.

CoRe Series - CoRe Alternative

CoRe Alternative returned +2.3% net of fees in 2024.

In 2024, the fund's performance exceeded that of the HFRX Global Hedge Fund Index EUR by 1.4% on a gross basis. In Q2, the portfolio has been reshuffled to reflect a broader spectrum of alternative strategies, and new funds have been added to the portfolio. Newly added strategies include convertible arbitrage, event driven, merger arbitrage and long/short

Report of the Board of the Directors (continued)

credit. Among alternative strategies, multi-strategy and equity hedge strategies have outperformed, while global macro and CTA have underperformed.

Main contributors have been multi-strategy funds like MAN AHL TargetRisk and long/short equity ones like Eleva Absolute Return Europe. Aspect Diversified Trends (a CTA program) and Nordea Alpha 15 MA were worst detractors.

Luxembourg, April 23, 2025

Grand Duchy of Luxembourg

REPORT OF THE *REVISEUR D'ENTREPRISES AGREE*

Opinion

We have audited the financial statements of CoRe Series (the "Fund") and of each of its sub-funds, which comprise the statement of net assets and the statement of investments and other net assets as at December 31, 2024 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at December 31, 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier* (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the *réviseur d'entreprises agréé* for the Audit of the Financial Statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund's Management company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *réviseur d'entreprises agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund's Management Company for the Financial Statements

The Board of Directors of the Fund's Management Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund's Management company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund's Management Company is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund's Management Company either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “réviseur d'entreprises agréé” for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *réviseur d'entreprises agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund's Management Company.
- Conclude on the appropriateness of the Board of Directors of the Fund's Management Company use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *réviseur d'entreprises agréé* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *réviseur d'entreprises agréé*. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

For Deloitte Audit, *Cabinet de révision agréé*

Yann Mérillou, *Réviseur d'entreprises agréé*

Partner

Notes to the financial statements

1 - General

CoRe Series is organised as a Fonds Commun de Placement (FCP) with several Sub-Funds. The Fund is established under Part I of the Luxembourg amended Law of December 17, 2010 and is governed by the Management Regulations effective as of December 19, 2019.

The Fund is managed by the management company. Invesco Asset Management Limited has been appointed as Investment Manager for the Sub-Fund the Sub-Fund CoRe Series - Invesco Pan European High Income FAM Fund, Algebris (UK) Limited for the Sub-Fund the Sub-Fund CoRe Series - Global Macro Credit FAM Fund, MFS Investment Management Company (Lux) S.à.r.l for the Sub-Fund CoRe Series - MFS Prudent Capital FAM Fund and BNP Paribas Asset Management France for the Sub-Funds CoRe Series - Bond 6M Fineco AM Fund, Sub-Fund CoRe Series - Enhanced Bond 6M Fineco AM Fund and Sub-Fund CoRe Series -Sustainable Enhanced Bond 12M Fineco AM Fund.

The management company received its UCITS management company authorisation on 17 May 2018 and Alternative Investment Fund Manager authorisation on 2 September 2024. The management company is regulated by the Central Bank of Ireland. The principal activity is providing collective portfolio management services to UCITS schemes and an Alternative Investment Fund Manager that can provide the MiFID services of individual portfolio management and investment advice.

The assets of the different Sub-Funds are separately invested in accordance with their respective investment policies and objectives. All Sub-Funds are denominated in Euro (the "Base Currency").

As at December 31, 2024, 36 Sub-Funds were active as detailed below:

2 - Significant accounting policies

2.1 Presentation of financial statements

These financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment in transferable securities and generally accepted accounting principles in Luxembourg. The financial statements reflect the Net Asset Values ("NAV") as calculated on December 31, 2024 based on latest available market prices of the investments.

2.2 Valuation of assets

The value of Transferable Securities, Money Market Instruments and any financial liquid assets and instruments which are quoted or dealt in on a stock exchange or on a Regulated Market or any Other Regulated Market is based on their last available price at the time of valuation of the assets on the relevant stock exchange or market which is normally the main market for such assets.

In the event that any assets held in a Sub-Fund's portfolio on the relevant day are not quoted or dealt in on any stock exchange or on any Regulated Market, or on any Other Regulated Market or if, with respect of assets quoted or dealt in on any stock exchange or dealt in on any such markets, the last available price (as determined pursuant to the previous paragraph) is not representative of the fair market value of the relevant assets, the value of such assets is based on a reasonably foreseeable sales price determined prudently and in good faith by the Board of Directors of the Management Company.

Units or shares of open-ended UCIs and UCITS are valued at their last determined and available Net Asset Value or, if such price is not representative of the fair market value of such assets, then the price is determined prudently and in good faith by the Board of Directors of the Management Company. Units or shares of a closed-ended UCI are valued at their last available market value.

The value of any cash on hand or on deposit bills and demand notes and accounts receivable, prepaid expenses, cash dividends, interest declared or accrued and not yet received, are deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof.

2.3 Net realised gains or losses resulting from investments

The realised gains or losses resulting from the sales of investments are calculated on an average cost basis.

2.4 Foreign currency conversion

Assets and liabilities expressed in currencies other than the Base Currency of the relevant Sub-Fund are converted at

Notes to the financial statements (continued)

exchange rates prevailing as at December 31, 2024. Transactions in foreign currencies are converted into the Base Currency of the relevant Sub-Fund at exchange rates prevailing on the transaction dates.

The exchange rates used as at December 31, 2024 are as follows:

1 EUR =	1.67245	AUD	1 EUR =	6.39720	BRL
1 EUR =	1.48925	CAD	1 EUR =	0.93845	CHF
1 EUR =	7.60215	CNH	1 EUR =	25.17500	CZK
1 EUR =	7.45725	DKK	1 EUR =	0.82680	GBP
1 EUR =	16 666.37300	IDR	1 EUR =	162.73920	JPY
1 EUR =	21.53090	MXN	1 EUR =	11.76050	NOK
1 EUR =	1.84830	NZD	1 EUR =	11.44150	SEK
1 EUR =	36.61580	TRY	1 EUR =	1.03550	USD
1 EUR =	19.53990	ZAR			

2.5 Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the Statement of Net Assets date for the remaining period until maturity. Unrealised appreciation or depreciation resulting from outstanding forward foreign exchange contracts, if any, are recorded in the Statement of Net Assets.

Net change in unrealised profits and losses and net realised gains and losses are recorded in the Statement of Operations and Changes in Net Assets.

2.6 Swaps contracts

Swaps contracts are posted off-balance sheet and valued on the basis of the recalculated market prices by using the traditional elements of pricing considering the value, the volatility of the underlying, the interest rates and the residual value of the swap. Swaps are disclosed in the Statement of Net Assets under caption "swaps at market value".

Effective interest expense/income on swaps is booked in full in the "Statement of Operations and Changes in Net Assets". Accrued expense/income on swaps are netted on each Net Asset Valuation calculation date for each swap contract and the resulting net balance is posted per swap, either as interest expense on swap or interest income on swap, in the "Statement of Operations and Changes in Net Assets".

2.7 Financial Futures contracts

Futures contracts are disclosed in the Statement of Net Assets under the item "Unrealised appreciation on financial futures contracts" and "Unrealised depreciation on financial futures contracts".

Financial futures contracts are valued at the quoted price available on an official stock exchange.

Net realised and net change in unrealised gain/(loss) on financial futures contracts are recorded in the "Statement of Operations and Changes in Net Assets". When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction.

2.8 Options

The liquidating value of option contracts traded on a stock exchange or on another Regulated Market is based upon the last available settlement prices of these contracts on stock exchange and/or Regulated Markets which the particular options contracts are traded by the Fund; provided that if an option contract could not be liquidated on the day with respect to which assets are being determined, the basis for determining the liquidating value of such contract is such value as the Board of Directors of the Management Company may deem fair and reasonable. The liquidating value of options contracts not traded on exchanges or on Other Regulated Markets and/or Regulated Markets shall mean their net liquidating value determined, pursuant to the policies established in good faith by the Board of Directors of the Management Company, on a basis consistently applied for each different variety of contracts.

Net realised and net change in unrealised gain/(loss) on options contracts are recorded in the "Statement of Operations

Notes to the financial statements (continued)

and Changes in Net Assets".

2.9 Repurchase agreements

Repurchase agreements (Repos) are equivalent to borrowings guaranteed by underlying assets presented in the securities portfolio of the Sub-Fund which remains exposed to market risk. Reverse Repurchase agreements (Reverse Repos) are similar to guaranteed loans. In this case, the Sub-Fund is not subject to the risk of depreciation in the value of the underlying assets. Repos and Reverse Repos are regarded as borrowings and loans, respectively, of the sum of liquid assets received and/or paid.

2.10 Contracts for difference (CFD)

At each valuation date, the difference in price between the opening price and the current market price of the underlying security or index to the CFD is recorded as the market value (unrealised gain or loss) of the contract; when the Sub-Fund enters a closing transaction, the difference between the opening notional amount and the closing notional amount of the underlying security is recorded as a realised gain or loss under captions Net realised profit/(loss) on swaps and CFD in Statement of Operations and Changes in Net Assets. Initial margin deposits may be made in cash upon entering in CFD. Subsequent payments, referred to as variation margins, are made or received by the Sub-Fund periodically and are based on changes in the market value of open CFD contracts.

2.11 Income

Dividends are credited to income on the ("ex-dividend") date. Interest income is accrued on a daily basis.

2.12 Combined financial statements

The figures of each Sub-Fund are presented in their respective Base Currency. The combined financial statements are expressed in Euros and the sum of the Sub-Funds' net assets which are in another currency are converted in Euros at the exchange rates prevailing at year end.

2.13 Securities lending

In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender. The borrower must provide a guarantee, in the form of collateral, that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

3 - Management, Investment Management and Distribution Fees

The management fee is a percentage of the Net Asset Value of each Sub-Fund, which ranges, according to the prospectus, from 0.15% to max 3.00% p.a, depending on the relevant unit class and is calculated and accrued on each Valuation Day on the basis of the Net Asset Value of the unit class and is payable monthly in arrears.

The Management fees rates applicable at December 31, 2024, are as follows :

Sub-Funds	Class of units	Management fees p.a.

CoRe Series - CoRe Alternative	1.58%

4 - Fixed Operating Expenses

Each Sub-Fund (or, wherever relevant, the Fund as a whole) bears all ordinary costs and expenses incurred in its operation and administration at a fixed rate. The Fixed Operating Expenses ensure that the relevant Sub-Fund is protected from expenses fluctuations which would not be the case had the Sub-Fund chosen to pay directly such charges.

The Fixed Operating Expenses are calculated, in respect of each class and for each calendar year, as a percentage of the average of the net asset value of the Sub-Fund attributable to the relevant Sub-Fund calculated in prorata temporis for the relevant calendar year.

The maximum level of Fixed Operating Expenses as at December 31, 2024 are disclosed below:

Sub-Funds	Fixed Operating Expenses
CoRe Series - FAM Park	0.07%
CoRe Series - CoRe Coupon	0.09%

CoRe Series - CoRe Target Allocation 100 (III)	0.15%
CoRe Series - CoRe Target Allocation 100 (IV)	0.08%
CoRe Series - Invesco Pan European High Income FAM Fund	0.25%
CoRe Series - MFS Prudent Capital FAM Fund	0.15%
CoRe Series - CoRe Dividend	0.21%
CoRe Series - CoRe Emerging Markets Equity	0.23%
CoRe Series - CoRe US Strategy	0.19%
CoRe Series - CoRe All Europe	0.23%
CoRe Series - FAM Sustainable	0.25%
CoRe Series - CoRe Global Opportunity	0.23%
CoRe Series - CoRe Alternative	0.12%

The Fixed Operating Expenses include, the following fees and expenses:

- Depositary and Paying Agent, Administrator, Registrar and Transfer Agent Fees;
- Auditor's fees and expenses;

Notes to the financial statements (continued)

- Directors' fees and expenses;
- Marketing fees and expenses;
- Legal expenses that may be incurred by the Management Company, the Depositary, and the Administrator while acting in the interest of the Unitholders;
- Investment services taken and/or data obtained by any Sub-Fund;
- Taxes, charges and duties payable to the local government and local authorities (including the Luxembourg subscription tax (*taxe d'abonnement*) and any VAT or similar tax associated with any fees and expenses paid by the Fund (excluding any tax included in the "Transaction Costs").

5 - Depositary and Paying Agent, Administrator, Registrar and Transfer Agent Fees

The Depositary and Paying Agent and the Administrator are entitled to receive a fee out of the assets of the relevant Sub-Fund (or the relevant class of units, if applicable), which will range, depending on the country where the assets of the relevant Sub-Fund are held, from 0.003% to 0.5% of the asset values underlying the relevant Sub-Fund or class of units, payable quarterly in arrears.

For the Registrar and Transfer Agent, the main components of the compensation for the services provided are the number of the existing active unit classes, the number of clients' accounts and the number of transactions processed.

As disclosed in Note 4, the Depositary, Paying Agent, Administrator, Registrar and Transfer Agent as applicable, are included in the Fixed Operating Expenses.

6 - Taxation

In accordance with the legislation currently prevailing in Luxembourg, the Fund is not subject to any taxes on income or capital gains. The Fund is subject to a subscription tax "*Taxe d'abonnement*", which amounts to an annual rate of 0.05% based on the Net Asset Value of each Sub-Fund at the end of each calendar quarter, calculated and paid quarterly. However, this tax is reduced to 0.01% for Net Asset Value related to units classes only aimed at eligible institutional investors and for Sub-Funds whose sole object is collective investment in money market instruments and in deposits with credit institutions. Pursuant to Article 175 (a) of the amended Law of December 17, 2010, the net asset invested in UCIs already subject to "*Taxe d'abonnement*" is exempted from this tax.

As disclosed in Note 4, "*Taxe d'abonnement*" is included in the Fixed Operating Expenses.

Notes to the financial statements (continued)

7 - Futures contracts

As at December 31, 2024, the Fund holds the following open future contracts:

CoRe Series - FAM Park

Currency contract	Details	Maturity	Number of contracts bought	Number of contracts sold	Commitment EUR	Unrealised appreciation/depreciation EUR
EUR	EURO SCHATZ	Mar-25	-	499	49 824 651	237 025
					49 824 651	237 025

Notes to the financial statements (continued)

11 - Dividend Distribution

All distributions will, in principle, be paid out of the net income available for distribution. The Management Company may, in compliance with the principle of equal treatment of Unitholders, decide that for some classes of units, distributions will be paid out of the gross assets and not only of net realised income available for distribution or net realised capital gain.

During the year ended December 31, 2024, the following dividends have been distributed:

CoRe Series - CoRe Coupon

13 - Change in portfolios

A list of changes in the portfolio for the year ended December 31, 2024 is available free of charge at the registered office of the Management Company of the Fund.

14 - Transaction costs

The transaction costs include broker fees and fees charged by the depositary for securities and derivatives transactions. The broker fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption "transaction costs" in Statement of Operations and Changes in Net Assets.

15 - Other Income

Amounts of other income in the Statement of Operations and Changes in Net Assets mainly include revenues from rebate fees.

16 - Other expenses

Amounts of other expenses in the Statement of Operations and Changes in Net Assets mainly include rebate fees.

17 - Related party transactions

Transactions were carried out during the year on other Funds, managed by the Investment Managers, as detailed in Organization and Administration part of this report. Transactions were on normal market conditions, conducted at arm's length and are in line with the Fund's prospectus.

Unaudited Information

1 - Securities Financing Transactions Regulation (EU Regulation no. 2015/2365)

Following the Regulation 2015/2365 of the European Parliament and of the Council of November 25, 2015 on transparency of securities financing transactions and of reuse, only transactions on securities lending were subject to this Regulation, during the year ending December 31, 2024:

Total Return Swaps

	CoRe Series - Global Macro Credit FAM Fund

Total	See Note 12
Safekeeping of collateral received by the Sub-Fund as part of Total Return Swaps	
Name of custodian	SOCIETE GENERALE
Securities	-
Cash	See Note 12

All transactions are bilateral transactions.

For each counterparty and each sub-fund, collateral positions are followed-up globally for all OTC instrument types.

Cash collateral is managed as a whole; the investment management process does not specifically isolate cash received as collateral from other cash.

Returns and costs incurred from performance swaps transactions during the year ended December 31,2024 are included in the valuation of the swaps.

Unaudited Information

2 - Remuneration

UCITS V Remuneration Disclosure

Fineco Asset Management Designated Activity Company (the “Management Company”), the Management Company of CoRe Series acts as the Management Company for two other umbrella UCITS.

The Management Company follows a remuneration policy which complies with the requirements of the UCITS regulation in Ireland and in particular the S.I. 143/2016.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of the talent, skills and competencies, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system. Variable remuneration awards consider the performance of the employee, her/his business unit and the Management Company as a whole, and it is based on both financial and non-financial criteria, among other criteria.

The total remuneration paid by the Management Company to its staff for the financial year end 31 December 2024 is as follows:

	Fixed	Variable	Total
Employees	9,077,800	2,044,175	11,121,975
Executive Directors	1,053,967	1,268,549	2,322,516
Non-Executive Directors	97,500	-	97,500

The Fund represents as at 31 December 2023 around 17% of the Total AUM of the Management Company.

The remuneration policy is reviewed at least annually.

3 - Risk disclosures

Global Exposure

In accordance with current Fineco policy, global exposure is measured using the “Commitment Approach” or the Value at Risk (“VaR”) approach which considers the full constituents of the portfolio.

The Commitment Approach is a methodology that aggregates the underlying market or notional values of financial derivative instruments to determine the degree of global exposure of a Fund to financial derivative instruments.

Pursuant to the 2010 Law, the global exposure for a Fund under the Commitment Approach must not exceed 100% of that Fund's Net Asset Value.

Below is the list of sub-funds that follow the Commitment Approach:

Sub-Fund	Risk approach
CoRe Series - Bond 6M Fineco AM Fund	Commitment
CoRe Series - Enhanced Bond 6M Fineco AM Fund	Commitment
CoRe Series - Sustainable Enhanced Bond 12M Fineco AM Fund	Commitment
CoRe Series - MFS Prudent Capital FAM Fund	Commitment

VaR is a statistical risk measure that estimates the potential loss from adverse market movements in an ordinary market environment.

Unaudited Information (continued)

The VaR calculations are based on an adjusted historical simulation model with a confidence level of 99%, a holding period of one day and a historical observation period of not less than one year (250 days). A VaR number is defined at a specified probability and a specified time horizon. A 99% one day VaR means that the expectation is that 99% of the time over a one day period the Fund will lose no more than this number in percentage terms. Therefore, higher VaR numbers indicate higher risk.

The table below details the highest, lowest and average utilisation of the VaR limit, expressed as a percentage of the respective absolute VaR regulatory limit.

Sub-Fund	Risk approach	Risk Basis	Highest utilisation of the VaR limit %	Lowest utilisation of the VaR limit %	Average utilisation of the VaR limit %
CoRe Series - FAM Park	Var	Absolute	3,3%	0,9%	2,0%

CoRe Series - CoRe Alternative	Var	Absolute	30,5%	6,5%	23,5%

Leverage

The use of derivatives may expose sub-funds to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can therefore increase Funds volatility.

The leverage is calculated on a gross exposure basis, by taking the sum of the notional values of the derivatives used by the sub-funds, without netting, and is expressed as a percentage of the net asset value.

Unaudited Information (continued)

Disclosed in the table below is the level of leverage employed during the year (All funds not listed have 0%):

Sub-Fund	Average Leverage
CoRe Series - FAM Park	7.43%
CoRe Series - Core Coupon	28.77%
CoRe Series - Core Income Opportunity	19.31%
CoRe Series - Global Macro Credit FAM Fund	114.31%
CoRe Series - Core Champions	38.09%
CoRe Series - Core Balanced Opportunity	30.34%
CoRe Series - Core Balanced Conservative	30.63%
CoRe Series - Core Multi-Asset Income	39.13%
CoRe Series - Core Agressive	36.46%
CoRe Series - Invesco Pan European High Income FAM Fund	36.89%
CoRe Series - Core Global Opportunity	21.46%

4 - Sustainable Finance Disclosure Regulation

Environmental, social and governance (“ESG”) Integration describes the mechanism by which the Manager, acting through the Investment Manager as its delegate, when applicable, may integrate sustainability risks into investment decision-making, which may, where relevant, require the Investment Manager to assess the potential sustainability risks associated with the purchase of investments.

Sustainability Risk means an ESG event or condition that, if it occurs, could potentially or actually cause a material negative impact on the value of a Sub-Fund’s investment. Sustainability risks can either represent a risk of their own or have an impact on other risks which they may contribute significantly to such as market risks, operational risks, liquidity risks or counterparty risks.

The Fund reserves the right to reassess the classification of its Sub-Funds under Regulation (EU) 2019/2088 (“SFDR”) at any time and shall keep this classification under review in case of issuing of new or amendments made to the the applicable Regulatory Technical Standards (“RTS”) to SFDR or any other relevant pieces of legislation or regulation or regulatory guidance impacting such a classification. . RTS are standards for implementation of the provisions set forth in SFDR issued by the European Supervisory Authorities (“ESAs”) to market operators.

If the Fund determines at any future point that a Sub-Fund does not meet the criteria to qualify as an Art. 8 or Art. 9 SFDR fund, the relevant disclosure pertaining to such a Sub-Fund shall be updated or withdrawn as appropriate, in accordance with the revised classification of the Sub-Fund.

The following Sub-Funds are classified as Article 6 funds under SFDR:

The investments underlying the above-named Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities. The classification of the abovenamed Sub-Funds as Article 6 SFDR funds means that the Sub-Funds do not promote environmental or social characteristics in a way that meet the specific criteria contained in Article 8 of SFDR or have Sustainable Investment as its objective in a way that meet the specific criteria contained in Article 9 of SFDR.

When assessing the Sustainability Risks associated with the Fund's underlying investments, the Manager (or the Investment Manager, as the case) is attempting to understand the likelihood of the risk that the value of such underlying investments could be materially negatively impacted by an environmental, social or governance event or condition. While the Manager (or the Investment Manager, as the case) integrates Sustainability Risk into the Sub-Fund's investment decision making process, the output of such Sustainability Risk integration is not the determining factor, nor potentially even among the most prominent factors, considered in the investment decisions in respect of the assets which the Sub-Fund may buy and/or hold. Accordingly, the Manager (or the Investment Manager, as the case) may buy and/or hold assets which may expose the Sub-Fund to high or low levels of Sustainability Risk. For further information on how Sustainability Risks are integrated, please refer to section "SFDR disclosure" under each Sub-Fund's supplement.

Unaudited Information (continued)

The following sub-funds are classified as financial products which promote environmental and/or social characteristics pursuant to Article 8 and Article 9 SFDR:

Fund	SFDR Classification	Investment Manager
CoRe Series - FAM Sustainable	Article 8	Fineco Asset Management DAC
CoRe Series - Global Macro Credit FAM Fund	Article 8	Algebris (UK) Limited
CoRe Series - Bond 6M Fineco AM Fund	Article 8	BNP Paribas Asset Management France
CoRe Series - Enhanced Bond 6M Fineco AM Fund	Article 8	BNP Paribas Asset Management France
CoRe Series - Sustainable Enhanced Bond 12M Fineco AM Fund	Article 8	BNP Paribas Asset Management France
CoRe Series - Invesco Pan European High Income FAM Fund	Article 8	Invesco Asset Management Limited

SFDR and Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending SFDR (the "Taxonomy Regulation") require certain information to be disclosed in the audited financial statements where a Sub-Fund is classified under Article 8 or Article 9 of SFDR. This information is required to be presented in the form of the template set out in the annexes to Commission Delegated Regulation (EU) 2023/363 of 31 October 2022 amending and correcting the regulatory technical standards laid down in Delegated Regulation (EU) 2022/1288, which supplement SFDR. Further information on the environmental and/or social characteristics promoted by the Sub-Funds during the year can therefore be found in the annexes to these financial statements (the "SFDR Annexes").

The data used to complete the disclosures set out in the SFDR Annexes for the Sub-Funds is provided:

- For internally managed Sub-Funds other than Funds of Funds: by relevant third-party sources;
- For internally managed Funds of Funds: by the managers of the underlying funds which our Funds of Funds are invested in;
- For Sub-Funds managed by Delegate Investment Managers: by the relevant Delegate Investment Managers.
- The data used is the data available as at the year-end considered by the financial statements (December 2024) on backward-looking analysis.

The analysis is dependent on the underlying investee entities disclosing relevant data and the availability of this data can be limited. Data may also be incomplete, inaccurate and/or contain errors that may not be detected by the Manager. It has been observed that the availability and accuracy of data, from the relevant third-party data providers and underlying investee entities, continues to be challenging in some respects. Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in the SFDR Annexes should consequently be read and understood in light of these continuing challenges. With the assistance of the Manager and, where applicable for the relevant Sub-Fund, the Investment Manager, the Board of the Fund continues to monitor the ongoing development and evolution of sustainability-related regulation, including SFDR and the Taxonomy Regulation, and associated guidance and the availability of relevant third party and investee entities' data in this regard.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CoRe Series – Global Macro Credit FAM Fund

Legal entity identifier: 254900CQBF3SE59D9X06

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund for the year ending 31 December 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party. All data and other information contained in the annex has been compiled in accordance with the proprietary sustainable finance framework implemented by the Manager [and the Investment Manager] for the Fund.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics which were promoted by the Fund are:

1. Prevention of predatory lending practices ("**Characteristic 1**")
2. Pollution prevention and control ("**Characteristic 2**")
3. Emissions reduction ("**Characteristic 3**")

4. Human rights (“**Characteristic 4**”)5. Labour relations (“**Characteristic 5**”)

(Each a “Characteristic” and Characteristics 1 to 5 together referred to as the “Core ESG Concerns”)

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

For the reference period 1 January 2024 to 31 December 2024 (the “Reference Period”) the overall percentage of holdings of the Fund (i.e., the total NAV of the Fund) (the “Holdings”) that promoted one or more Core ESG Concerns was **85%**. The remaining **15%** of the Holdings that did not promote the Fund’s environmental and social characteristics (the “ES Characteristics”) were in assets that are considered “other” assets for the purpose of this annex.

To measure the attainment of Characteristics 1 to 5 above the following sustainability indicators were used:

- **Characteristic 1:**
 - **Indicator:** the share of revenues derived from predatory lending activities (“**Indicator 1**”).
- **Characteristic 2:**
 - **Indicator:** amount of air pollutants in proportion to company revenue (“**Indicator 2.a**”) and/or the amount of inorganic pollutants in proportion to company revenues (“**Indicator 2.b**”).
- **Characteristic 3:**
 - **Indicator:** the share of investments in companies that explicitly disclose they have either committed to setting or have set science-based targets (“SBTs”) in relation to decarbonisation (“**Indicator 3**”).
- **Characteristic 4:**
 - **Indicator:** the share of investments in companies involved in very serious violations of human rights under the United Nations Global Compact (“UNGC”) (“**Indicator 4.a**”).
 - **Indicator:** the existence of human rights commitments, policies and procedures at the individual investee level measured as the share invested in companies without Human Rights policies (“**Indicator 4.b**”).
- **Characteristics 5:**
 - **Indicator:** the share of investments in companies involved in very serious violations of labour rights under the UNGC (“**Indicator 5.a**”).
 - **Indicator:** the evolution at portfolio level of an aggregate labour practice score (“**Indicator 5.b**”). The score reflects the investees’ gender balance; gender pay ratio; performance in terms of preventing discrimination and harassment; freedom of association; ethnic diversity.

In addition to indicators 1 to 5B listed above (the “Core Indicators”), the following indicators are also considered by the Fund to measure the attainment of its overall ESG policy (the “Additional Indicators”):

- **Exclusion Policies:**

- **Indicator:** any holdings (0%) of the Fund comprising of issuers on the exclusion list disclosed in the Fund's supplement ("**Indicator 6**").
- **Voting policy and engagement**
 - **Indicator:** the % of meeting voted ("**Indicator 7.a**") the % of proposals voted ("**Indicator 7.b**") the % of shareholders' resolutions voted against ("**Indicator 7.c**") the % of shareholders' resolutions voted in favour ("**Indicator 7.d**") the number of ESG-related engagements with investees ("**Indicator 7.e**").
- **ESG screening**
 - **Indicator:** any share of investment (0%) in companies that are identified to be in the bottom 10% of the distribution of the relevant sector's ESG score ("**Indicator 8.a**").
 - **Indicator:** the evolution at portfolio level of a global ESG score ("**Indicator 8.b**"), as well as of individual environmental ("**Indicator 8.c**"), social ("**Indicator 8.d**"), and governance scores ("**Indicator 8.e**").

The Core Indicators and Additional Indicators together referred to as the "**Indicators**".

● **How did the sustainability indicators perform?**

Methodologies Used

The Investment Manager assessed the performance of the Indicators using the following methodologies to calculate the value of Indicators for the Reference Period as applicable:

- (i) a percentage of Holdings calculated as the average of the Fund's quarter-end calculations invested in the applicable issuers over the Reference Period (the "**Average Holdings Methodology**");
- (ii) a percentage of revenues of the applicable issuer attributable to the applicable activity calculated as the average revenues of the Fund's quarter-end calculations over the Reference Period (the "**Average Revenues Methodology**");
- (iii) the tonnes¹ of air pollutants of the investee companies in the Portfolio for the Reference Period (the "**Air Pollutants Methodology**") and/or the tonnes of inorganic pollutants of the investee companies in the Portfolio for the Reference Period (the "**Inorganic Pollutants Methodology**") per million EUR invested.
- (iv) the tonnes of CO₂ emissions of the investee companies in the Portfolio for the Reference Period (the "**CO₂e Calculation**"), the tonnes of CO₂ emissions of the Portfolio per €1,000,000.00 of AuM for the Reference Period (the "**Carbon Footprint Calculation**"), and the tonnes of CO₂ emissions of the Portfolio per €1,000,000.00 of revenue generated by the investee companies (or in the case of sovereigns per €1,000,000.00 of GDP of the investee country) in the Portfolio for the Reference Period (the "**GHG Intensity Methodology**");

¹ All references to "tonnes" in this report are to metric tonnes unless expressed otherwise.

- (v) the tonnes of hazardous waste and radioactive waste generated by the Portfolio per €1,000,000.00 of revenue generated by the investee companies in the Portfolio for the Reference Period (the **“Hazardous Waste Calculation”**);
 - (vi) the GWh consumed by the Portfolio per €1,000,000.00 of revenue generated by the investee companies in the Portfolio for the Reference Period (the **“Energy Consumption Calculation”**);
 - (vii) the share of the investee companies in the Portfolio’ consumption of non-renewable energy and energy production from non-renewable sources compared to renewable energy sources for the Reference Period (the **“Non-Renewable Energy Consumption”** and **“Non-Renewable Energy Production”**);
 - (viii) the average unadjusted gender pay-gap of investee companies (**“Gender Pay Gap Calculation”**). Unadjusted gender pay gap means the difference between average gross hourly earnings of male paid employees and of female paid employees as a % of average gross hourly earnings of male paid employees.
 - (ix) the average percentage of female board members in investee companies (**“Board Gender Diversity Calculation”**);
 - (x) a percentage of meetings, proposals, and shareholder resolutions voted for or against calculated as a simple percentage out of the total number of the applicable meetings, proposals, and shareholder resolutions during the Reference Period (the **“Voting Methodology”**);
 - (xi) the number of engagements made during the Reference Period (the **“Total Engagements Calculation”**);
 - (xii) the portfolio average (weighted using investment weights) of an issuer-level score from third party ESG data providers covering labour relations and labour practices; the portfolio average (weighted using investment weights) of an issuer-level governance score from third party ESG data providers; the portfolio average (weighted using investment weights) of an issuer-level environmental score from third party ESG data providers; the portfolio average (weighted using investment weights) of an issuer-level social score from third party ESG data providers; and the portfolio average (weighted using investment weights) of an issuer-level ESG score from third party ESG data providers. These are all computed according to the same methodology being the average scores of quarter-end portfolios for the four quarters of the year (the **“Average Score Methodology”**);
- ((i) to (xii) above together referred to as the **“Reporting Methodologies”**).

The Reporting Methodologies used by the Investment Manager in consultation with the Manager were chosen for the applicable Indicators in compliance with the Fund, Manager and Investment Managers’ obligation to ensure that information disclosed is fair, clear and not misleading. Unless expressed otherwise, all methodologies are based on the average of the Fund’s four quarter-ends.

Performance of the Indicators

(A) Core ESG Concerns:

For the Reference Period the Core Indicators reported as follows:

INDICATOR	DEFINITION	METHODOLOGY	VALUE	SOURCE
Indicator 1	Share of investees' revenues from predatory lending activities (%)	Average Revenues Methodology	0 % ²	Sustainalytics
Indicator 2.a	Emissions of air pollutants (tonnes per EUR million EVIC)	Air Pollutants Methodology	0.35 ³	S&P Global
Indicator 2.b	Emissions of inorganic pollutants (tonnes per EUR million invested)	Inorganic Pollutants Methodology	0.001 ⁴	S&P Global
Indicator 3	Share of investments in companies that explicitly disclose they have either committed to setting or have set science-based targets ("SBTs") in relation to decarbonisation	Average Holdings Methodology	33% ⁵ Of which, companies with formally committed or validated SBTs: 6%	Bloomberg LP SBT Initiative
Indicator 4.a	Share of investments in companies involved in very serious violations of human rights under the UN Global Compact (UNGC), (%)	Average Holding Methodology	0 % ⁶	MSCI
Indicator 4.b	Share of investments in companies lacking human rights commitments, policies, and procedures at the individual investee level (%)	Average Holding Methodology	12 % ⁷	Clarity AI
Indicator 5.a	Share of investments in companies involved in very serious violations of labour rights under UNGC (%)	Average Holding Methodology	0 % ⁸	MSCI

² Reported as a % of any applicable revenue for the Reference Period, such % calculated using the Average Revenues Methodology. All companies screened prior to investment against the Algebris Predatory Lending Exclusions List – which flags companies deriving any revenues from this activity. Investment in such companies is not allowed at Firm level.

³ Reported as tonnes of emissions per € 1 million of EVIC using the Air Pollutants Methodology.

⁴ Reported as tonnes of emissions per € 1 million of EVIC using the Inorganic Pollutants Methodology.

⁵ Reported as a % of Portfolio invested in applicable companies over the Reference Period, such % calculated using the Average Holding Methodology.

⁶ Reported as a % of Portfolio invested in applicable companies over the Reference Period, such % calculated using the Average Holding Methodology. All companies are screened prior to the investment against the Algebris UNGC Exclusion List – which flags companies involved in very serious violations of the UNGC principles. Investment in such companies is not allowed at Manager-level.

⁷ Reported as % of Portfolio invested in applicable companies over the Reference Period, such % calculated using the Average Holding Methodology.

⁸ Reported as a % of Portfolio invested in applicable companies over the Reference Period, in accordance with the Average Holding Methodology. All companies are screened prior to the investment against the Algebris UNGC Exclusion List – which flags companies involved in very serious violations of the UNGC principles. Investment in such companies is not allowed at Manager level.

INDICATOR	DEFINITION	METHODOLOGY	VALUE	SOURCE
Indicator 5.b	Portfolio level annual average Labour Practice score (0-100, 100 = best)	Average Score Methodology	58 ⁹	Clarity AI S&P Global

(B) Exclusion Policies

For the Reference Period Indicator 6 reported as follows:

□ **Indicator 6**¹⁰: **0%**

Over the period under consideration, the Fund held **no** positions in companies that were listed on the Investment Manager's ESG exclusion lists.

(C) Voting Policy and Engagement

For the Reference Period Indicator 7 reported as follows:

INDICATOR	DEFINITION	METHODOLOGY	VALUE	SOURCE
Indicator 7.a	The share of meeting voted (% of total)	Voting & Engagement Methodology	100% ¹¹	Algebris and ISS
Indicator 7.b	The % of shareholders' resolutions voted against (% of all shareholders resolutions)	Voting & Engagement Methodology	50% ¹²	Algebris and ISS
Indicator 7.c	The share of shareholders' resolutions voted in favour (% of all shareholders resolution)	Voting & Engagement Methodology	50% ¹³	Algebris and ISS
Indicator 7.d	The number of ESG-related engagements with investees (N)	Voting & Engagement Methodology	13 ¹⁴	Algebris

⁹ Reported as the average of quarter-end portfolios for the four quarters of the year in accordance with the Average Score Methodology. The Investment Manager sources labor practice scores from several third party ESG data providers, to ensure better coverage. The number reported in the table is the average of the scores sourced from different providers, where scores from different providers are available.

¹⁰ Reported as a % of Portfolio invested in applicable companies over the Reference Period, in accordance with the Average Portfolio Methodology. All companies are screened prior to investment against the Algebris ESG exclusion list applicable to the Fund. Investments in such companies are not permitted at Investment Manager level.

¹¹ The Fund invests in credit and does not hold any equity investment, on which it can exercise voting rights.

¹² The Fund invests in credit and does not hold any equity investment, on which it can exercise voting rights.

¹³ The Fund invests in credit and does not hold any equity investment, on which it can exercise voting rights.

¹⁴ Reported as absolute number of engagements on ESG matters held with investee companies during the Reference Period, either individually or as part of collective engagement initiatives.

(D) ESG screening

For the Reference Period Indicators 8.a – 8.e performed as follows:

INDICATOR	DEFINITION	METHODOLOGY	VALUE	SOURCE
Indicator 8.a	Share of investments in companies in bottom 10% of ESG score distribution	Average Holding Methodology	0.0% ¹⁵	Algebris
Indicator 8.b	Portfolio level annual average Global ESG score (0-100, 100 = best)	Average Score Methodology	63 ¹⁶ Sovereign: 57 ¹⁷	Clarity AI S&P Global
Indicator 8.c	Portfolio level annual average Environmental Score (0-100, 100 = best)	Average Score Methodology	66 ¹⁸ Sovereign: 55 ¹⁹	Clarity AI S&P Global
Indicator 8.d	Portfolio level annual average Social Scores (0-100, 100 = best)	Average Score Methodology	61 ²⁰ Sovereign: 60 ²¹	Clarity AI S&P Global
Indicator 8.e	Portfolio level annual average Governance Scores (0-100, 100 = best)	Average Score Methodology	68 ²² Sovereign: 56 ²³	Clarity AI S&P Global

● ***...and compared to previous periods?***

The Indicators evolved as follow:

Performance of the Indicators**(E) Core ESG Concerns:**

INDICATOR	DEFINITION	2022	2023	2024	Change / comment
-----------	------------	------	------	------	------------------

¹⁵ See comment below table.¹⁶ Annual average coverage from the third party provider is of 86%¹⁷ Annual average coverage for this indicator was 100%¹⁸ Annual average coverage from the third party provider is of 86%¹⁹ Annual average coverage for this indicator was 100%²⁰ Annual average coverage from the third party provider is of 86%²¹ Annual average coverage for this indicator was 100%²² Annual average coverage from the third party provider is of 86%²³ Annual average coverage for this indicator was 100%

Indicator 1	Share of investees' revenues from predatory lending activities (%)	0 %	0 %	0%	Unchanged
Indicator 2.a	Emissions of air pollutants (tonnes per EUR million EVIC)	1.07 ²⁴	0.26	0.35	Increased
Indicator 2.b	Emission of inorganic pollutants (tonnes per EUR million EVIC)		0.001	0.001	Unchanged
Indicator 3	Share of investments in companies that explicitly disclose they have either committed to setting or have set science-based targets ("SBTs") in relation to decarbonisation	21 %	36%	33%	Decreased The share invested in companies with formally committed or validated SBTs decreased to 6% (from 12% in 2023 and 2022). This was due to several banks removing their SBT in 2024.
Indicator 4.a	Share of investments in companies involved in very serious violations of human rights under the UN Global Compact (UNGC), (%)	0.9 %	0 %	0%	Unchanged
Indicator 4.b	Share of investments in companies lacking human rights commitments, policies, and procedures at the individual investee level (%)	11 %	14 %	12%	Decreased
Indicator 5.a	Share of investments in companies involved in very serious violations of labour rights under UNGC (%)	0 %	0 %	0%	Unchanged
Indicator 5.b	Portfolio level annual average Labour Practice score (0-100, 100 = best)	60	62	58	Decreased This year – where available – we added scores from S&P Global for companies that did not have a Clarity AI score. Increased coverage may explain the slight decrease.

(F) Exclusion Policies

For the Reference Period Indicator 6 reported as follows:

- ☐ **The relevant indicator was 0% in 2024, unchanged from 2023 and 2022**

Over the period under consideration, the Fund held **no** positions in companies that were listed on the Investment Manager's ESG exclusion lists.

²⁴ The 2022 figure has been amended due to a methodology revision to ensure consistency with 2023 and 2024.

(G) Voting Policy and Engagement

For the Reference Period Indicator 7 reported as follows:

INDICATOR	DEFINITION	2022	2023	2024	Change
Indicator 7.a	The share of meeting voted (% of total)	N/A	N/A	N/A	N/A
Indicator 7.b	The % of shareholders' resolutions voted against (% of all shareholders resolutions)	N/A	N/A	N/A	N/A
Indicator 7.c	The share of shareholders' resolutions voted in favour (% of all shareholders resolution)	N/A	N/A	N/A	N/A
Indicator 7.d	The number of ESG-related engagements with investees (N)	0	3	13	Increased

(H) ESG screening

For the Reference Period Indicators 8.a – 8.e performed as follow. The aggregate ESG score of the total portfolio decreased only slightly during the period, while the ESG scoring of the sovereign component broadly improved. To further improve coverage, the Investment Manager added a new third party source for ESG scores that was previously not used in compiling reporting for this portfolio. As scores for relatively smaller and/or private companies tend to be lower, this may contribute to explain the slight decrease in the corporate component.

INDICATOR	DEFINITION	2022	2023	2024
Indicator 8.a	Share of investments in companies in bottom 10% of ESG score distribution	0.2 %	0.4 %	0.0%
Indicator 8.b	Portfolio level annual average Global ESG Score (0-100, 100 = best)	65 Sov: 57	65 Sov: 53	63 Sov: 57
Indicator 8.c	Portfolio level annual average Environmental Score (0-100, 100 = best)	69 Sov: 60	68 Sov: 57	66 Sov: 55
Indicator 8.d	Portfolio level annual average Social Score (0-100, 100 = best)	62 Sov: 58	63 Sov: 53	61 Sov: 60

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

INDICATOR	DEFINITION	2022	2023	2024
Indicator 8.e	Portfolio level annual average Governance Score (0-100, 100 = best)	66 Sov: 55	67 Sov: 50	68 Sov: 56

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

N/A

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

N/A

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

During the Reference Period, the Investment Manager considered the principal adverse impacts (“PAI”) of the Fund’s investments prior to investment, and on an ongoing basis, by

considering the following PAI adverse sustainability indicators (the “**Adverse Indicators**”) in respect of all investee companies:

(1) Climate and other Environmental Adverse Indicators:

GHG Emissions

- **GHG Emissions:** the total greenhouse gases (“**GHG**”) emissions of the investee company (“**PAI 1**”).
- **Carbon Footprint:** the carbon footprint of the investment company (“**PAI 2**”).
- **GHG Intensity:** the measure of the GHG intensity of the investee company (“**PAI 3**”).
- **Exposure to Fossil Fuel:** the share of investments the Fund made in companies active in the fossil fuel sectors (“**PAI 4**”).
- **Non-Renewable Energy Consumption:** the investee companies’ share of non-renewable energy consumption and non-renewable energy production from non-renewable energy sources compared to renewable energy sources (“**PAI 5**”).
- **Energy Consumption Intensity:** the investee companies’ energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector (“**PAI 6**”).

PAIs 1 to 6 together referred to as the “**GHG Indicators**”.

Biodiversity

- **Adverse Biodiversity Activities:** the share of investments by the Fund in investee companies with sites and/or operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (“**PAI 7**” or the “**Biodiversity Indicator**”).

Water

- **Emissions to Water:** the tonnes of emissions to water generated by investee companies per million EUR invested (“**PAI 8**” or the “**Water Indicator**”).

Waste

- **Hazardous Waste Ratio:** the tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (“**PAI 9**” or the “**Waste Indicator**”).

Emissions

- **Absence of Carbon Emission Reduction Initiatives:** the share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement adopted under the UN Framework Convention on Climate Change (“**PAI 10**” or the “**Emissions Reduction Indicator**”).

(2) Social Adverse Indicators:

Social and Employee Matters

- **Violations of UNGC principles and OECD Guidelines:** the share of investments the Fund makes in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for multinational enterprises (“**PAI 11**”).
- **Lack of process to monitor compliance with UNGC:** the share of investments of the Fund in companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (“**PAI 12**”).
- **Unadjusted Gender Pay Gap:** the average unadjusted gender pay gap of investee companies of the Fund (“**PAI 13**”).
- **Board Gender Diversity:** the ratio of female to male board members in the investee companies of the Fund (“**PAI 14**”).
- **Exposure to Controversial Weapons:** the share of investments the Fund makes in investee companies involved in the manufacturing or selling of controversial weapons (“**PAI 15**”).
- **Absence of Anti-Corruption and Anti-Bribery Policies:** the share of investments in investee companies that do not have policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption (“**PAI 16**”).

PAIs 11 to 16 referred to together as the (“**Social Indicators**”).

(3) **Sovereign Adverse Indicators:**

GHG Emissions

- **GHG Intensity:** the measure of the GHG intensity of the investee country (“**PAI 17**”).

Social

- **Social Violations:** the number of investee countries subject to applicable social violations²⁵ (“**PAI 18**”).

Adverse Indicators Reporting:

During the Reference Period, the impact applicable to the PAIs applied to the investee companies in the Fund’s portfolio can be reported as²⁶:

²⁵ Algebris sources data on this indicator from Clarity AI. The provider identifies a country as subject to social violation if it meets any of the following criteria:

- (1) Countries with sanctions imposed by the European Union or the United Nations that satisfy one of the following: (i) Human rights abuses by the governmental institutions; (ii) Evidence to show that at least one person from the list of sanctioned persons in the country holds a position in the government or governmental institutions; (iii) the current regime is the result of a coup; (iv) violations of international law; (v) misappropriation of public funds resulting in undermining of democracy.
- (2) Countries with sanctions imposed by the Office of Foreign Asset Control (OFAC) of the United States that satisfy the following: (i) human rights abuses by the government or governmental institutions

²⁶ The source for the PAI indicators is Clarity AI if not indicated otherwise.

Adverse Indicator		Metric	Impact 2024
CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS			
Greenhouse gas emissions	PAI 1. GHG emissions ²⁷	Scope 1 GHG emissions	25288 tonnes CO ₂ e
		Scope 2 GHG emissions	2530 tonnes CO ₂ e
		Scope 3 GHG emissions	110961 tonnes CO ₂ e
		Total GHG emissions	136295 tonnes CO ₂ e
	PAI 2. Carbon footprint	Carbon footprint	403.7 tonnes CO ₂ e / EUR M invested ²⁸
	PAI 3. GHG intensity of investee companies	GHG intensity of investee companies	768.2 tonnes CO ₂ e / EUR M revenue ²⁹
	PAI 4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	12.6 % ³⁰
	PAI 5. Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	Consumption: 49.5 % ³¹ Production: 1.8 % ³²
	PAI 6. Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	Total: 0.52 ³³ Sectors A: n/a Sector B = 0.07; C = 0.02; D = 0.26; E = 0.01; F = 0.00; G = 0.00; H = 0.12; L = 0.02
Biodiversity	PAI 7. Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	2.6 % ³⁴
Water	PAI 8. Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	0.00 tonnes / EUR M invested ³⁵

²⁷ Calculated in accordance with the CO₂e Calculation. Annual average coverage for this indicator ranges between 86% and 89%

²⁸ Calculated in accordance with the Carbon Footprint Calculation. Annual average coverage for this indicator is 86%

What was the proportion of sustainability-related investments?

Information on the proportion of the Fund which promoted environmental/social characteristics during the Reference Period is provided below.

● What was the asset allocation?

The proportion of the Fund's investments that were aligned with the E/S Characteristics was **85%**. Please note that voting is not relevant to the particular assets of the Fund and this was not taken into account in determining this percentage. Please refer to the section '*What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?*' below for a description of the purpose of the investments during the Reference Period within #2 Other.

Asset allocation describes the share of investments in specific assets.

Historical comparison of the asset allocation	FY 2022	FY 2023	FY 2024
#1 Aligned with E/S characteristics	89%	90%	85%
#2 Other	11%	10%	15%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics, during the Reference Period investments of the Fund in environmentally sustainable economic activities aligned with the “EU Taxonomy” (being Regulation (EU) 2020/852 of the European Parliament and the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investments) (including in transitional and enabling activities) were 2.8% of the investments of the Fund based on revenue alignment and 2.4% based on CapEX alignment.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁴⁷?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

⁴⁷ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Over the course of the year, the average annual exposure to enabling activities was **0.2%** and the average annual exposure to transitional activities was **0.01%**

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage investments that were aligned with the EU Taxonomy increased slightly in 2024 compared to 2023 in turnover and CapEx terms, whereas it has slightly decreased in OpEx terms. The share of enabling activities has decreased, whereas the share of transitional activities has remained constant.

Aligned (including Sovereign)	2022	2023	2024	Change
Turnover	0.07%	1.91%	2.78%	0.87%
CapEx	0.08%	2.24%	2.37%	0.13%
OpEx	0.06%	1.59%	0.86%	-0.74%
Aligned (excluding Sovereign)	2022	2023	2024	Change
Turnover	0.23%	2.37%	3.63%	1.26%
CapEx	0.28%	2.84%	3.09%	0.25%
OpEx	0.19%	2.00%	1.11%	-0.89%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Aligned (including Sovereign)	2022	2023	2024	Change
	2022	2023	2024	Change
Enabling Activities	0.01%	0.49%	0.18%	-0.31%
Transitional Activities	0.01%	0.01%	0.01%	0.00%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

0%

What was the share of socially sustainable investments?

0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Other" investments made by the Fund during the Reference Period include instruments which are used for the purpose of hedging (including currency risk management), liquidity, diversification, and efficient portfolio management. These investments include, but are not limited to, ancillary liquid assets and financial derivative instruments. Whilst these investments may not be aligned with the environmental or social characteristics promoted by the Fund, they will, to the extent possible, still be subject to the exclusion policies detailed above, in addition to the UNGC Screening. These provide the minimum safeguards.

The remaining assets of the Fund during the Reference Period comprised of cash and cash equivalents held from time to time on an ancillary basis, as well as instruments for hedging purposes. No minimum environmental or social safeguards applied in respect of these.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following actions taken during the Reference Period to meet the environmental and/or social characteristics promoted by the Fund:

(i) **Characteristic 1 (Prevention and Contrast of Predatory Lending Practices):**

All companies are screened prior to investment against the Investment Manager's Predatory Lending Exclusion List – which flags companies deriving any (>0%) revenues from this activity. Investment in such companies is not allowed at Investment Manager level. All ESG exclusion lists are coded into the Investment Manager's internal automated controls system. These have fully integrated pre- and post-trade controls which include the relevant investment guidelines for a particular fund. Any attempts at trading a security that is restricted on ESG grounds would trigger a pre-trade alert.

(ii) **Characteristic 2 (Pollution Prevention and Control):**

Where available, the Investment Manager monitors GHG emission, air pollutants emissions, and inorganic pollutants emission data from third party providers. Since data coverage from third party providers on air pollutants and inorganic pollutants emissions is still limited, for the time being no hard threshold has been set on this indicator for the purpose of investment eligibility.

The value of emissions of air pollutants per million of company's EVIC increased in 2024 compared to 2023, but the coverage for this indicator also increased substantially – from 68% to 82% over the same period – pointing to the increase being in part explained by better data availability. The value of emissions of inorganic pollutants per million of company's EVIC remained constant in 2024 compared to previous years.

The value of GHG emissions (PAI 1) at portfolio level increased considerably during the Reference Period, especially Scope 3 GHG emissions. However, we note that this indicator is not rescaled by the size of the Fund's AUM – which makes comparison over time difficult to perform, when AUM increase. AUM for this fund more than doubled in 2024 compared to 2023 (increasing from an annual average of 189 million to 489 million) and this is likely one main reason behind the increase in the value of PAI 1. This assessment is further supported by the fact that the portfolio carbon footprint (PAI 1) and the portfolio GHG intensity (PAI 3) increased much less than PAI 1 (by 29% and 13% respectively), the share invested in companies active in the fossil fuel sector remained broadly constant (from 12% in 2023 to 12.6% in 2024) and the share of both non-renewable energy consumption and non-renewable energy production decreased.

(iii) Characteristic 3 (Emission Reduction):

The Investment Manager monitors the share of investments in companies that explicitly disclose they have either committed to setting or have set science-based targets ("SBTs") in relation to decarbonisation. The Investment Manager also monitors transition from those commitments into validated targets. The share invested in companies that explicitly disclose they have either committed to setting or have set science-based targets ("SBTs") in relation to decarbonisation has decreased marginally during 2024, as did the share invested in companies with public commitments to set targets confirmed or validated by SBTi has decreased by from 12% to 6%. Yet, the share of companies without carbon emission reduction initiatives has also decreased at portfolio level in 2024 compared to 2023.

The decrease in the share invested in companies with a commitment to set an SBT and/or a validated SBT is largely due to the fact that several banks decided to remove their SBTs over the past year. During the Reference Period, Algebris engaged with 2 of these banks individually about this decision, and also participated to the SBT engagement campaign run by the Carbon Disclosure Project (CDP).

(iv) Characteristic 4 (Human Rights):

All companies are screened prior to investment against the Investment Manager's UNGC Exclusion List – which uses MSCI data to identify companies involved in breaches of the UNGC Principles. Investment in such companies is not allowed at Investment Manager level. All ESG exclusion lists are coded into the Investment Manager's internal automated controls system. These have fully integrated pre-

and post-trade controls which include the relevant investment guidelines for a particular fund. Any attempts at trading a security that is restricted on ESG grounds would trigger a pre-trade alert. During 2024, the Fund held no positions in names listed on the Investment Manager's UNGC exclusion list.

The share invested in companies identified as lacking human rights commitment and policies has decreased marginally in 2024 (from 14% to 12%).

(v) Characteristics 5 (Labour Relations):

All companies are screened prior to investment against the Investment Manager's UNGC Exclusion List – which uses MSCI data to identify companies involved in very serious violations of the UNGC principles, including labour rights. The screening includes an assessment of compliance with labour standards (broad and narrow measures). Investment in such companies is not allowed at Investment Manager level. All ESG exclusion lists are coded into the Investment Manager's internal automated controls system. These have fully integrated pre- and post-trade controls which include the relevant investment guidelines for a particular fund. Any attempts at trading a security that is restricted on ESG grounds would trigger a pre-trade alert. During 2024, the Fund held no positions in names listed on the Investment Manager's UNGC exclusion list.

The Investment Manager monitors the evolution of third-party Labour Practice scores – aggregating a variety of indicators pertaining to labour conditions, health and safety, discrimination, and other relevant labour practices. The portfolio level annual average labour practice score decreased by 4 points 2024. To further improve coverage, the Investment Manager added a new third party source for ESG scores that was previously not used in compiling reporting for this portfolio. As scores for relatively smaller and/or private companies tend to be lower, this may contribute to explain the slight decrease.

(vi) Characteristic 6 (Exclusion Policies):

All companies are screened prior to investment against the Investment Manager's ESG Exclusion Lists applicable to the Fund – which flags companies deriving any (>0%) revenues from this activity. Investment in such companies is not allowed at Investment Manager level. All ESG exclusion lists are coded into the Investment Manager's internal automated controls system. These have fully integrated pre- and post-trade controls which include the relevant investment guidelines for a particular fund. Any attempts at trading a security that is restricted on ESG grounds would trigger a pre-trade alert. During 2024, the Fund held no positions in names listed on the Investment Manager's ESG exclusion lists.

(vii) Characteristic 7 (Voting policy and engagement)

In the Reference Period, the Fund held equity in 4 companies. It voted in 100% of the meeting on 100% of the proposals. The Fund also supported 50% of shareholders resolutions brought to these meetings.

The Investment Manager has been participating in the Carbon Disclosure Project's Non-disclosure Campaign since 2021 – requesting investees to respond to climate change, forests and water security questionnaires developed and managed by CDP. The Investment Manager may also hold individual engagement on ESG matters with companies in the portfolio – when warranted. In the Reference Period, 13 names in the portfolio were engaged on ESG matters either individually or as part of collaborative investment initiatives.

(viii) Characteristic 8 (ESG screening):

Where available, an Environmental Score, a Social Score, a Governance Score and an aggregate ESG Score from third-party ESG data providers is considered as part of the investment process.

The aggregate ESG score profile of the portfolio decreased slightly in 2024. To further improve coverage, the Investment Manager added a new third party source for ESG scores that was previously not used in compiling reporting for this portfolio. As scores for relatively smaller and/or private companies tend to be lower, this may contribute to explain the slight decrease in the corporate score. The score of the sovereign component, on the other hand, has increased.

The following actions taken during the Reference Period upon considering PAI:

Climate and Other Environmental Indicators:

- **GHG Emissions / Carbon Footprint / GHG Intensity:** the Investment Manager monitors investee companies' GHG emissions and GHG intensity, as well as the carbon footprint at portfolio level. The Investment Manager applies a strict fossil fuel exclusion policy that also includes a financing angle. Investment is not permitted in: (1) companies deriving 5% or more of their revenues from thermal coal mining and/or 10% or more of their revenues from thermal coal power generation; (2) companies deriving 5% or more of their revenues from Arctic Oil; (3) companies deriving 10% or more of their revenues from Tar sands; (5) any companies having a significant ownership stake in entities excluded under the Investment Manager's Climate-related exclusion policies applicable to the Fund and described above ⁴⁸; (6) Debt or equity issued by the top-5 global coal shareholders and bondholders, nor in debt or equity issued by major coal financiers – as described in the Investment Manager's [ESG Exclusion policy](#).
- **Exposure to companies active in the fossil fuel sector:** the Investment Manager joined the Net Zero Asset Managers Initiative (NZAM) in 2021, [committing](#) to manage a progressively larger share of its AUM in line with net zero emissions by 2050 or sooner and committing to implement a science-based [Fossil Fuel Investment Policy](#). As set out in the 2018 IPCC 1.5 degrees scenarios and the 2021 IEA Net Zero scenario, achieving net zero by 2050 will require a rapid reduction in emissions from fossil fuel combustion and phase out of investment in fossil fuels. The pathway laid out in the IEA report requires that no new unabated coal plants, no new oil and gas fields, and no new coal mines or mine extensions be approved from 2021 on. In its guidance for the financial sector, the Science Based Target Initiative (SBTi) also recommends that financial institutions seeking to align with the Paris Agreement transparently address the role of fossil fuels in their investment portfolio. The SBTi recommended phaseout of thermal coal investments and more thorough disclosure on financial institutions' fossil fuel investments and related activities. The Fund is subject to strict restrictions regarding investment in companies deriving revenues from fossil fuels. See details in the bullet point above.
- **Share of non-renewable energy consumption and production:** the Investment Manager monitors the average share of non-renewable energy consumption by investee companies, where available.

⁴⁸ Significant ownership data are sourced from data provider Sustainalytics. Significant ownership is typically defined as an ownership stake of 10% or above.

- **Biodiversity:** the Investment Manager monitors the exposure of investee companies to biodiversity risk and the existence of biodiversity policies. Where warranted, this may be part of ESG engagement with investee companies.
- **Water:** the Investment Manager monitors emission to water of investee companies, where available. Where warranted, this may be part of ESG engagement with investee companies.
- **Waste:** the Investment Manager monitors the hazardous waste ratio of investee companies, where available. Where warranted, this may be part of ESG engagement with investee companies.
- **Emission Reduction:** the Investment Manager monitors investee companies' commitment to set Science Based Targets for emission reduction (SBTs) and also monitors transition from these commitments into targets validated by the Science Based Target Initiative (SBTi).

Social Indicators:

- **UNGC / OECD Violations (PAI 10):** the Investment Manager applies an exclusion policy restricting investment in companies that are found to be in breach of the UN Global Compact principles. See details for under the section *What actions have been taken to meet the environmental and/or social characteristics during the reference period?*
- **UNGC / OECD Policies (PAI 11):** the Investment Manager monitors the existence of policies to monitor compliance with UNGC Principles and OECD guidelines. See details under the section *What actions have been taken to meet the environmental and/or social characteristics during the reference period?*
- **Unadjusted Gender Pay Gap:** the Investment Manager monitors the unadjusted gender pay gap of investee companies, where available. Where warranted, this may be part of ESG engagement with investee companies.
- **Board Gender Diversity:** the Investment Manager monitors the board gender diversity of investee companies. Where warranted, this may be part of ESG engagement with investee companies.
- **Exposure to Controversial Weapons:** the Fund is prevented from investing in companies deriving any (0%) revenue from the manufacturing or selling of controversial weapons. The Fund is also prevented from investing in any company having a significant ownership in the entities excluded under the above rule⁴⁹. The Fund is also restricted from investing in debt or equity issued by the top-5 nuclear weapons shareholders and lenders – as described in the Investment Manager's [ESG Exclusion Policy](#).
- **Lack of anti-corruption and anti-bribery policies:** the Investment Manager monitors the hazardous waste ratio of investee companies, where available. Where warranted, this may be part of ESG engagement with investee companies.

Sovereign Indicators

- **GHG Emissions – Sovereign:** the Investment Manager monitors the GHG emissions for sovereign investments (defined in terms of tonnes of CO₂e per EUR million of the country's GDP) but has not set a quantitative threshold for the time being.

⁴⁹ Significant ownership data are sourced from data provider Sustainalytics. Significant ownership is typically defined as an ownership stake of 10% or above.

- **Number and Share of Countries subject to social violations:** the Fund held no position in countries subject to social violations.

How did this financial product perform compared to the reference benchmark?

N/A

- *How does the reference benchmark differ from a broad market index?*

N/A

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

N/A

- *How did this financial product perform compared with the reference benchmark?*

N/A

- *How did this financial product perform compared with the broad market index?*

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name : CoRe Series - Bond 6M Fineco AM Fund

Legal Entity Identifier: 254900WF30KTLU9ARG37

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investment with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective** : ____%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **31.6%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using an ESG internal proprietary methodology, and by investing in issuers that demonstrate good environmental, social and governance practices.

Corporate issuers

The investment strategy selects corporate issuers with good or improving ESG practices within their sector of activity.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but are not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);

- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by the Responsible Business Conduct Policy (RBC Policy).

Sovereign issuers

The investment strategy selects sovereign issuers based on their performance across the environmental, social and governance pillars. The ESG performance of each country is assessed using an internal Sovereign ESG methodology that focuses on measuring governments' efforts to produce and preserve assets, goods, and services with high ESG values, according to their level of economic development. This involves evaluation of a country against a combination of environmental, social and governance factors, which include but not limited to:

- Environmental: climate mitigation, biodiversity, energy efficiency, land resources, pollution;
- Social: life conditions, economic inequality, education, employment, health infrastructure, human capital;
- Governance: business rights, corruption, democratic life, political stability, security.

BNP Paribas Asset Management's Global Sustainability Strategy places a strong emphasis on combatting climate change. Therefore, given the importance of sovereigns in addressing climate change, the internal Sovereign ESG methodology includes an additional scoring component that captures the country's contribution to progress towards the net-zero goals set out in the Paris Agreement. This additional scoring component reflects countries' commitment to future targets balanced by their current policies and their forward-looking physical climate risk exposure. It combines temperature alignment methodology for determining national contributions to climate change with an assessment of the laws and policies countries have in place for addressing climate change.

The investment manager also applies the BNP Paribas Group's sensitive countries framework, which includes restrictive measures on certain countries and/or activities that are considered as being particularly exposed to money laundering and terrorism financing related risks.

Furthermore, the investment manager promotes better environmental and social outcomes through engagement with issuers and the exercise of voting rights according to the Stewardship policy, where applicable.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the sub-fund:

- The percentage of the Sub-Fund's portfolio compliant with the RBC Policy: **100%**
 - The percentage of the Sub-Fund's portfolio covered by ESG analysis based on the ESG internal proprietary methodology: **99.7%**
 - The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe: **59.7 vs 53.3 (Bloomberg Multiverse 1-3Y (USD) RI)**
 - The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation: **31.6%**
- None of the indicators were subject to an assurance provided by an auditor or a review by a third party for the current and previous years.

● ***...and compared to previous periods ?***

Indicator	2022*	2023**	2024***	Comment
The percentage of the Sub-Fund's portfolio compliant with the RBC policy	100%	100%	100%	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio covered by the ESG analysis based on the ESG internal proprietary methodology	100%%	99.6%	99.7%	In line with the sub-fund's commitment
The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe	59.0 vs 53.9	59.0 vs 53.4	59.7 vs 53.3	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation	39.5%	25.5%	31.6%	In line with the sub-fund's commitment

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quarterly weighted average.

*** Figures reported in 2024 are expressed as a quarterly weighted average based on the AUM (assets under management).

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments made by the are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The internal methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets;
3. A company operating in high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C;
4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the

issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. BNP Paribas Asset Management (BNPP AM) uses its proprietary methodology to assess all companies against these requirements.

The share of sub-fundinvestments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

More information on the internal methodology can be found on the website of the investment manager: <https://docfinder.bnpparibas-am.com/api/files/14787511-CB33-49FC-B9B5-7E934948BE63>

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments that the product partially intends to make should not significantly harm any environmental or social objective (DNSH Principle). In this respect, the investment manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR and set out in Table 1 and any relevant additional indicator from Tables 2 and 3 of Annex I of the Delegated Regulation, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager ensures that throughout its investment process, the financial product takes into account principal adverse impact indicators that are relevant to its investment strategy to select the sustainable investments that the financial product partially intends to make by systematically implementing the sustainable investment pillars defined in the BNP Paribas Asset Management Global Sustainability Strategy (GSS) into its investment process and as further detailed below in this document; RBC policy, ESG integration guidelines, Stewardship, the forward-looking vision – the '3Es' (Energy transition, Environmental sustainability, Equality & Inclusive Growth).

All issuers included in the proportion of sustainable investments were compliant with the DNSH test.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment universe of the sub-fundis periodically screened with a view to identify issuers that are potentially in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the BNPP AM Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team. If an issuer is found to be in serious and repeated violations of any of the principles, it will be placed on an 'exclusion list' and will not be available for investment. Existing investments should be divested from the portfolio according to an internal procedure. If an issuer is at risk of violating any of the principles, it is

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

placed on a 'watch list' monitored, as appropriate. The issuers that have been placed on watch list are excluded from the proportion of sustainable investments disclosed in the report. For more information on the exclusions and the watchlist : [D8E2B165-C94F-413E-BE2E-154B83BD4E9B](#)

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors ?

The sub-fund considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the RBC Policy, ESG Integration Guidelines, and Engagement and Voting Policy which include the following provisions :

- Exclusion of issuers that are in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment
- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts

- In case of equity holdings, voting at Annual General Meetings of companies the portfolio is invested in to promote good governance and advance environmental and social issues
- Ensuring all securities included in the portfolio have supportive ESG research
- Managing portfolios so that their aggregate ESG score is better than the relevant benchmark or universe

Based on the above approach, and depending on the composition of the sub-fund's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement:
<https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-B0ED-84FC06E090BF>

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From 01.01.2024 to 31.12.2024

Largest investments**	Sector	% Assets*	Country**
ITALY (REPUBLIC OF) 3.45 PCT 15-JUL-2027	Government	4,58%	Italy

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average based on the AUM. The largest investments are based on official accounting data and are based on the transaction date.

* Any percentage differences with the financial statement portfolios result from a rounding difference.

** Any difference with the portfolio statements above are coming from the use of different data's sources.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments of the sub-fund is **31.6%**.

What was the asset allocation ?

Asset allocation describes the share of investments in specific assets.

The proportion of the investments of the sub-fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the sub-fund is **90.4%**.

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

-The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

As at 29.12.2023, the figures were as follow:

As at 31.12.2022, the figures were as follow:

● ***In which economic sectors were the investments made ?***

Sectors	% Asset
Financials	35,49%
Government	19,60%
Funds	9,71%
Cash	8,64%
Industrials	4,87%
Consumer Discretionary	4,27%
Real Estate	3,87%
Commercial Paper	3,65%
Materials	2,96%
Consumer Staples	2,65%
Health Care	1,52%
Communications	1,37%
Utilities	0,99%
Technology	0,46%
Derivatives	-0,04%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average based on the AUM.
The largest investments are based on official accounting data and are based on the transaction date.
This fund has no exposure to fossil fuel

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The investment manager uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information

on BNPP AM the methodology and the providers used can be found here: <https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD>

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?*

☒ Yes:

☐ In fossil gas

☐ In nuclear energy

☐ No:

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

** Real taxonomy aligned

The graph "Taxonomy-alignment of investments excluding sovereign bonds" represents 80.4% of the total investments

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

	Revenue	Capex	Opex
2022*	0.6%	/	/
2023**	1.7%	/	/
2024***	2.8%	4.1%	3.4%

*Figures reported in 2022 were calculated on the closing date of the accounting year

Figures reported in 2023 and 2024 are expressed as a quarterly weighted average.

*** Figures reported in 2024 are expressed as a quarterly weighted average based on the AUM.

**

The proportion of taxonomy-aligned economic activities in CapEx or OpEx are not disclosed in 2022 and 2023 given the level of data at the disposal of the investment manager related to such information.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **23.7%**.

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy

Regulation. Meanwhile, the sub-fund will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Socially sustainable investments represent **9.5%** of the sub-fund.

What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments includes the proportion of assets that do not attain the following standards established by the investment manager: 1) a positive ESG score and either a positive E score or a positive S score or 2) being Sustainable Investment according to BNPP AM ESG proprietary methodology or instruments which are mainly used for liquidity, such as cash and cash equivalent assets and/or efficient portfolio management, and/or hedging purposes. Those investments are made in compliance with our internal processes, including the risk management policy and the RBC policy when applicable as minimum environmental or social safeguards. The risk management policy comprises procedures as are necessary to enable the assessment for each financial product of the exposure of that product to market, liquidity, sustainability and counterparty risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

- The sub-fund shall comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labor rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.
- The sub-fund shall systematically integrate relevant ESG factors in line with its investment strategy into its investment analysis and decision-making processes.
- The sub-fund shall have at least 90% of its assets (excluding ancillary liquid assets) covered by the ESG analysis based on the ESG internal proprietary methodology.
- The sub-fund shall have the weighted average ESG score of its portfolio higher than the weighted average ESG score of its investment universe.
- The sub-fund shall invest a proportion of its assets in “sustainable investments” as defined in Article 2 (17) of the SFDR regulation
- The exclusions covered by the investment manager’s exclusion policy applies, being (1) Issuers that breach the principles of the UN Global Compact (UNGC), (2) Issuers involved in the manufacture or product life cycle of controversial weapons (such as but not limited to chemical weapons, cluster munitions and landmines); (3) Issuers deriving a certain percentage of their revenue from the production of tobacco or from other type of involvement in the life cycle of tobacco products such as distribution or licencing activities; (4) Issuers that derive a certain percentage of their revenue from thermal coal extraction and/or arctic drilling; and (5) Issuers that contravene the UNGC labourrelated principles and International Labour Organisation’s (“ILO”) broader set of labour standards.

In addition, the investment manager has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: [Sustainability report](#)

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name : CoRe Series – Enhanced Bond 6M Fineco AM Fund

Legal Entity Identifier: 254900F9P3O95UQMTG29

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investment with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective** : ____%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **38.7%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using an ESG internal proprietary methodology, and by investing in issuers that demonstrate good environmental, social and governance practices.

Corporate issuers

The investment strategy selects corporate issuers with good or improving ESG practices within their sector of activity.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but are not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);

- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by the Responsible Business Conduct Policy (RBC Policy).

Sovereign issuers

The investment strategy selects sovereign issuers based on their performance across the environmental, social and governance pillars. The ESG performance of each country is assessed using an internal Sovereign ESG methodology that focuses on measuring governments' efforts to produce and preserve assets, goods, and services with high ESG values, according to their level of economic development. This involves evaluation of a country against a combination of environmental, social and governance factors, which include but not limited to:

- Environmental: climate mitigation, biodiversity, energy efficiency, land resources, pollution;
- Social: life conditions, economic inequality, education, employment, health infrastructure, human capital;
- Governance: business rights, corruption, democratic life, political stability, security.

BNP Paribas Asset Management's Global Sustainability Strategy places a strong emphasis on combatting climate change. Therefore, given the importance of sovereigns in addressing climate change, the internal Sovereign ESG methodology includes an additional scoring component that captures the country's contribution to progress towards the net-zero goals set out in the Paris Agreement. This additional scoring component reflects countries' commitment to future targets balanced by their current policies and their forward-looking physical climate risk exposure. It combines temperature alignment methodology for determining national contributions to climate change with an assessment of the laws and policies countries have in place for addressing climate change.

The investment manager also applies the BNP Paribas Group's sensitive countries framework, which includes restrictive measures on certain countries and/or activities that are considered as being particularly exposed to money laundering and terrorism financing related risks.

Furthermore, the investment manager promotes better environmental and social outcomes through engagement with issuers and the exercise of voting rights according to the Stewardship policy, where applicable.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the sub-fund :

- The percentage of the Sub-Fund's portfolio compliant with the RBC Policy: **100%**
 - The percentage of the Sub-Fund's portfolio covered by ESG analysis based on the ESG internal proprietary methodology: **99.7%**
 - The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe: **59.3 vs 52.9 (Bloomberg Multiverse (USD) RI)**
 - The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation: **38.7%**
- None of the indicators above were subject to an assurance provided by an auditor or a review by a third party for the current and previous years.

● ***...and compared to previous periods ?***

Indicator	2022*	2023**	2024***	Comment
The percentage of the Sub-Fund's portfolio compliant with the RBC policy	100%	100%	100%	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio covered by the ESG analysis based on the ESG internal proprietary methodology	100%	99.6%	99.7%	In line with the sub-fund's commitment
The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe	58.3 vs 53.5	58.1 vs 53.0	59.3vs 52.9	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation	35.1%	33.1%	38.7%	In line with the sub-fund's commitment

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quarterly weighted average.

*** Figures reported in 2024 are expressed as a quarterly weighted average based on the AUM (assets under management).

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments made by the sub-fund are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The internal methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets;
3. A company operating in high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C;
4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the

issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. BNP Paribas Asset Management (BNPP AM) uses its proprietary methodology to assess all companies against these requirements.

The share of the sub-fund's investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

More information on the internal methodology can be found on the website of the investment manager: <https://docfinder.bnpparibas-am.com/api/files/14787511-CB33-49FC-B9B5-7E934948BE63>

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments that the product partially intends to make should not significantly harm any environmental or social objective (DNSH Principle). In this respect, the investment manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR and set out in Table 1 and any relevant additional indicator from Tables 2 and 3 of Annex I of the Delegated Regulation, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager ensures that throughout its investment process, the financial product takes into account principal adverse impact indicators that are relevant to its investment strategy to select the sustainable investments that the financial product partially intends to make by systematically implementing the sustainable investment pillars defined in the BNP Paribas Asset Management Global Sustainability Strategy (GSS) into its investment process and as further detailed below in this document; RBC policy, ESG integration guidelines, Stewardship, the forward-looking vision – the '3Es' (Energy transition, Environmental sustainability, Equality & Inclusive Growth).

All issuers included in the proportion of sustainable investments were compliant with the DNSH test.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment universe of the sub-fund is periodically screened with a view to identify issuers that are potentially in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the BNPP AM Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team. If an issuer is found to be in serious and repeated violations of any of the principles, it will be placed on an 'exclusion list' and will not be available for investment. Existing investments should be divested from the portfolio according to an internal procedure. If an issuer is at risk of violating any of the principles, it is placed on a 'watch list' monitored, as appropriate. The issuers that have been placed on watch list are excluded from the proportion of sustainable investments disclosed in the report. For more information on the exclusions and the watchlist : [D8E2B165-C94F-413E-BE2E-154B83BD4E9B](https://docfinder.bnpparibas-am.com/api/files/14787511-CB33-49FC-B9B5-7E934948BE63)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors ?

The sub-fund considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the RBC Policy, ESG Integration Guidelines, and Engagement and Voting Policy which include the following provisions :

- Exclusion of issuers that are in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment

- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts
- In case of equity holdings, voting at Annual General Meetings of companies the portfolio is invested in to promote good governance and advance environmental and social issues
- Ensuring all securities included in the portfolio have supportive ESG research
- Managing portfolios so that their aggregate ESG score is better than the relevant benchmark or universe

Based on the above approach, and depending on the composition of the fund's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: <https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-B0ED-84FC06E090BF>

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From 01.01.2024 to 31.12.2024

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average based on the AUM.
The largest investments are based on official accounting data and are based on the transaction date.

* Any percentage differences with the financial statement portfolios result from a rounding difference.

** Any difference with the portfolio statements above are coming from the use of different data's sources.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments of the sub-fund is **38.7%**.

What was the asset allocation ?

The proportion of the investments of the sub-fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the sub-fund is **92.5%**.

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

-The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

As at 29.12.2023, the figures were as follow:

As at 31.12.2022, the figures were as follow:

● **In which economic sectors were the investments made ?**

Sectors	% Asset
Financials	47.99%
Real Estate	8.78%
Consumer Discretionary	8.47%
Cash	6.77%
Industrials	6.32%
Government	4.67%
Funds	3.87%
Health Care	3.39%
Materials	2.99%
Utilities	2.25%
Consumer Staples	1.95%
Communications	1.28%
Energy	0.87%
<i>Integrated Oils</i>	0.43%
<i>Exploration & Production</i>	0.31%
<i>Oilfield Services & Equipment</i>	0.14%
Technology	0.22%
Derivatives	0.17%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average based on the AUM.
The largest investments are based on official accounting data and are based on the transaction date.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The investment manager uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information

on BNPP AM the methodology and the providers used can be found here: <https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD>

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

☒ Yes:

☐ In fossil gas

☒ In nuclear energy

☐ No:

However, the weighted average of the proportion of such investments does not exceed 1%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

** Real taxonomy aligned

The graph "Taxonomy-alignment of investments excluding sovereign bonds" represents 95.33% of the total investments

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

	Revenue	Capex	Opex
2022*	0.4%	/	/
2023**	2.2%	/	/
2024**	4.6%	4.4%	3.5%

*Figures reported in 2022 were calculated on the closing date of the accounting year
Figures reported in 2023 are expressed as a quarterly weighted average.
Figures reported in 2024 are expressed as a quarterly weighted average based on the AUM.

**

*** Figures

The proportion of taxonomy-aligned economic activities in CapEx or OpEx are not disclosed in 2022 and 2023 given the level of data at the disposal of the investment manager related to such information.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **30.2%**.

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the sub-fund will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Socially sustainable investments represent **8.7%** of the sub-fund.

What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments includes the proportion of assets that do not attain the following standards established by the investment manager: 1) a positive ESG score and either a positive E score or a positive S score or 2) being Sustainable Investment according to BNPP AM ESG proprietary methodology or instruments which are mainly used for liquidity, such as cash and cash equivalent assets and/or efficient portfolio management, and/or hedging purposes. Those investments are made in compliance with our internal processes, including the risk management policy and the RBC policy when applicable as minimum environmental or social safeguards. The risk management policy comprises procedures as are necessary to enable the assessment for each financial product of the exposure of that product to market, liquidity, sustainability and counterparty risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

- The sub-fund shall comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labor rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.
- The sub-fund shall systematically integrate relevant ESG factors in line with its investment strategy into its investment analysis and decision-making processes.
- The sub-fund shall have at least 90% of its assets (excluding ancillary liquid assets) covered by the ESG analysis based on the ESG internal proprietary methodology.
- The sub-fund shall have the weighted average ESG score of its portfolio higher than the weighted average ESG score of its investment universe.
- The sub-fund shall invest a proportion of its assets in "sustainable investments" as defined in Article 2 (17) of the SFDR regulation.
- The exclusions covered by the investment manager's exclusion policy applies, being (1) Issuers that breach the principles of the UN Global Compact (UNGC), (2) Issuers involved in the manufacture or product life cycle of controversial weapons (such as but not limited to chemical weapons, cluster munitions and landmines); (3) Issuers deriving a certain percentage of their revenue from the production of tobacco or from other type of involvement in the life cycle of tobacco products such as distribution or licencing activities; (4) Issuers that derive a certain percentage of their revenue from thermal coal extraction and/or arctic drilling; and (5) Issuers that contravene the UNGC

labourrelated principles and International Labour Organisation's ("ILO") broader set of labour standards.

In addition, the investment manager has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: [Sustainability report](#)

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name : CoRe Series – Sustainable Enhanced Bond
12M Fineco AM Fund

Legal Entity Identifier: 2549000QFK53UW8Y2E07

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investment with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective** : ____%

☒ It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **48.6%** of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using an ESG internal proprietary methodology, and by investing in issuers that demonstrate good environmental, social and governance practices.

Corporate issuers

The investment strategy selects corporate issuers with good or improving ESG practices within their sector of activity.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but are not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);

- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by the Responsible Business Conduct Policy (RBC Policy).

Sovereign issuers

The investment strategy selects sovereign issuers based on their performance across the environmental, social and governance pillars. The ESG performance of each country is assessed using an internal Sovereign ESG methodology that focuses on measuring governments' efforts to produce and preserve assets, goods, and services with high ESG values, according to their level of economic development. This involves evaluation of a country against a combination of environmental, social and governance factors, which include but not limited to:

- Environmental: climate mitigation, biodiversity, energy efficiency, land resources, pollution;
- Social: life conditions, economic inequality, education, employment, health infrastructure, human capital;
- Governance: business rights, corruption, democratic life, political stability, security.

BNP Paribas Asset Management's Global Sustainability Strategy places a strong emphasis on combatting climate change. Therefore, given the importance of sovereigns in addressing climate change, the internal Sovereign ESG methodology includes an additional scoring component that captures the country's contribution to progress towards the net-zero goals set out in the Paris Agreement. This additional scoring component reflects countries' commitment to future targets balanced by their current policies and their forward-looking physical climate risk exposure. It combines temperature alignment methodology for determining national contributions to climate change with an assessment of the laws and policies countries have in place for addressing climate change.

The investment manager also applies the BNP Paribas Group's sensitive countries framework, which includes restrictive measures on certain countries and/or activities that are considered as being particularly exposed to money laundering and terrorism financing related risks.

Furthermore, the investment manager promotes better environmental and social outcomes through engagement with issuers and the exercise of voting rights according to the Stewardship policy, where applicable.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the sub-fund have contributed are indicated in the question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the sub-fund:

- The percentage of the Sub-Fund's portfolio compliant with the RBC Policy: **100%**
 - The percentage of the Sub-Fund's portfolio covered by ESG analysis based on the ESG internal proprietary methodology: **100%**
 - The percentage of the Sub-Fund's investment universe reduction due to exclusion of securities with low ESG score and/or sector exclusions as per the RBC Policy; **46.4%**
 - The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe: **65.5 vs 52.9 (Bloomberg Multiverse (USD) RI)**
 - The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation: **48.6%**
- None of the indicators were subject to an assurance provided by an auditor or a review by a third party for the current and previous years.

● **...and compared to previous periods ?**

Indicator	2022*	2023**	2024***	Comment
The percentage of the Sub-Fund's portfolio compliant with the RBC policy	100%	100%	100%	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio covered by the ESG analysis based on the ESG internal proprietary methodology	100%	100%	100%	In line with the sub-fund's commitment
The percentage of the Sub-Fund's investment universe reduction due to exclusion of securities with low ESG score and/or sector exclusions as per the RBC Policy	>20%	>20%	46.4%	In line with the sub-fund's commitment
The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe	61.9 vs 53.5	62.6 vs 53.0	65.5 vs 52.9	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation	47.5%	49.4%	48.6%	In line with the sub-fund's commitment

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quarterly weighted average.

*** Figures reported in 2024 are expressed as a quarterly weighted average based on the AUM (assets under management).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments made by the sub-fund are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The internal methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets;

3. A company operating in high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C;
4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. BNP Paribas Asset Management (BNPP AM) uses its proprietary methodology to assess all companies against these requirements.

The share of the sub-fund's investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

More information on the internal methodology can be found on the website of the investment manager: <https://docfinder.bnpparibas-am.com/api/files/14787511-CB33-49FC-B9B5-7E934948BE63>

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments that the product partially intends to make should not significantly harm any environmental or social objective (DNSH Principle). In this respect, the investment manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR and set out in Table 1 and any relevant additional indicator from Tables 2 and 3 of Annex I of the Delegated Regulation, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager ensures that throughout its investment process, the financial product takes into account principal adverse impact indicators that are relevant to its investment strategy to select the sustainable investments that the financial product partially intends to make by systematically implementing the sustainable investment pillars defined in the BNP Paribas Asset Management Global Sustainability Strategy (GSS) into its investment process and as further detailed below in this document; RBC policy, ESG integration guidelines, Stewardship, the forward-looking vision – the '3Es' (Energy transition, Environmental sustainability, Equality & Inclusive Growth).

All issuers included in the proportion of sustainable investments were compliant with the DNSH test.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment universe of the sub-fund is periodically screened with a view to identify issuers that are potentially in violation or at risk of violation of the UN Global Compact Principles, OECD

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the BNPP AM Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team. If an issuer is found to be in serious and repeated violations of any of the principles, it will be placed on an 'exclusion list' and will not be available for investment. Existing investments should be divested from the portfolio according to an internal procedure. If an issuer is at risk of violating any of the principles, it is placed on a 'watch list' monitored, as appropriate. The issuers that have been placed on watch list are excluded from the proportion of sustainable investments disclosed in the report. For more information on the exclusions and the watchlist : [D8E2B165-C94F-413E-BE2E-154B83BD4E9B](#)

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors ?

The sub-fund considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the RBC Policy, ESG Integration Guidelines, and Engagement and Voting Policy which include the following provisions :

- Exclusion of issuers that are in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment
- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts
- In case of equity holdings, voting at Annual General Meetings of companies the portfolio is invested in to promote good governance and advance environmental and social issues
- Ensuring all securities included in the portfolio have supportive ESG research
- Managing portfolios so that their aggregate ESG score is better than the relevant benchmark or universe

Based on the above approach, and depending on the composition of the sub-fund's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: <https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-B0ED-84FC06E090BF>

What were the top investments of this financial product?

Largest investments**	Sector	% Assets*	Country**
GERMANY (FEDERAL REPUBLIC OF) 2.30 PCT 15-FEB-2033	Government	1.77%	Germany

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From 01.01.2024 to 31.12.2024

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average based on the AUM.

The largest investments are based on official accounting data and are based on the transaction date.

* Any percentage differences with the financial statement portfolios result from a rounding difference.

** Any difference with the portfolio statements above are coming from the use of different data's sources.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments of the sub-fund is **48.6%**.

What was the asset allocation ?

The proportion of the investments of the sub-fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the sub-fund sub-fund is **91.4%**.

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

-The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

As at 29.12.2023, the figures were as follow:

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Sectors	% Asset
Financials	45.68%
Cash	12.70%
Industrials	9.18%
Consumer Discretionary	8.64%
Government	6.61%
Real Estate	4.59%
Communications	3.98%
Utilities	3.28%
Consumer Staples	1.85%
Materials	1.78%
Technology	1.14%
Health Care	0.74%
Derivatives	-0.17%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average based on the AUM.
The largest investments are based on official accounting data and are based on the transaction date.
This fund has no exposure to fossil fuel

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The investment manager uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information on BNPP AM the methodology and the providers used can be found here: <https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD>

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

- *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

☒ Yes:
☐ In fossil gas ☒ In nuclear energy
☐ No:

However, the weighted average of the proportion of such investments does not exceed 1%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

** Real taxonomy aligned

The graph "Taxonomy-alignment of investments excluding sovereign bonds" represents 93.39% of the total investments

● What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

	Revenue	Capex	Opex
2022*	0.9%	/	/
2023**	3.2%	/	/
2024**	6.4%	8.4%	5.9%

*Figures reported in 2022 were calculated on the closing date of the accounting year
Figures reported in 2023 and 2024 are expressed as a quarterly weighted average.

*** Figures reported in 2024 are expressed as a quarterly weighted average based on the AUM.

**

The proportion of taxonomy-aligned economic activities in CapEx or OpEx are not disclosed in 2022 and 2023 given the level of data at the disposal of the investment manager related to such information.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **33.9%**.

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the sub-fund will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Socially sustainable investments represent **14.3%** of the sub-fund .

What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments includes the proportion of assets that do not attain the following standards established by the investment manager: 1) a positive ESG score and either a positive E score or a positive S score or 2) being Sustainable Investment according to BNPP AM ESG proprietary methodology or instruments which are mainly used for liquidity, such as cash and cash equivalent assets and/or efficient portfolio management, and/or hedging purposes. Those investments are made in compliance with our internal processes, including the risk management policy and the RBC policy when applicable as minimum environmental or social safeguards. The risk management policy comprises procedures as are necessary to enable the assessment for each financial product of the exposure of that product to market, liquidity, sustainability and counterparty risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

- The sub-fund shall comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labor rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.
- The sub-fund shall systematically integrate relevant ESG factors in line with its investment strategy into its investment analysis and decision-making processes.

- The sub-fund shall have at least 90% of its assets (excluding ancillary liquid assets) covered by the ESG analysis based on the ESG internal proprietary methodology.
- The sub-fund's investment universe shall be reduced by a minimum of 20% due to exclusion of securities with low ESG score and/or sector exclusions as per the RBC Policy.
- The sub-fund shall have the weighted average ESG score of its portfolio higher than the weighted average ESG score of its investment universe.
- The sub-fund shall invest a proportion of its assets in "sustainable investments" as defined in Article 2 (17) of the SFDR regulation
- The exclusions covered by the investment manager's exclusion policy applies, being (1) Issuers that breach the principles of the UN Global Compact (UNGC), (2) Issuers involved in the manufacture or product life cycle of controversial weapons (such as but not limited to chemical weapons, cluster munitions and landmines); (3) Issuers deriving a certain percentage of their revenue from the production of tobacco or from other type of involvement in the life cycle of tobacco products such as distribution or licencing activities; (4) Issuers that derive a certain percentage of their revenue from thermal coal extraction and/or arctic drilling; and (5) Issuers that contravene the UNGC labourrelated principles and International Labour Organisation's ("ILO") broader set of labour standards.

In addition, the investment manager has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: [Sustainability report](#)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

● *How does the reference benchmark differ from a broad market index?*

Not applicable

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

● *How did this financial product perform compared with the reference benchmark?*

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CoRe Series - Invesco Pan European High Income FAM Fund Legal entity identifier: 2549002VR791XMX4YT45

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☒ ☐

Yes

☐ It made **sustainable investments with an environmental objective:** _____ %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _____ %

☒ ☐ ☒

No

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Sub-Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact’s principles, based on third-party data and the Investment Manager’s proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The reference period for data reported in this document was from the 4th of March 2024 to the 31st of December 2024. The data is representative of the reference period unless specified otherwise.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social

characteristics. This included:

Sustainability Indicator	Indicator description	Indicator performance
Exclusions with regards to companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the Non-Proliferation Treaty	Companies that generate any of their revenue from controversial weapons were excluded	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Level of involvement in Coal extraction and production.	Companies that generate $\geq 5\%$ of revenue from thermal coal extraction or $\geq 10\%$ of revenue from Thermal Coal Power Generation were excluded	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Level of involvement in Unconventional Oil and Gas such as arctic oil and gas exploration extraction, oil sands extraction and Shale Energy extraction;	Companies that generate $\geq 5\%$ of revenue from unconventional Oil and Gas were excluded (i.e. arctic oil & gas exploration, oil sands extraction, or shale energy extraction)	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Level of involvement in Tobacco production and tobacco related products;	Companies that generate $\geq 5\%$ of revenue from Tobacco products production or Tobacco related products and services were excluded Companies that generate $\geq 15\%$ of revenue from Tobacco Products Overall were excluded	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Level of involvement with recreational cannabis;	Companies that generate $\geq 5\%$ of their revenue from recreational cannabis were excluded	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Companies excluded as being in violation of any UN Global Compact's principles	All non-compliant companies were excluded	During the reference period, there were no active breaches of the Fund's exclusion criteria.

Additionally, the Investment Manager also complied with the Management Company's exclusion list which was based on the Management Company's exclusion policy and compiled by the Management Company.

Exclusions applied on a continuous basis during the reference period.

● **...and compared to previous periods?**

NA

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

NA

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

NA

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption

and anti-bribery
matters.

NA

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

NA

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impacts on sustainability factors by carrying out a qualitative and quantitative review of key metrics (being the mandatory indicators defined in Table 1 of the Annex I of the regulatory technical standards for SFDR and any applicable additional indicators). The Fund identified priority investee entities using thresholds on each principal adverse impacts indicator and engaged through methods such as letters, meetings, proxy voting. If no improvement was established through such corporate engagement, then the Fund proceeded to divest and/or exclude investments.

The below table shows the fund level PAI scores

Adverse sustainability indicator	PAI	Data	Metric
Greenhouse gas emissions	1.GHG Emissions	25,157.39	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		3,883.36	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		225,056.60	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		254,097.35	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	653.38	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,307.43	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	2.16	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	60.50	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	36.34	
	6. Energy consumption intensity per high impact climate sector		Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	
	Construction	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	1.88	
	Manufacturing	0.41	
	Mining & Quarrying	0.93	
	Real Estate Activities	0.56	
	Transportation & Storage	1.22	
	Water Supply, Sewerage, Waste Management & Remediation Activities	0.63	
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	6.25	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	3.06	Tonnes of hazardous waste and radioactive waste generated by investee companies

DECEMBER 31, 2024

			per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	24.29	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	23.49	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	38.74	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 4th of March 2024 to the 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
UCGIM FLT 12/31/2049	Financials	1.25%	Italy
SANTAN FLT 49	Financials	0.78%	Spain
SANOFI	Health Care	0.70%	France

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of
investments in specific
assets.

NA

● **What was the asset allocation?**

95.10% of the Fund's portfolio was aligned with the environmental and or social characteristics (on average over the reference period). 4.90% of the portfolio was Cash & Derivatives and was not aligned with the environmental and or social characteristics, on average over the reference period.

● **In which economic sectors were the investments made?**

The below table shows the sectors that the fund holdings are invested in:

Sector (GICS)	Weight %
Financials	32.02
Communication Services	8.78
Consumer Discretionary	10.58
Information Technology	3.42
Industrials	6.19
Consumer Staples	7.69
Energy	5.15
Real Estate	2.69
Health Care	5.68
Materials	5.09
Utilities	6.09
Sovereign	1.72
Others/Derivatives	4.90
Total	100.00

Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.91
10102010	Integrated Oil & Gas	2.32
10102020	Oil & Gas Exploration & Production	1.03
10102030	Oil & Gas Refining & Marketing	0.89
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		5.15

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the Fund's portfolio was aligned with the EU Taxonomy.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

● **What was the share of investments made in transitional and enabling activities?**

NA

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

NA

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

NA

What was the share of socially sustainable investments?

NA

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" investments include the remaining investments which were neither aligned with the environmental and social characteristics, nor are qualified as sustainable investments. They were investments that were treated as neutral, such as cash and money market instruments and derivatives used with the aim of reducing risk (hedging) or efficient portfolio management purposes. They may have been excluded from the Sub-Fund's ESG exposure calculation.

~4.90% reflects Cash & Derivatives for the whole portfolio on average over the reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

See Second Question of the Report.

How did this financial product perform compared to the reference benchmark?

NA

● ***How does the reference benchmark differ from a broad market index?***

NA

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

NA

● ***How did this financial product perform compared with the reference benchmark?***

NA

● ***How did this financial product perform compared with the broad market index?***

NA

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**Product name:** CoRe Series - FAM Sustainable (the “Sub-Fund”)**Legal entity identifier:** 213800VAU6995BQI8X17**Environmental and/or social characteristics****Did this financial product have a sustainable investment objective?****Yes****No**It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73.62 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments***Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2024 (1 January 2024 – 31 December 2024).***To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included:

a. Minimum investment in funds in scope of Article 8 and 9 of the SFDR

The Sub-Fund invested 98.15% in Underlying Funds which fall within the meaning of either Article 8 or Article 9 of the SFDR, which means, that the majority of the Underlying Funds which the Sub-Fund held promoted environmental and social characteristics while investing in companies which follow good governance practices.

b. Positive Screening

Consideration of ESG factors was a key element of portfolio construction/fund selection. Portfolio managers took a holistic approach which included the analysis of ESG factors as part of their overall risk adjusted valuation assessment. This supported the overall promotion of investment in funds which the Manager deems desirable on ESG grounds. By incorporating positive ESG factors as part of the overall portfolio construction/fund selection, the Sub-Fund through its investments, supported a tilt towards investment in Underlying Funds that have a more positive impact on the environment or society at large.

c. Fund Level ESG Scoring

A monthly independent analysis and classification of the Sub-Fund's ESG score was performed internally by the Manager. A minimum ESG score of "A" was applied at Fund level to ensure that the Sub-Fund's ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund Level ESG score and promoted engagement and challenge of portfolio managers on ESG topics.

d. Negative Screening (Norm-based exclusions)

For any direct holdings the Manager applied norms-based exclusions. The Manager wanted its funds under management to avoid making any investments which the Manager or its clients might deem incompatible with minimum responsible investing principles. To align the Sub-Fund's investments with this sustainable investment approach, the Manager adopted a firm wide exclusion policy which screens all investments for their compliance with minimum international standards and norms, from which an Exclusion List is derived.

Exclusion categories considered in the Exclusion Policy were:

- ☐ United Nations Global Compact Principles
- ☐ Controversial Weapons
- ☐ Tobacco
- ☐ Climate Change
- ☐ Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund;

- i. the percentage of the Sub-Fund's Underlying Fund holdings rated A or above by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 98.15% of holdings for 2024.

● ***...and compared to previous periods?***

Historical comparison of sustainability indicators	FY 2022	FY 2023	FY 2024
The percentage of the Fund portfolio made in sustainable investments	99.72%	99.77%	98.15%

Please be informed that the difference between the percentages of sustainable investments disclosed between 2022 and 2023 partially relies on an update to the third party data provider's sustainable investments calculation methodology which the Manager relies on as follows:

As of 7 June 2023, MSCI updated their Sustainable Investment calculation methodology. An extra metric has been added to the positive contribution category, that includes companies with a carbon emissions reduction target approved by the Science Based Targets initiative ("SBTi"). SBTi is a partnership between CDP, the United Nations Global Compact, the World Wildlife Fund for Nature (WWF) and the World Resources Institute (WRI). Other frameworks for measuring and comparing GHG reduction targets exist (including those developed by MSCI ESG Research), however, SBTi is currently the most commonly used framework to assess the aggressiveness of GHG emission reduction targets required under international treaties. As a result, the Manager implemented this new metric, into its sustainable investment calculation methodology.

Link to Managers SI methodology is per below:

<https://finecoassetmanagement.com/wp-content/uploads/2023/09/FINECO-AM-Sustainable-Investment-Methodology.pdf>

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Please note that the Sub-Fund currently follows a fund of funds investment approach and can invest principally in underlying open-ended UCIs and UCITS (as well as other permissible instruments). The Management Company therefore

relies on data provided by the investment managers of the underlying fund investments when calculating the percentage proportion of sustainable investment of the Sub-Fund and when calculating the percentages required in the section below dealing with the asset allocation of the Sub-Fund.

The objectives of the sustainable investments that the Sub-Fund made was to promote environmental and/or social characteristics. On the basis that the Sub-Fund is currently following a fund of funds investment approach, the objectives of the sustainable investments that the Sub-Fund partially intends to make is linked to the sustainable investments made by the Underlying Funds. The Sub-Fund sought to make investments in Underlying Funds that committed/partially committed to invest in sustainable investments and who had a process for ensuring that their sustainable investments met the following criteria:

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Sub-Fund allocated between Underlying Funds which make sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Sub-Fund did not favour any specific type of sustainable investment.

In 2024, the Sub-Fund had a proportion of 73.62% of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund made did not cause significant harm to any environmental or social sustainable investment objective based on the policies adopted by the relevant Underlying Fund investment managers. These policies were considered as part of the Manager's initial and ongoing investment due diligence procedures and were assessed for alignment with the indicators set out in Table 1 and any relevant additional indicator from Tables 2 and 3 of Annex I of the Delegated Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impact ("PAI") indicators were calculated at both the Sub-Fund level and the Underlying Fund level. The results were compared with that of a chosen proxy benchmark representative of the Sub-Fund's investment universe and/or peers. These calculations were used as the basis

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where Manager could engage with Underlying Fund investment managers to improve at the Underlying Fund level.

The Sub-Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators;

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators - Environment;

15. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators - Social;

16. Lack of a human rights policy

Sovereign mandatory indicator:

17. GHG intensity

18. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Sub-Fund made in the Underlying Funds and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways:

- a. Via PAI monitoring of the following indicators, there we no violation of;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;and
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- b. Through engagement with the Underlying Fund investment managers to ensure that the sustainable investments that the Underlying Funds made are:
 - Made in investee companies that demonstrate good governance;
 - Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and

- Made in investee companies that make a positive contribution towards an environmental or social objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Sub-Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Sub-Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Sub-Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas

8. Emissions to water

9. Hazardous waste ratio

10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises

12. Unadjusted gender pay gap

13. Board gender diversity

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators - Environment;

15. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators - Social;

16. Lack of a human rights policy

Sovereign mandatory indicator;

17. GHG intensity

18. Investee countries subject to social violations

More detailed information on the manner in which the Manager considered principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

Largest Investment	% of Asset	Sector	Country
Microsoft Corporation	4.48	Systems Software	United States
Amazon.com, Inc.	2.77	Broadline Retail	United States
Alphabet Inc. Class A	2.55	Interactive Media & Services	United States
NVIDIA Corporation	2.06	Semiconductors	United States

Tesla, Inc.	0.91	Automobile Manufacturers	United States
Schneider Electric SE	0.86	Electrical Components & Equipment	France
Broadcom Inc.	0.47	Semiconductors	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 – 31 December 2024

What was the proportion of sustainability-related investments?

73.62%

● *What was the asset allocation?*

98.15% of the Sub-Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Sub-Fund also committed to a minimum proportion of 40% in sustainable investments and the Sub-Fund had a proportion of 73.62% of sustainable investments. The remaining investments of the Sub-Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate underlying fund manager data and/or company or third-party data.

Asset allocation describes the share of investments in specific assets.

Historical comparison of the asset allocation for Article 8	FY 2022	FY 2023	FY 2024
#1 Aligned with E/S characteristics	99.72%	99.77%	98.15%
#2 Other	0.28%	0.23%	1.85%
#1A Sustainable	62.62%	74.43%	73.62%
#1B Other E/S characteristics	37.10%	25.34%	24.52%
Other environmental	40.20%	42.76%	56.40%
Social	39.72%	39.44%	29.01%

● *In which economic sectors were the investments made?*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Sub-Fund's portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Sub-Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation" ) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities for both 2022 and 2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 56.40%. The fund did not have Taxonomy aligned commitment.

What was the share of socially sustainable investments?

Socially sustainable investments represented 29.02% of the financial product.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a minimum investment in funds in scope of Article 8 and 9 of the SFDR, Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Sub-Fund invested 73.62% its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question *“What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?”*.

The Sub-Fund invested 98.15% in Underlying Funds which fall within the meaning of either Article 8 or Article 9 of the SFDR, which means, the majority of the Underlying Funds which the Sub-Fund held promoted environmental and social characteristics while investing in companies which follow good governance practices.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.
