GLOBAL EXPOSURE (UNAUDITED)

The method used to calculate the global exposure is the commitment approach for all the Sub-Funds except for the Sub-Fund EURIZON INVESTMENT SICAV - Euro Equity Insurance Capital Light, EURIZON INVESTMENT SICAV - Flexible Beta 10, EURIZON INVESTMENT SICAV - Flexible Plus 8, EURIZON INVESTMENT SICAV - Flexible Plus 12, EURIZON INVESTMENT SICAV - Flexible Plus 13 and EURIZON INVESTMENT SICAV - Multiasset Risk Overlay Moderato for which the method used is the absolute Value at Risk ("VaR").

	Historical VaR (1m, 99%) 01/01/2024 - 31/12/2024			Leverage Sum of Notionals 01/01/2024 - 31/12/2024	
Sub-Funds	**Min**	**Max**	**Average**	**Average**	**Expected Leverage**
EURIZON INVESTMENT SICAV - Euro Equity Insurance Capital Light	6,70%	11,27%	8,69%	114,63%	450,00%
EURIZON INVESTMENT SICAV - Flexible Beta 10	1,49%	2,90%	2,25%	151,02%	450,00%
EURIZON INVESTMENT SICAV - Flexible Plus 8	2,95%	5,71%	4,03%	183,53%	450,00%
EURIZON INVESTMENT SICAV - Flexible Plus 12	2,41%	11,36%	5,81%	200,87%	450,00%
EURIZON INVESTMENT SICAV - Flexible Plus 13	2,99%	8,55%	5,95%	344,27%	450,00%
EURIZON INVESTMENT SICAV - Multiasset Risk Overlay Moderato	2,11%	3,09%	2,50%	113,89%	N/A[(1)]

[(1)] Last NAV was calculated on 23 January 2025.

REMUNERATION POLICY (UNAUDITED)

The Remuneration Policy of Eurizon Capital S.A. (hereinafter also referred as the "Company") is based on the principles applied in the Intesa Sanpaolo Group including:

– alignment with the interests of shareholders, customers and their assets under management, the medium and long term strategies and objectives, under a framework of reference rules aimed at avoiding conflict of interests, and at the proper control of current and future business risks and ensuring an adequate level of liquidity and capitalization;

– consistency with and promotion of sound and effective risk management and discouragement of risk-taking which is inconsistent with the risk profile, rules or instruments of incorporation of the assets managed;

The Remuneration Policy has been prepared on the basis of the Intesa Sanpaolo Group's remuneration policies and, for what is not in conflict, not governed or more restrictive, in compliance with European and national regulations governing the asset management industry:

– the Law of 12 July 2013 on alternative investment fund managers (transposing the EU Directive 2011/61/EU - the AIFM Directive), and

– the Law of 17 December 2010 relating to undertakings for collective investment (transposing the EU Directive 2014/91/UE - the UCITS V Directive).

Governance Structure

All incentives and reward systems for the Company's personnel are subject to the following types of conditions:

– activation conditions for the Group and the Company, consisting of liquidity, capitalisation and financial parameters;

– financing conditions of the mechanism of bonus funding for the Group and the Company, according to a top-down approach such as to take into account the exceeding of certain liquidity, capitalisation and financial parameters, in the first place at the level of the Group and, therefore, of the Company;

– individual access condition, meaning the level of achievement of the individual performance objectives, subject to the verification of the absence of individual compliance breaches. The individual performance objectives include financial as well as non-financial criteria.

The Board of Directors of the Company establishes and reviews annually the Remuneration Policy of the Company and ensures consistency with the overall policy of the Company in terms of risk-taking, the strategy and long-term, corporate governance structure and internal control objectives. It involves the Conducting Officers, each for their own responsibilities, in the definition and implementation of the Remuneration Policy.

The Company decided to entrust the Independent Directors Committee with the advisory and consulting functions aimed to support the Board of Directors in all activities relating to remuneration, defined in accordance with the principles set out in the ESMA Guidelines on sound remuneration policies (ESMA 232/2013 and 411/2016). The Committee is entirely composed of independent members. External persons can still participate in the meetings of the Committee in relation to specific items.

The internal process related to the governance of remuneration involves the Human Resources, the Risk Management, the Compliance and the Operations & Finance departments, each under the supervision of the respective Conducting Officer.

The Corporate Control Functions verify, for each area of competence (Risk Management, Compliance, Internal Audit), the alignment of the remuneration practices with the approved policy and the applicable regulations.

The ex-ante annual independent internal review of the remuneration system concluded its design to be appropriate.

Compensation Structure

The compensation of personnel includes:

– Fixed component, defined on the basis of the contractual category, the role held and the extent of responsibilities, reflecting the experience and skills required, as well as the quality of the contribution to corporate results;

– Variable component, linked to employee's performance and aligned with the annual results actually achieved and the risks prudentially assumed.

The criteria for the definition of the Company incentive systems, in application of the Intesa Sanpaolo Group's remuneration policies, aimed at ensuring the correlation between remuneration, performance and risks are, among others:

– the measurement of performance from multiple perspectives in order to align the management and employees behaviour to medium and long term strategic drivers, both quantitative (profitability, growth, productivity, cost of risk / sustainability) and qualitative (strategic actions or projects and managerial quality), on different perimeters (Group / Structure / Individual);

– the principle of selectivity, by differentiating the best performances and assigning higher bonuses;

– the principle of financial sustainability, by the definition of a bonus pool correlated to the performance of a Group parameter, currently identified as Income before tax from continuing operations and the use of a solidarity mechanism, according to which the amount of total bonuses paid to the employees of each Business Unit depends in part on the Group's overall performance (reflected in the size of the bonus pool) and in part on the degree of expected contribution to the Group's results;

– the definition of target bonus for roles and professional clusters to be used across all Group, in order to guarantee internal balance and the ongoing benchmarking between roles and/or professional clusters Group target bonuses and external market practices;

– the verification of the so-called individual compliance breaches as a restriction to bonus accrual (disciplinary measures, serious findings received from the Bank's control functions, sanctions by the Supervisory Authorities).

Vesting of the variable remuneration for Risk Takers is governed by specific rules in terms of:

– Deferral mechanisms

– Payment partly in cash and partly in instruments and retention period for Shares/Units of funds;

– *Ex-post* adjustment mechanisms - *malus* or clawback.

Compensation for 2024

In accordance with the Law as of 17 December 2010 on Undertakings for Collective Investments (as subsequently amended) in conjunction with the guidelines on sound remuneration policies under UCITS published by the European Securities and Markets Authority (ESMA), the Company has identified individuals who have a material impact of the Company's risk profile (Material Risk Takers).

The regulations provide rules in relation to the variable component of the compensation of Risk Takers, indicating that:

– at least 40% of the variable component (60% for significant bonuses) must be subject to deferred payment for a period of 3 years (5 years for significant bonuses);

– a substantial portion (at least 50%) is paid out in Shares/Units of funds managed by the Company, or equivalent instruments; said percentage is applied, in the same proportion, to both the deferred and upfront portions of the variable component;

– there is a specific holding period (of no less than 2 years for the upfront component, and shorter for the deferred portion) for the vesting of the financial instruments referenced above.

In case the Variable Compensation is lower than EUR 80 000, the Material Risk Takers receive their entire Variable Compensation in cash without any deferral.

The following aggregate compensation has been paid by the Company to its Material Risk Takers and Other Staff in 2024 (in EUR) in relation to all its activities:

Number of employees on an annual average: 79,5
Total Compensation: 11 132 703
Fixed Pay: 9 354 734
Variable Compensation: 1 777 969
Total Compensation for Material Risk Takers (including Senior Management): 2 936 807
Total Compensation for Other staff: 8 195 896

In addition to the compensation paid by the Company to its Material Risk Takers and Other Staff, as reported above, the aggregate remuneration paid to its own staff by the Investment Managers delegated by the Company to manage the Sub-Funds of the SICAV has been estimated at EUR 9 554 750,00 based on the latest available annual accounts of those companies.

BOARD OF DIRECTORS OF THE SICAV'S REPORT ON THE MANAGEMENT OF THE SICAV

Dear Shareholders,

Please find below the report of the board of directors on the activities of the SICAV for the financial year ended on 31 December 2024.

1. Market overview

During the reference period (1 January 2024 – 31 December 2024), financial markets generally exhibited a positive trend. The macroeconomic context revealed a divergence between the United States and the Eurozone. In the U.S., the economic cycle outperformed expectations, and while inflation declined, its trajectory was less consistent. Conversely, the Eurozone experienced weaker growth, with inflation showing a more pronounced convergence toward the 2% target. Against this backdrop, the major Central Banks initiated a cycle of interest rate cuts, albeit with variations in timing and approach.

More specifically, in the United States, total inflation ended the first quarter at 3.2%, reflecting a decrease compared to the level recorded at the end of 2023. Core inflation (excluding the more volatile components of food and energy) also declined, reaching 3.8%, slightly below the 4% observed during the final months of 2023. Notably, it was the monthly trends in both total and core inflation that drew significant attention. In fact, monthly price growth ranged between 0.3% and 0.4% throughout the first quarter. Within this context, monetary policy expectations underwent a normalization, with markets gradually aligning to the outlook presented by Central Banks, most notably the Federal Reserve (the "Fed"), which had announced three rate cuts for 2024 in December 2023. At its March meeting, the U.S. Central Bank left interest rates unchanged and reaffirmed its commitment to implementing three rate cuts. This decision came despite marginal resilience in inflationary trends and robust macroeconomic data, particularly in employment dynamics. In the Eurozone, inflation exhibited a more pronounced downward trend, with the overall rate declining to 2.6% and core inflation reaching 3.1%. Despite the more consistent decline in European inflation and a weaker macroeconomic environment compared to the U.S., the European Central Bank ("the "ECB") made no changes to monetary policy during the quarter, deferring the anticipated start of rate reductions to June. The geopolitical context remained marked by ongoing tensions in Ukraine and the Middle East, yet their impact on financial markets was minimal. Similarly, the elections in Taiwan and Russia did not provoke significant reactions in the financial markets. The Chinese Communist Party congress set a growth target of 5% for 2024; however, the stimulus measures introduced by Beijing were deemed insufficient by investors.

In the second quarter, U.S. inflation data showed signs of moderation compared to the first part of the year. Notably, the data for April and May reflected a return to the downward trend. From this point of view, June proved to be a particularly significant month. On one hand, inflation slowed more than expected in both the total and core components on a monthly basis. On the other hand, the Fed revised its monetary policy projections (the "dot plot"), delaying most of the anticipated rate cuts until 2025 and signalling only a single rate reduction for 2024. In Europe, inflation data continued to follow a more consistent downward trajectory, prompting the ECB to implement its first rate cut of 25 basis points at the June meeting. However, this initial rate reduction did not lead to a radical shift in the monetary policy stance, which remained firmly tied to the performance of macroeconomic data, particularly inflation. In addition to the macroeconomic data, the elections for the renewal of the European Parliament were also closely watched by market participants. However, the outcome had little impact on the markets, as the outgoing majority was largely reconfirmed. Most of the political

turmoil occurred in France, where, following strong opposition from various parties, President Macron dissolved the chambers early and called for new elections. This led to increased volatility in French assets, with some spill-over effects on other European countries. However, the volatility gradually subsided as the election results indicated a diminished likelihood of a strong showing by parties with more extreme positions.

The third quarter was marked by the continued consolidation of the downward trend in U.S. inflation, while European inflation accelerated its decline, ending the period below the ECB's reference target. In the U.S., annual inflation dropped to 2.5% in the overall figure, its lowest level since February 2021. Meanwhile, core inflation remained more stable at 3.2%, to its lowest levels since April 2021. In Europe, inflation fell significantly to 1.8% (below the ECB target of 2%), while core inflation reached 2.7% year-on-year. The widespread decline in commodity prices, particularly energy prices, helped ease inflationary pressures, with oil finishing the quarter around $70 per barrel. Alongside the declining inflation, a slight weakening of the U.S. labour market and a deterioration of the overall macroeconomic outlook in Europe prompted Central Banks to reduce interest rates. The ECB introduced the second deposit rate cut of 25 basis points, after the one made in June, bringing it from 3.75% to 3.5%. In the U.S., the Fed initiated monetary easing policy with a first 50 basis point cut, which brought rates to 5%. Among the major Central Banks, the Bank of Japan stood in contrast, announcing a rate hike at the end of July to address rising inflationary pressures. This unexpected rate hike triggered significant volatility in the markets, but the turbulence gradually subsided as global growth began to stabilize. In Europe, France completed the formation of its new executive. However, the weakness in the political landscape, coupled with concerns over budgetary data, was reflected in the French ten-year spread compared to Germany, which rose back to around 80 basis points. In the U.S., the race for the presidency saw President Biden step down, significantly disadvantaged in the polls, in favour of his vice president, Kamala Harris. In China, policy-makers shifted their approach to stimulating the economy. The Chinese Central Bank implemented a significant rate cut, while central authorities announced, though not yet formalised, a fiscal expansion plan aimed at achieving the 5% growth target.

The fourth quarter was marked by the consolidation of a slight macroeconomic divergence between the U.S. and the Eurozone. In the U.S., total inflation closed the quarter at 2.7%, while core inflation stabilised at 3.3%. The average monthly increase was around 0.3%, indicating that, despite an underlying downward inflation trend, monthly price growth remained steady, and progress toward the 2% target slowed somewhat. This was further compounded by a job market normalizing to pre-pandemic levels, along with an overall macroeconomic picture where service-related sectors played a key role in supporting U.S. growth. The strong Republican performance in the November election led investors to quickly price in Trump's economic agenda, which included tax expansion, new tariffs, deregulation, and a focus on immigration control. The Fed's reaction to a stronger-than-expected macro picture resulted in two 25-basis-point rate cuts during the quarter, while forecasts for 2025 cuts were sharply reduced. In contrast, in Europe, inflation ended the quarter around 2.3% for the overall figure, while the core component stood at approximately 2.7%. The macro framework in the Eurozone remained weaker than in the U.S.. This was further compounded by political difficulties in both France and Germany. In France, a new government was formed following the July administration, with the primary goal of passing the new budget law. Meanwhile, in Germany, the political crisis led to the dissolution of parliament, with new elections scheduled for February. In this context, the ECB made two further rate cuts of 25 basis points, expecting to bring inflation back to the 2% target by 2025. European weakness was partly linked to the challenges faced by the Chinese economy. During the quarter, China announced a significant fiscal stimulus plan to support its economy, which has been struggling to meet the expected 5% annual growth target.

Analysing the performance of financial markets in the first half of 2024, within a macroeconomic context where growth showed resilience and inflation returned more slowly than expected toward the Central Banks' targets, government bond yields rose across both the short and long ends of the yield curves. As the reference period continued, however, in response to the strengthening downward trend in inflation and the shift in monetary policy by the major central banks, interest rates began to decline again. This movement was more pronounced at the short end of the yield curves. In the final part of the reference period, however, U.S. rates rose, a trend that also impacted European rates, though to a lesser extent. The markets, in fact, began to price in the potential impact of Trump's victory, anticipating a highly expansive economic agenda that could potentially slow down the rate reduction path pursued by the Fed. These concerns were further amplified by the Fed itself, which, in its final meeting of the year, made an additional rate cut of 25 basis points but indicated it was prepared to slow the pace of rate reductions in 2025. This decision was based on the strength of the recovery, the tightness of the labour market, and, crucially, the deceleration in the decline of inflation.

Overall, the U.S. 2-year interest rate closed the year at 4.24%, remaining at the same level as the previous annual close. Meanwhile, the 10-year rate increased from 3.88% to 4.57%, resulting in a positively sloped yield curve, where long-term rates were higher than short-term rates. In Europe, the German 2-year rate fell from 2.40% to 2.08% whereas the ten-year rate increased from 2.02% to 2.37%. Within the peripheral component, the spread of the 10-year Italian rate compared to the German one decreased from to 168 basis points 115.

Within this scenario, the global bond market showed a positive performance of 0.2% in local currency and 2.8% in EUR (JPM Global index). Concerning individual geographical areas, the Eurozone closed the reference period with the JPM Emu index up 1.8% and the United States (JPM USA index) recorded a gain of 0.7% in local currency and 7.4% in EUR. Emerging markets (JPM EMBI+ index) outperformed developed countries, with a positive change of 7.7% in local currencies and 14.8% in EUR.

Turning to the stock markets, they showed a positive trend, benefiting from good corporate earnings dynamics and a still favourable macroeconomic environment. Additionally, the initiation of rate cuts by Central Banks, coupled with the absence of a significant slowdown in growth dynamics, provided further support. However, the pace of the rate reductions was slower than initially anticipated. During the summer months, there was an increase in volatility, leading to some downward phases; however, these declines were quickly reversed within short time horizons. In October, driven by expectations of a pro-business tax policy and deregulation across various economic sectors in the event of a Trump victory, the U.S. stock market continued its upward trajectory. Meanwhile, European and Asian markets, particularly the Chinese market, were weighed down by concerns over the potential implementation of a new trade tariff policy. In the final part of the reference period, Trump's victory and the Republicans' acquisition of a majority in both the House and Senate provided additional support for U.S. stock indices. Meanwhile, European and emerging markets did not exhibit the same level of bullish sentiment, as they awaited clarity on the real impact of the new American administration's decisions, particularly regarding economic issues such as trade.

The global stock market recorded a gain of 21.0% in local currency (MSCI World index) and of 26.6% in EUR. At the level of individual geographical areas, the U.S. stock market (MSCI USA index) closed 2024 with a positive performance of 24.6% in local currency, and 32.9% when measured in euros. The European markets (MSCI EMU index) displayed a more modest bullish trend compared to the U.S. markets, recording a positive performance of 9.4%. The Emerging Markets region also posted a positive performance, with the overall area (MSCI Emerging Markets index) registering a recovery of 13.1% in local currency and 14.7% in EUR.

In the currency market, the EUR weakened by 6.3% against the U.S. Dollar and -4.6% against the British Pound, while it strengthened by 0.9% against the Swiss Franc and 4.5% against the Japanese Yen. Currency dynamics had a significant impact on the performance of non-Eurozone markets when converted into EUR.

2. Activity of the SICAV

Eurizon Investment SICAV was hit during the period by overall net outflows amounting to EUR 2.0 billion, mainly due to redemptions from insurance companies on its four money market products (-EUR 1.2 billion over the period). Eurizon Investment SICAV – Contingent Convertible Bonds was the best seller of the year, with net sales of EUR 349 million. The SICAV reports assets of EUR 13.0 billion at year end (-9.1% versus 31 December 2023). The number of its sub-funds decreased from 80 to 74 further to voluntary liquidation processes resolved upon by the Board of Directors in an effort to streamline the range of products offered by the SICAV.

All of the Sub-Funds and Share Classes are registered for offer and distribution in the Grand Duchy of Luxembourg and a number of the Sub-Funds and Share Classes are registered for distribution in Italy.

3. SICAV's Governance Statement

Board of Director - Composition:

As at 31 December 2024, the Board of Directors of the SICAV was composed as follows:

Name	Executive**	Non-executive	Independent non-executive	Length of service on Board
Mr. Marco **BUS***	X			8 years
Mr. Claudio **BUSSO**	X			2 years
Mr. Gabriele **MIODINI**		X		9 years

* Chairman of the Board of Directors

** Employed by the Management Company

Board of Directors – Board members

Mr. Marco BUS: *Marco Bus joined Eurizon Capital S.A. in 2016. He has spent his entire career in the financial industry within the Intesa Sanpaolo Group, starting on 1991 at Banca Fideuram in Milan. At the end of 1994 he moved to Intesa International Bank in Luxembourg. In 2004 Marco Bus was appointed General Manager of Intesa Sanpaolo bank and in 2008 he was appointed Chief Executive Officer. In 2014, he joined Banca IMI in Milan as Head of a Group project on HNWI. Marco Bus holds a degree in Political Sciences from "Università degli Studi di Genova" (Italy) and completed his education with several management training classes, among which the London Business School Corporate Finance Executive Program and at INSEAD (Fontainebleau - France) where he awarded the Certificate in Corporate Governance. Marco Bus is also Chairman of the subsidiaries of the Eurizon Group based in the Central European Countries and other SICAV based in Luxembourg and is also member of the Board of the Italian - Luxembourgish chamber of commerce. He serves as the Chairman of Eurizon Investment SICAV since 2016.*

Mr. Claudio BUSSO: *After his sudies in Economics and Law at the University of Economics and Commerce of Turin in 1993, Claudio started his career at Sanpaolo IMI (now Intesa Sanpaolo) in Turin as Responsible for the relation with Global Custodian. After an experience at Gestnord SIM (now Banca Patrimoni – Banca Sella Group) as Head of Back Office settlement, he joined the organisation department of Sanpaolo Asset Management (now Eurizon Capital SGR) in 2000 where he occupied various managerial roles. In April 2006, he joined Eurizon Capital S.A as Head of Organisation & Project Management Department. In 2021, he became conducting officer of Pramerica Management Company S.A. until the merger of the company into Eurizon Capital S.A. Claudio Busso is currently the Head of Operations and Finance Department of Eurizon Capital S.A. and serves as board member of various SICAV, including Eurizon AM SICAV and Eurizon Investment SICAV.*

Mr. Gabriele MIODINI*: Gabriele Miodini joined Eurizon Capital S.A. in 2015 as Head of Sales & Client Management in Luxembourg. In 2022, he moved to Eurizon Capital SGR S.p.A. in Milan as Head of International Business Development. Prior to that, he worked in London, Milan and Frankfurt in major International Financial Institution (Deutsche Bank, AXA IM, Ersel and Aviva Investors). Gabriele Miodini holds a degree in Economics from Bocconi University in Milan, an Executive MBA from SDA Bocconi/UCLA - Anderson Business School of Management - LA) and a specialization in Behavioral Finance from HARVARD University.*

Board of Directors - Role and responsibility:

The responsibility of the Board of Directors is governed by Luxembourg law. With respect to the annual accounts of the Fund, the duties of the Directors are governed by the law of 10 December 2010 on, inter alia, the accounting and annual accounts of undertakings for collective investment and by the law of 17 December 2010, as amended, relating to undertakings for collective investment.

Prior to each Board of Directors' meeting, the Directors receive detailed and timely information allowing them to be prepared for the items under discussion during the meeting. The Board receives reports from, amongst others, the Management Company, the Depositary Bank and the Statutory Auditor. The Directors take decisions in the interests of the SICAV and its Shareholders as a whole and refrain from taking part in any deliberation or decision which creates a conflict of interest between their personal interests and those of the SICAV and its Shareholders.

Board of Directors - evaluation:

Each member of the Board of Directors of the SICAV completes annually self-evaluation questionnaires focusing on its composition and its functioning in order to maintain good governance and help to prevent governance and organisational failures.

Board of Directors - Board meetings and committee

The Board of Directors of the SICAV meets quarterly and on ad hoc basis as required.

For certain sub-funds, the Board of Directors may appoint an Investors Advisory Committee when so specified in the Prospectus of the SICAV to gather investors' opinion regarding:

1. conflict of interests' situations with the Management Company, the Investment Manager(s) and/or any of the Shareholders of such sub-funds;

2. appointment or replacement of an Investment Manager or Investment Advisor;

3. significant changes to the Investment Policy and Objective or to the Investment Limits in such sub-fund.

4. Details of communication with shareholders during the financial year:

Notices detailing the changes to the SICAV made during the year were published in 2024 to inform investors.

- Publication of a notice on 05/02/2024, related to the following information:

Further to the reception of a significant redemption order on Eurizon Investment SICAV – Donatello 2, the Board of Directors considered that the size of the Sub-Fund was not sufficient to ensure an efficient management of the assets going forward. According to Article 35 of the Articles of Association of Eurizon Investment SICAV and considering the absence of further commercial potential for this product, the Board of Directors resolved then to liquidate the Sub-Fund, through a compulsory redemption of all its shares in issue. Therefore, the issue, conversion and redemption of shares of the Sub-Fund were suspended from 05 February 2024.

- Publication of a notice on 24/04/2024, related to the following amendments to the Prospectus dated April 2024:

Eurizon Investment SICAV – PB Flexible Macro

- From 27 May 2024, adoption of the following benchmark for designing the portfolio and measuring perfomance: 50% ICE BofAML Euro Government 1-3Y + 50% ICE BofAML Euro Corporate 1-3Y in order to better define its value proposition that is focusing on short term euro denominated bonds markets.

- Update of the Investment Policy with the possibility to invest in bonds or other instruments similar to bonds, as well as money market instruments, that do not have a rating awarded by at least one of the credit rating agencies established in the European Union and in Extremely Speculative instruments, up to 5% of the sub-fund's net assets and to invest up to 10% of the sub-fund's net assets in contingent convertible bonds (CoCos).

- renaming into "Eurizon Investment SICAV – PB Bond Aggregate EUR Short Term".

Eurizon Investment SICAV – Mercurio 3

- Change of the debt investment grade index component of the sub-fund's composite benchmark from "FTSE World BIG ex JPY ex MBS 1-5 Yrs hedged to Euro" to "FTSE Euro Broad Investment Grade 1-5 years Index in Euro";

- Correction of the denomination of the debt high yield index component of the sub-fund's composite benchmark from "FTSE High Yield Index hedged to Euro" to "FTSE US High Yield Index hedged to Euro" (no changes in the index composition).

5. Points for consideration at the annual general meeting:

The Board of Directors of the SICAV will convene the annual general meeting of the shareholders of the SICAV with the following agenda:

1) Board of Director's Report and Approved Statutory Auditor's Report for the fiscal year ended on 31 December 2024;
2) Approval of the annual accounts as at 31 December 2024;
3) Allocation of the net results;
4) Directors' discharge from liability;
5) Statutory appointments;
6) Miscellaneous.

6. Participation and voting rights of the SICAV in the Shareholders' Meetings

Eurizon Capital S.A., the Management Company of the SICAV, has adopted a set of procedures and measures aimed at:
− monitoring corporate events connected with the financial instruments held in managed portfolios, where required by the characteristics of the financial instruments that incorporate rights to be exercised;
− assessing the methods and times for any possible exercise of participating and voting rights, based on a cost-benefit analysis that also considers the objectives and investment policy of each managed portfolio;
− preventing or managing any conflict-of-interest situations that may arise from exercising of voting rights on behalf of managed assets.

In this context, Eurizon Capital S.A. endorses (i) the "Stewardship Code" promoted by the European Fund and Asset Management Association (EFAMA) in order to encourage, at a European level, the development of good corporate governance practices and (ii) the "Italian Stewardship Principles" for the exercise of administrative and voting rights in listed companies and the related Best Practice Recommendations defined by Assogestioni.

Eurizon Capital S.A. takes part, on behalf of managed assets, in the Shareholder meetings of selected companies with shares listed on international markets, considering the usefulness of participating in the interests of the managed assets and the possibility to impact decisions in relation to shares held with voting rights. Based on a cost/benefit analysis that takes into account the investment objectives and policies of the managed products, the Company has adopted preliminary and operating processes that differ for the exercise of voting rights, depending on whether the decision concerns resolutions of shareholders' meetings:
− considered more significant, based on one or more of the following criteria;
− for which Eurizon uses electronic voting (proxy voting).

Based on the above, Eurizon has defined the following criteria to identify meetings of the most significant shareholders:
− the holding of significant amounts of capital;
− the presence of situations in relation to which, in the interests of managed assets, it intends to (i) report on situations of particular interest, in defence of or supporting the interests of minority

shareholders; or (ii) support decisions referred to environmental, social and good corporate governance practices;
− the appointment of statutory auditors or board directors of companies listed in Italy based on list voting, representing minority shareholders;
− the presence of extraordinary transactions considered significant for the interest of managed assets, in order to support or oppose a proposed operation.

For more information regarding the voting activity please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at https://www.eurizoncapital.com/en/sustainability/stewardship-policy

7. Sustainability Policy

Eurizon Capital S.A. has adopted a Sustainability Policy that describes the financial instrument selection and monitoring methodologies adopted so as to include the sustainability risk analysis and management as part of its decision-making process on investments relating to collective asset management services and portfolio management and to the recommendations made within the investment advisory service ("Investment Process").
Along with these methodologies, the adoption of specific financial instruments selection processes is foreseen, which are appropriately calibrated based on the characteristics and objectives of the individual products managed, that take into account environmental, social and corporate governance (ESG) factors, and principles of Sustainable and Responsible Investments (SRI).
The criteria for selecting and monitoring issuers criteria based on ESG and SRI profiles integrate the traditional financial analysis of risk/return profiles of issuers that the Company takes into account when forming its Investment choices, in order to i) avoid environmental, social and governance conditions cause a significant, actual or potential, significant negative impact on the value of the investments of managed assets and ii) lever the capabilities of issuers to benefit from sustainable growth opportunities .
In accordance with applicable regulations, Eurizon Capital S.A. makes available to its clients/investors and other stakeholders the summary of the Sustainability Policy, and any relevant updates to it, on https://www.eurizoncapital.com/en/sustainability/sustainability-policy.

Pursuant to Article 11(2) of Regulation (EU) 2019/2088 (the "SFDR Regulation") and the related implementing regulations, the information on environmental and/or social characteristics related to each sub-funds categorised article 8 or 9 under SFDR are available in the Periodic Disclosure attached to this Annual Report.

Independent auditor's report

To the Shareholders of
Eurizon Investment SICAV
49, Avenue J.F. Kennedy
L-1855 Luxembourg

Opinion

We have audited the financial statements of Eurizon Investment SICAV and of each of its sub-funds (the "Fund"), which comprise the statement of net assets, the portfolio, the future contracts, the option contracts, the forward foreign exchange contracts and the swap contracts as at 31 December 2024, and the statement of changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 December 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

A member firm of Ernst & Young Global Limited

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and of each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.

A member firm of Ernst & Young Global Limited

Shape the future
with confidence

- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds (except for the sub-funds where a decision or an intention to close exists) to cease to continue as a going concern.
- In respect of sub-funds where a decision or an intention to close exists, we conclude on the appropriateness of the Board of Directors of the Fund's use of the non-going concern basis of accounting. We also evaluate the adequacy of the disclosures describing the non-going basis of accounting and reasons for its use. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé".
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Ernst & Young

1. GENERAL INFORMATION

EURIZON INVESTMENT SICAV, hereafter referred to as the SICAV, is an investment company with variable capital incorporated under the Luxembourg law, established for an unlimited period in the Grand Duchy of Luxembourg on 19 February 1997 in accordance with the Law of 30 March 1988 on undertakings for collective investment and the Law of 10 August 1915 on commercial companies, as amended.

The SICAV is subject to Part I of the Law of 17 December 2010 on undertakings for collective investment in transferable securities, as amended.

Eurizon Capital S.A. was approved as Management company on 1 March 2008.

Within each Sub-Fund of the SICAV, the Board of Directors of the SICAV may create different classes and sub-classes of shares based on the investor description (institutional or not), as well as a specific distribution policy, minimum subscription amounts, differing fee structures for issue, redemption, expenses or compensation, or other specific items. Shares in these classes and sub-classes will be exclusively in registered form.

Share Class I is an institutional accumulation Class.
Share Class ID is an institutional distribution Class.
Share Class R is a retail accumulation Class.
Share Class RD is a retail distribution Class.

The Sub-Funds which are active as at 31 December 2024 are listed below:

[(1)]The Sub-Fund EURIZON INVESTMENT SICAV - PB Flexible Macro was renamed EURIZON INVESTMENT SICAV - PB Bond Aggregate EUR Short Term on 27 May 2024.

The investment policy of the above mentioned Sub-Funds is detailed in the prospectus available at the registered office of the SICAV.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The SICAV keeps the books of each Sub-Fund in its respective currency and the financial statements are prepared in euro in accordance with the Luxembourg regulations relating to Undertakings for Collective Investment and in particular using the following rules:

a) Valuation of investment securities

Investment securities, including zero-coupon bonds and money market instruments quoted on an official stock exchange or on another regulated market are valued according to the last known Closing or Bid price at the time when the valuation is carried out, and, in the event of being quoted on several markets, according to the last known Closing or Bid price of the principal market.

Valuation of investment securities, including zero-coupon bonds and money market instruments, not quoted on an official stock exchange or on another regulated market is fixed in a reasonable way on the basis of the sale prices anticipated cautiously and in good faith or, in the absence of a market value, according to the probable value in the reasonable estimation of the Board of Directors of the SICAV.

The value of each investment in open-ended funds is based on the last known Net Asset Value on the Valuation Day.

b) Net realised profit / (loss) on sales of investments

Realised profits or losses made on the sales of investments are calculated according to the average weighted cost.

c) Cost of purchase of securities in portfolios

For securities in currencies other than the base currency of the Sub-Fund, the purchase price is calculated based on the closing exchange rates prevailing at the date of the purchase.

d) Formation expenses

Formation expenses are amortized over a period of five years.

e) Translation of items expressed in foreign currencies

Assets and liabilities in foreign currencies are converted into the base currency of the Sub-Fund at the closing exchange rates of the final day of the financial year.

Income and expenses in currencies other than the base currency of the Sub-Fund are converted into the base currency of the Sub-Fund at the closing exchange rates in force on the day of the transaction.

The resulting realised and unrealised profit or loss made on foreign exchange is included in the Statement of Changes in Net Assets; any unrealised profit or loss on cash positions, assets receivable and liabilities payable denominated in currencies other than the base currency of the Sub-Fund being recorded under the heading "Change in unrealised appreciation / (depreciation) on foreign currencies".

Exchange rates used as at year end for the translation of assets and liabilities denominated in foreign currencies are the following:

1 EUR = 1,672453731 AUD
1 EUR = 6,397163972 BRL
1 EUR = 1,489256169 CAD
1 EUR = 0,938421919 CHF

1 EUR = 36,615799453 TRY
1 EUR = 1,035500048 USD
1 EUR = 19,539885909 ZAR

f) Combined statements of the SICAV

The combined statements correspond to the sum of the statements of each Sub-Fund.

Cross Sub-Funds investments (where one Sub-Fund has invested in another Sub-Fund of the SICAV) and related inter-SICAV accounts have not been eliminated for presentation purposes of the combined statements. Cross Sub-Funds investments represent 0,47% of the Combined net assets with value of EUR 61 948 254,28 as at 31 December 2024. Excluding the cross Sub-Funds investments from the calculation, the combined net assets as at 31 December 2024 is EUR 12 980 203 329,41. Cross Sub-Funds investments are disclosed in the Portfolio as at 31 December 2024 for the respective Sub-Funds.

g) Income

Dividends are recognised on the date on which the Shares/Units concerned are quoted "ex-dividend", net of withholding tax. Interest is calculated on a pro rata temporis basis and recorded net of withholding tax.

Interest Income from debt securities is recognised daily on an accruals basis and includes the amortisation of premiums and accretion of discounts on a straight line basis.

h) Future contracts

Commitments related to future contracts are recorded off balance sheet and future contracts are valued according to the last available contract price.

Unrealised profits and losses on future contracts are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on future contracts".

Guarantee deposits and margin calls are recorded under the Statement of Net Assets under the headings "Other banks and broker accounts" and "Amounts due to brokers".

i) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at forward foreign exchange rate for the remaining period to run until maturity at the date of valuation.

Unrealised profits and losses are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on forward foreign exchange contracts".

j) Option contracts

Option contracts quoted on an official stock exchange or on another regulated market are valued according to the last known market price where the contracts were negotiated by the SICAV or, if there are several markets, according to the last known price of the principal market.

Option contracts not quoted on an official stock exchange or on another regulated market are valued at their last known market value or, in the absence of a market value, according to their probable market value in the reasonable estimation of the Board of Directors of the SICAV.

In the case of options on futures, no premium margin is required because here a daily profit and loss adjustment (variation margin) is made by the procedure known as "marking-to-market". The profit of one party to the contract is the loss of the other party. The resulting gains and losses are either debited or credited to the appropriate account on a daily basis via the mark-to-market process. Unrealised profits and losses are recorded in the Statement of Net Assets. The final valuation is made at the final settlement price of either the expiration date of the option or the day on which it was exercised.

Market value of option contracts is recorded in the Statement of Net Assets.

The variation of unrealised profits and losses on option contracts are recorded in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on option contracts".

k) Swap contracts

Swaps are, in general, contracts by which two parties commit themselves during a given period to exchange two flows, one in exchange of the other, determined on the basis of a nominal value. The flows may be linked to interest rate(s), exchange rate(s), share(s), index(es) or credit event(s).

Swap contracts are valued using the difference between the values of forecasted flows the counterparty is to pay to the Sub-Fund and those owed by the Sub-Fund to its counterparty.

Unrealised profits and losses on swap contracts are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on swap contracts".

All the Swap contracts are presented at clean price (except for inflation swap contracts, which are presented at dirty price), therefore the interests related to Swap contracts are recorded under the heading "Interest received/paid on swap contracts" in the Statement of Changes in Net Assets.

l) Basis of preparation

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment in transferable securities (UCITS) and with generally accepted accounting principles. The financial statements have been prepared on a going concern basis, using the last official/tradeable net asset value of the financial year (31 December 2024) with the exception of the Sub-Funds listed below, which have been prepared on a non-going concern basis, following the directors' decision

to terminate the Sub-Funds (refer to Note 18). For these Sub-Funds, the significant accounting policies set out below have been applied consistently with the exception that the carrying values of the remaining assets as at 31 December 2024 are presented at their estimated net realizable values and all liabilities are presented at their estimated settlement amounts.

Sub-Funds liquidated after 31 December 2024 (refer to Note 18):

1. EURIZON INVESTMENT SICAV - Multiasset Risk Overlay Moderato (liquidated on 23 January 2025)
2. EURIZON INVESTMENT SICAV - Dynamic 1 (liquidated on 27 January 2025)

m) Valuation of instruments in the Money Market Sub-Funds

As regards the valuation of the assets of the SICAV's Sub-Funds authorised as money market funds in accordance with Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds, such assets are valued by using mark-to-market method (means the valuation of positions at readily available close out prices that are sourced independently, including exchange prices, screen prices, or quotes from several independent reputable brokers) whenever possible.

When using mark-to-market method:

- such assets are valued at the more prudent side of bid and offer unless the asset can be closed out at mid-market;
- only good quality market data are used; such data are assessed on the basis of all of the following factors:

    - the number and quality of the counterparties;
    - the volume and turnover in the market of the asset of the money market fund;
    - the issue size and the portion of the issue that the money market fund plans to buy or sell.

The Net Asset Value of any Share Class in Sub-Funds authorised as money market funds shall be calculated at least daily and rounded to the nearest basis point or its equivalent when the Net Asset Value is published in a currency unit.

The following Sub-Funds have been identified as falling under the scope of the Money Market Fund Regulation (EU) 2017/1131 (the "Regulation") and accordingly fulfill the requirements of the Regulation:

Sub-Funds	Type of MMF	Impact on the pricing policy
EURIZON INVESTMENT SICAV - Euro Liquidity	Standard Variable NAV	No impact
EURIZON INVESTMENT SICAV - Euro Liquidity Short Term	Short-term Variable NAV	No impact
EURIZON INVESTMENT SICAV - Euro Treasury	Standard Variable NAV	No impact
EURIZON INVESTMENT SICAV - Euro Treasury Plus	Standard Variable NAV	No impact

n) Contingent assets

As at 31 December 2024, some of the Sub-Funds of the SICAV are involved in some collective legal actions ("Class Actions"). In the context of these procedures, these Sub-Funds could receive, with no certainty, compensations related to losses occurred in the course of previous financial years. As at 31 December 2024, the following procedures are pending:

Sub-Funds	Action name
EURIZON INVESTMENT SICAV - Flexible Equity Strategy 3	APPLE INC. PRUDENTIAL FINANCIAL, INC.
EURIZON INVESTMENT SICAV - Flexible Multiasset	BECTON, DICKINSON AND COMPANY VIATRIS, INC.
EURIZON INVESTMENT SICAV - Multiasset Risk Overlay Moderato	GENERAL ELECTRIC COMPANY (SEC FAIR FUND) FACEBOOK, INC. (N/K/A META PLATFORMS, INC.)
EURIZON INVESTMENT SICAV - PB Equity US	AILPHABET, INC. APPLE INC. THE KRAFT HEINZ COMPANY

As of 31 December 2024, some the Sub-Funds of the SICAV are involved in withholding tax reclaim procedures on the basis of the principles set forth in recent judgments by the European Court of Justice and other tax reclaims mechanisms. In this context, the Sub-Funds listed hereunder could recover, with no certainty, unduly levied withholding taxes on dividends in the following jurisdiction:

Sub-Funds	Country
EURIZON INVESTMENT SICAV - Euro Equity Insurance Capital Light	Belgium
EURIZON INVESTMENT SICAV - Flexible Equity Strategy 2	Belgium
EURIZON INVESTMENT SICAV - Flexible Multiasset	Belgium
EURIZON INVESTMENT SICAV - Multiasset Risk Overlay	Germany, Belgium
EURIZON INVESTMENT SICAV - Multiasset Risk Overlay Moderato	Belgium
EURIZON INVESTMENT SICAV - PB Bond Aggregate EUR Short Term	Germany
EURIZON INVESTMENT SICAV - PB Equity EUR	Germany, Belgium
EURIZON INVESTMENT SICAV - Flexible Equity Ethical Selection	Belgium
EURIZON INVESTMENT SICAV - Sustainable Equity Europe	Belgium
EURIZON INVESTMENT SICAV - Equity Europe ESG Leaders	Belgium

Further to a favourable judgment rendered on 26 February 2024 by the Tax Court of Second Instance of Abruzzo (Italy), the reclaimed amounts related to unduly levied withholding taxes on dividends perceived from Italian companies for the period 2014 to 2020 have been recognised in the net asset value of the relevant Sub-Funds (under the caption "Other income"). As regards period 2014 to 2018, the Tax Court decision may be considered as final, as the Italian Revenue Agency decided not to appeal before the Italian Supreme Court.

3. BANKS, BANK OVERDRAFTS, OTHER BANKS AND BROKER ACCOUNTS

The caption "Other banks and broker accounts" includes cash held with external banks and cash at broker accounts. The caption "Amounts due to brokers" includes amounts payable to brokers.

The amount of broker accounts disclosed in the Statement of Net Assets "Other banks and broker accounts" / "Amounts due to brokers" are presented net.

The following table shows the actual split between positive and negative broker accounts:

Sub-Fund	Positive Broker Cash	Negative Broker Cash	Net Broker Cash
EURIZON INVESTMENT SICAV - Insurance Unit Total Return	1 088 283,91	-	1 088 283,91
EURIZON INVESTMENT SICAV - Euro Equity Insurance Capital Light	230 000,00	-	230 000,00

4. SUBSCRIPTION TAX

The SICAV is governed by Luxembourg tax laws applicable to Undertakings for Collective Investment ("UCI").

As legislation now stands, the SICAV is not subject to an income tax. However, the SICAV is subject to a Luxembourg tax at an annual rate of 0,05% payable quarterly and calculated on the Net Asset Value of each Sub-Fund at the end of each quarter in question. The rate of the annual subscription tax is fixed at 0,01% for the Sub-Funds or Classes of Shares, if the Shares in these Sub-Funds or Classes are reserved for one or more Institutional Investors, as well as for Sub-Funds whose exclusive aim is the collective investment in money market instruments and/or deposits with credit institutions.

The value of the assets represented by Shares/Units held in other Luxembourg UCIs shall be exempt from the subscription tax, provided such Shares/Units have already been subject to the subscription tax in Luxembourg.

5. OTHER CHARGES AND TAXES

The caption "Other charges and taxes" is mainly composed of interest expenses with the exception of EURIZON INVESTMENT SICAV - Global Bond Total Return and EURIZON INVESTMENT SICAV - Global Bond Emerging Total Return which include offset on the impact of the RUB currency (please refer to Note 16).

6. MANAGEMENT FEE

The Management Company, as remuneration for its services, is entitled to receive a management fee calculated according to the monthly average Net Asset Value of each Sub-Fund of the SICAV and payable monthly.

For the year ended 31 December 2024, the maximum rates in force for each Sub-Fund are the following:

Sub-Funds	Class name	Maximum Rate
EURIZON INVESTMENT SICAV - Insurance Unit Total Return	Class ID	0,075%

Sub-Funds	Class name	Maximum Rate

[1] The Sub-Fund was liquidated on 14 February 2024.
[2] The Sub-Fund was liquidated on 7 November 2024.
[3] The Sub-Fund was liquidated on 3 December 2024.
[4] The Sub-Fund EURIZON INVESTMENT SICAV - PB Flexible Macro was renamed EURIZON INVESTMENT SICAV - PB Bond Aggregate EUR Short Term on 27 May 2024.
[5] Class ID was launched on 7 June 2024.
[6] The Sub-Fund was liquidated on 26 March 2024.
[7] The Sub-Fund was liquidated on 5 February 2024.
[8] Class RD was launched on 26 March 2024.

Investments done by each Sub-Fund in Shares/Units of UCITS and/or other UCI may lead investors to support twice certain expenses such as subscriptions fees, redemptions fees, depositary fees, administrative fees and management fees.

The total amount of the management commissions applied on the "group-related" UCITS or UCI in which a Sub-Fund may invest as well as the total amount of any rebates of the management commissions applied on UCITS or UCI managed by third companies are transferred to the respective Sub-Fund on a quarterly basis and registered in the Statement of Changes in Net Assets under the heading "Other income" as follows (in EUR):

[1] The Sub-Fund was liquidated on 7 November 2024.
[2] The Sub-Fund EURIZON INVESTMENT SICAV - PB Flexible Macro was renamed EURIZON INVESTMENT SICAV - PB Bond Aggregate EUR Short Term on 27 May 2024.
[3] The Sub-Fund was liquidated on 5 February 2024.

7. PERFORMANCE FEE

For the Sub-Funds EURIZON INVESTMENT SICAV - Flexible Equity Strategy 2, EURIZON INVESTMENT SICAV - Flexible Equity Strategy 3, EURIZON INVESTMENT SICAV - Global Bond Emerging Total Return, EURIZON INVESTMENT SICAV - Contingent Convertible Bonds, EURIZON INVESTMENT SICAV - Donatello 1, EURIZON INVESTMENT SICAV - Donatello 2[1] and EURIZON INVESTMENT SICAV - Credit Income, the Management Company will be entitled to receive a performance fee. Calculation methods of the performance fees are described in details in the Prospectus of the SICAV.

For the year ended 31 December 2024, a performance fee amount is recorded in the Statement of Changes in Net Assets for the following Sub-Funds (in EUR):

Sub-Funds	Share Classes	Share Class Currency	Amount of performance fees in Sub-Fund Currency	% of the average NAV of the Share Class
EURIZON INVESTMENT SICAV - Flexible Equity Strategy 2				
	I	EUR	104 150,22	0,04
EURIZON INVESTMENT SICAV - Flexible Equity Strategy 3				
	I	EUR	1 534,18	0,00
EURIZON INVESTMENT SICAV - Donatello 1				
	I	EUR	143 128,49	0,88
EURIZON INVESTMENT SICAV - Credit Income				
	I	EUR	2 310 307,39	1,27
	ID	EUR	4 298 826,77	1,40
	R	EUR	40 232,27	1,31
	RD	EUR	44,67	0,86

For the below Sub-Funds there was no performance fees recorded during the financial year ended 31 December 2024 even if they are subject to a performance fee:

EURIZON INVESTMENT SICAV - Global Bond Emerging Total Return, EURIZON INVESTMENT SICAV - Contingent Convertible Bonds and EURIZON INVESTMENT SICAV - Donatello 2[1].

[1]The Sub-Fund was liquidated on 5 February 2024.

The others Sub-Funds, not mentioned above, are not subject to performance fees.

8. ADMINISTRATIVE FEE

The SICAV pays fixed administrative fees to its various service providers.

These fees, which represent a percentage of the average net asset value of each Sub-Fund, are accrued daily and are paid each month in arrears. They cover the remuneration of the Depositary Bank, as well as the Management Company.

The fees received by the Management Company, in consideration for the administrative services provided by it to the SICAV will be used to cover the functions of the Registrar and Transfer Agent, the Administrative Agent, the Domiciliary Agent, the investment compliance monitoring and all the other costs incurred by the SICAV as described in the Prospectus of the SICAV.

9. FORWARD FOREIGN EXCHANGE CONTRACTS, FUTURE CONTRACTS AND OPTION CONTRACTS

10. OTHER ASSETS

For all the Sub-Funds, the heading ”Other assets” is mainly composed of receivable dividends or rebates of management fees applied to UCITS and/or other UCIs in which the SICAV invests and tax reclaims.

11. TRANSACTION COSTS

For the year ended 31 December 2024, the SICAV incurred transaction costs (composed of broker fees and stamp duties) relating to the purchase or sale of investment securities. These transaction costs are part of the acquisition cost / sale price of the related assets and, for the year from 1 January 2024 to 31 December 2024, amount as follows (in EUR):

Sub-Funds	Transaction costs
EURIZON INVESTMENT SICAV - Insurance Unit Total Return	0,11

(1) The Sub-Fund was liquidated on 14 February 2024.
(2) The Sub-Fund was liquidated on 7 November 2024.
(3) The Sub-Fund was liquidated on 3 December 2024.
(4) The Sub-Fund EURIZON INVESTMENT SICAV - PB Flexible Macro was renamed EURIZON INVESTMENT SICAV - PB Bond Aggregate EUR Short Term on 27 May 2024.
(5) The Sub-Fund was liquidated on 26 March 2024.

For the year ended 31 December 2024, no transaction costs have been recorded for the other Sub-Funds of EURIZON INVESTMENT SICAV.

Furthermore, in accordance with the practices of the bond markets, a bid-offer spread is applied to securities purchase or sale transactions. According to this principle, the selling and buying prices applied by the broker to a given transaction are not identical and the difference between them constitutes the broker's remuneration.

12. CHANGES IN THE COMPOSITION OF PORTFOLIO

The list of movements in the portfolio composition for the financial year from 1 January 2024 to 31 December 2024 is available at the SICAV's registered office.

13. DIVIDEND DISTRIBUTIONS

Share Classes "ID" and "RD" allow the distribution of dividends. During the financial year the following distributions occurred:

The distributed amount is the result of the net investment income, realised and unrealised capital gain (after deduction of realised and unrealised losses) and is recorded in the Statement of Changes in Net Assets under the heading "Dividend distributions".

Sub-Fund	Class	Distribution date	Currency	Amount per Share in currency	Total Amount in currency	Amount in EUR

[(1)]The Sub-Fund was liquidated on 26 March 2024.

14. RELATED PARTY TRANSACTIONS

Certain Sub-Funds have invested in bonds and shares from Intesa Sanpaolo group. In addition, certain Sub-Funds have future, option, swap and forward foreign exchange contracts whose counterparty is a related party. Details of these positions are disclosed in the portfolio of the concerned Sub-Funds.

15. CASH BALANCES FOR LIQUIDATED SUB-FUNDS

This cash represents the equivalent of payables / provisions that were reflected in the liquidation NAV but for which the respective invoices were expected to be received post liquidation. The Management Company will however ensure that any remaining cash amount (post the payment of any pending bills) will be distributed to the last known investors.

Cash balances for the liquidated Sub-funds as of year end are disclosed in the below table:

Sub-Fund	Currency	Cash balance as of 31 December 2024
EURIZON INVESTMENT SICAV - Flexible Beta 4	EUR	8 220,72
EURIZON INVESTMENT SICAV - Flexible Duration 4	EUR	1 321,98
EURIZON INVESTMENT SICAV - Flexible Duration 5	EUR	7 960,91
EURIZON INVESTMENT SICAV - Euro Riserve	EUR	38,29
EURIZON INVESTMENT SICAV - Flexible Equity Ethical Selection	EUR	15 842,37
EURIZON INVESTMENT SICAV - Donatello 2	EUR	17 098,37

16. RUSSIA UKRAINE CONFLICT

The direct exposure of the products established by the SICAV to Russia, Belarus and Ukraine securities was relatively low at the beginning of Russia's invasion of Ukraine on 24 February 2022, with no Sub-Fund reporting an exposure in excess of 5% of its total net assets. Nevertheless, the SICAV closely monitors the evolution of international sanctions, operational restrictions and disruptions relating to the Russian securities and markets as they adversely impact, or could impact, the ability of these Sub-Funds to operate on such securities and/or related local cash accounts. Liquidity and valuation issues related to these securities are monitored on a continuous basis by the SICAV so as to ensure the interests of the investors are preserved. In particular, as at 31 December 2024, certain securities are valued on the basis of fair valuation procedures, which may result in such securities being deemed to have a near-zero or zero value. In addition, no accrued interests are recorded for bonds denominated in rubles and value adjustments are posted to offset the value of Type S RUB cash accounts (segregated) as non-resident investors are currently restricted from any deliveries or receipts of RUB with respect to such accounts.

The position RUSSIA FEDERAL BONDS - OFZ 7.40% 17/07/2024, included in the Global Bond Emerging Total Return portfolio, was set to mature in July 2024. The position was still in the portfolio at year end and the settlement only occurred in 2025.

17. EVENTS OCCURRED DURING THE YEAR

The Sub-Fund EURIZON INVESTMENT SICAV - Donatello 2 was liquidated on 5 February 2024.

The Sub-Funds EURIZON INVESTMENT SICAV - Flexible Duration 5 and EURIZON INVESTMENT SICAV - Flexible Beta 4 were liquidated on 14 February 2024.

The Sub-Fund EURIZON INVESTMENT SICAV - Flexible Equity Ethical Selection was liquidated on 26 March 2024.

The Sub-Fund EURIZON INVESTMENT SICAV - Flexible Duration 4 was liquidated on 7 November 2024.

The Sub-Fund EURIZON INVESTMENT SICAV - Euro Riserve was liquidated on 3 December 2024.

The withholding tax reclaims were as follows:

EURIZON INVESTMENT SICAV - Euro Equity Insurance Capital Light - EUR 247 631,98

EURIZON INVESTMENT SICAV - PB Equity EUR - EUR 7 880 544,00

The following main amendments have been effective from 27 May 2024:

- Eurizon Investment SICAV – PB Bond Aggregate EUR Short Term:

• Renaming; previously named "Eurizon Investment SICAV – PB Flexible Macro"

• Adoption of the benchmark 50% ICE BofAML Euro Government 1-3Y + 50% ICE BofAML Euro Corporate 1-3Y

- Eurizon Investment SICAV – Mercurio 3

• Change of the debt investment grade index component of the sub-fund's composite benchmark from "FTSE World BIG ex JPY ex MBS 1-5 Yrs hedged to Euro" to "FTSE Euro Broad Investment Grade 1-5 years Index in Euro. The new composite benchmark is:

- 5% FTSE US High Yield Market Index hedged to Euro

- 40% MSCI AC World Net Total Return Index in Euro

- 55% FTSE Euro Broad Investment Grade 1-5 years Index in Euro.

18. SUBSEQUENT EVENTS

The Sub-Fund EURIZON INVESTMENT SICAV - Multiasset Risk Overlay Moderato was liquidated on 28 January 2025.

The Sub-Fund EURIZON INVESTMENT SICAV - Dynamic 1 was liquidated on 27 January 2025.

As a result of the merger of Epsilon SGR S.p.A. into Eurizon Capital SGR S.p.A. on 1st March 2025, Eurizon Capital SGR S.p.A. became delegated investment manager of the Management Company for the Funds previously managed by Epsilon SGR S.p.A.. The update of the name of the delegated investment manager will be reflected in the Prospectus at the first convenient opportunity.

SECURITIES FINANCING TRANSACTIONS REGULATION

Securities Financing Transactions Regulation ("SFTR") introduced disclosure requirements in annual and semi-annual reports detailing use of securities financing transactions.

A security financing transaction is defined as per Article 3(11) of the SFTR as:

-a repurchase/reverse agreement,
-securities or commodities lending and securities or commodities borrowing,
-a buy-sell back transaction or sell-buy transaction, or
-a margin lending transaction

During the year ended 31 December 2024, the Fund did not use any instruments falling into the scope of SFTR.

SUSTAINABLE FINANCE DISCLOSURE REGULATION (SFDR)

For each Sub-Fund that has (E) environmental and (S) social characteristics and promotes investment into assets which follow good governance (G) practices in accordance with articles 8 and 9 of the Sustainable Finance Disclosure Regulation ("SFDR"), this part of the Annual Report gathers the periodic information set out according to the template provided in the SFDR regulatory technical standards.

For the rest of the Sub-Funds, Eurizon integrates sustainability risk analysis into its investment process pursuant to Article 6 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 (the "SFDR Regulation") on sustainability reporting in the financial services industry.

Without prejudice to the integration of sustainability risk analysis into the investment process, the Sub-Funds do not, however, promote the specific environmental objectives identified in Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 (the "Taxonomy Regulation") on the establishment of a framework to encourage sustainable investment and amending Regulation (EU) 2019/2088. In this context, it should be noted that the investments underlying this Fund do not take into account the European Union's criteria for environmentally sustainable economic activities.

As at 31 December 2024, the following Sub-Funds are categorised article 8 under SFDR:

Eurizon Investment SICAV - PB Bond Corporate EUR
Eurizon Investment SICAV - PB Equity EUR
Eurizon Investment SICAV - PB Equity US
Eurizon Investment SICAV - PB Bond Aggregate EUR Short Term *
Eurizon Investment SICAV - Sustainable Equity Europe
Eurizon Investment SICAV - Sustainable Equity US
Eurizon Investment SICAV - Equity Europe ESG Leaders
Eurizon Investment SICAV - Equity World Ex Europe ESG Leaders
Eurizon Investment SICAV - Flexible Equity Strategy 2
Eurizon Investment SICAV - Flexible Equity Strategy 3

* The Sub-Fund Eurizon Investment SICAV - PB Flexible Macro was renamed Eurizon Investment SICAV - PB Bond Aggregate EUR Short Term on 27 May 2024.

As at 31 December 2024, no Sub-Fund is categorised article 9 under SFDR.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Investment SICAV - Flexible Equity Strategy 2

Legal entity identifier: 549300TIHV0U9433CD61

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **39.14%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.37 Investment Universe: 7.31

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2023
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.27 Investment Universe: 7.14

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The minimum portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electicity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landimines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. In this regard, Eurizon has adopted a specific framework that provides for the use of specific environmental and social indicators to assess the main negative effects on sustainability factors determined according to the characteristics and objectives of individual financial products. Specifically:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies

- Exposure to fossil fuel companies

What were the top investments of this financial product?

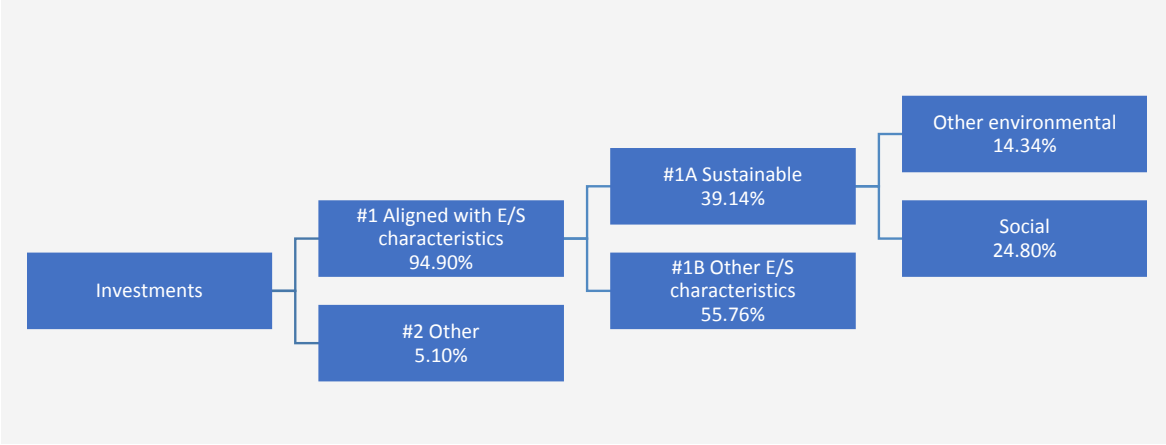

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2024

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

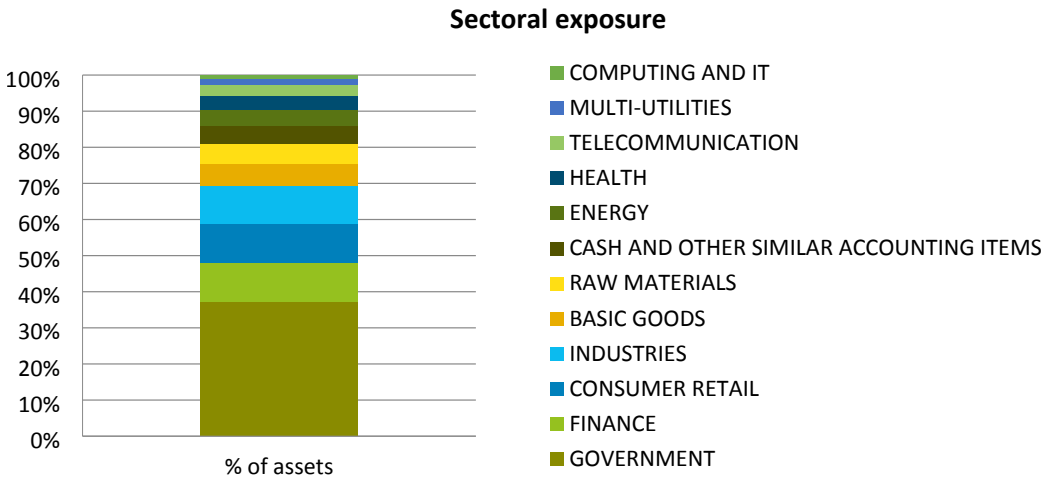

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

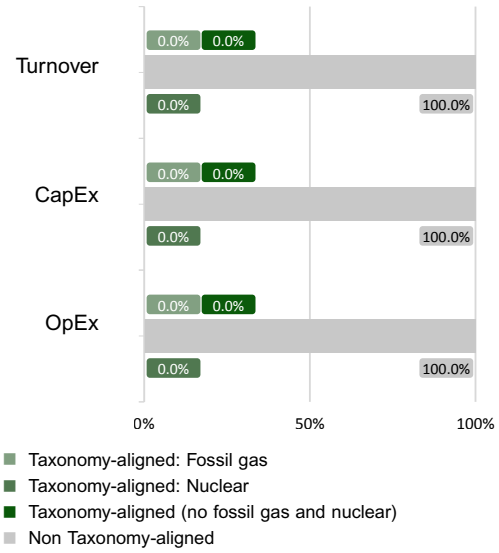

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

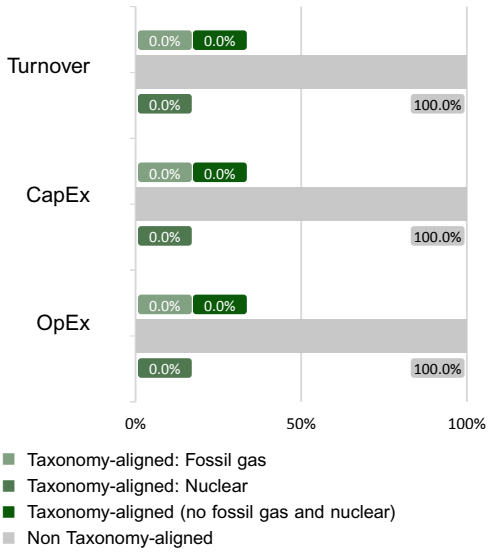

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 63% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 14.34% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 24.80% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Investment SICAV - Flexible Equity Strategy 3

Legal entity identifier: 5493001PCSKFQI0JE931

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **38.88%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.87 Investment Universe: 6.57

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The minimum portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electicity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landimines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. In this regard, Eurizon has adopted a specific framework that provides for the use of specific environmental and social indicators to assess the main negative effects on sustainability factors determined according to the characteristics and objectives of individual financial products. Specifically:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies

- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

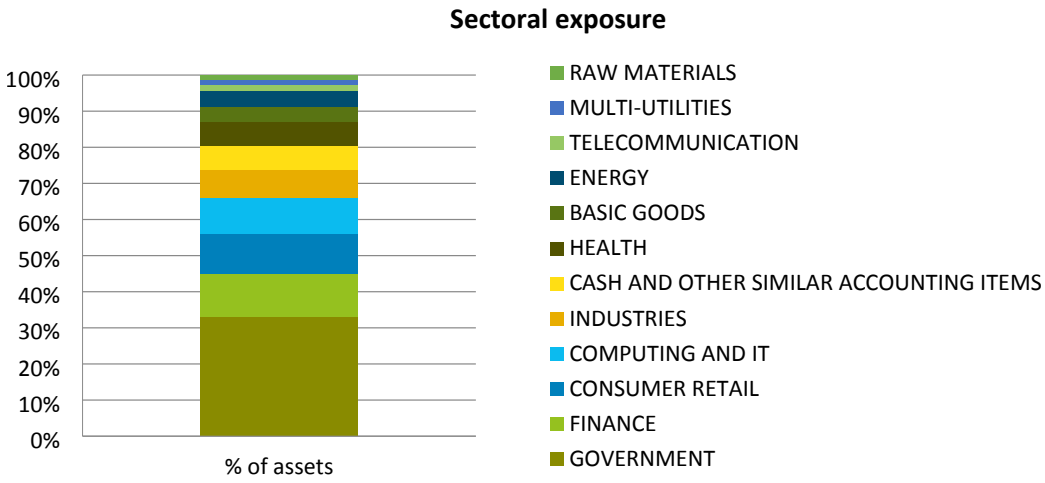

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

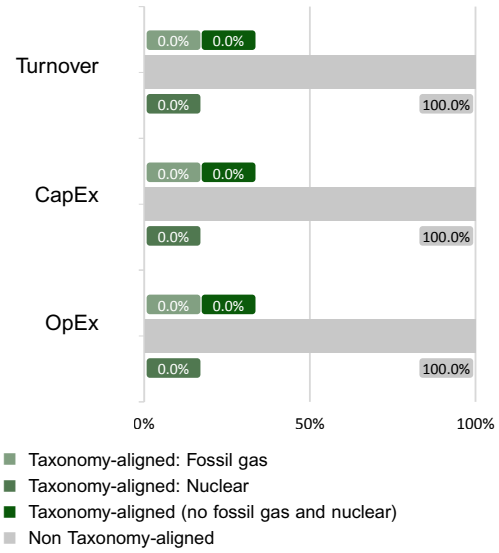

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

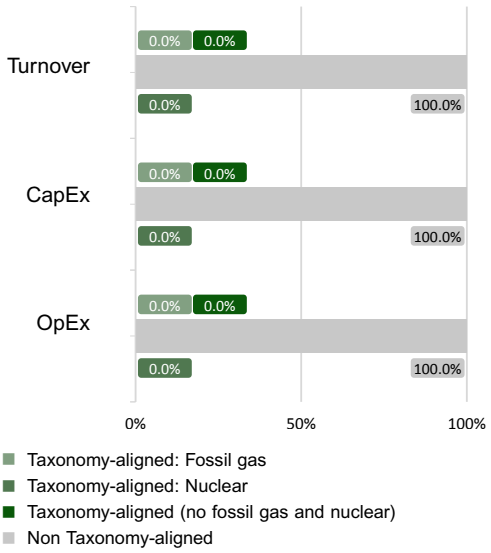

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 67% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 14.53% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 24.35% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Investment SICAV - PB Bond Corporate EUR

Legal entity identifier: 549300XUIUGYKVYLTW50

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **73.91%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.28 Benchmark: 7.08

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2023
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.13 Benchmark: 7.12

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The minimum portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electicity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landimines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. In this regard, Eurizon has adopted a specific framework that provides for the use of specific environmental and social indicators to assess the main negative effects on sustainability factors determined according to the characteristics and objectives of individual financial products. Specifically:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

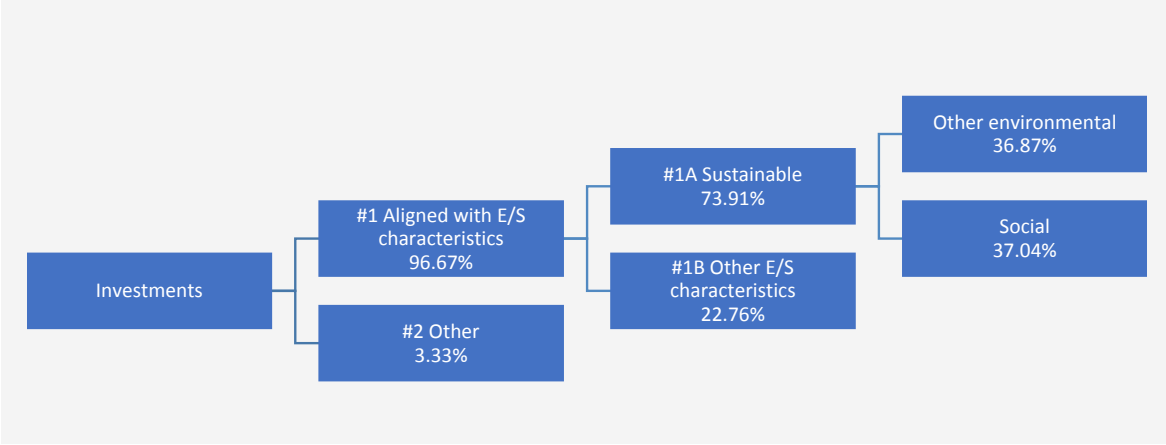

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

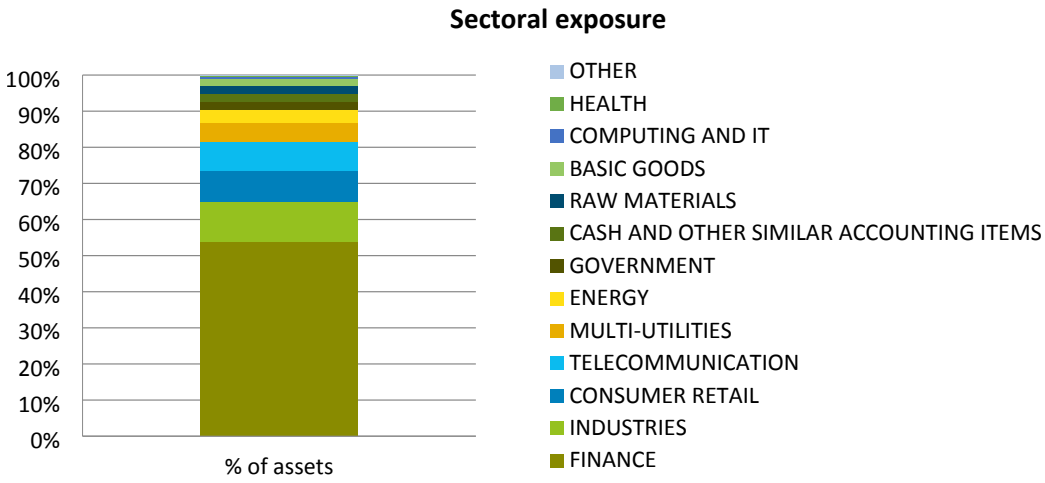

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

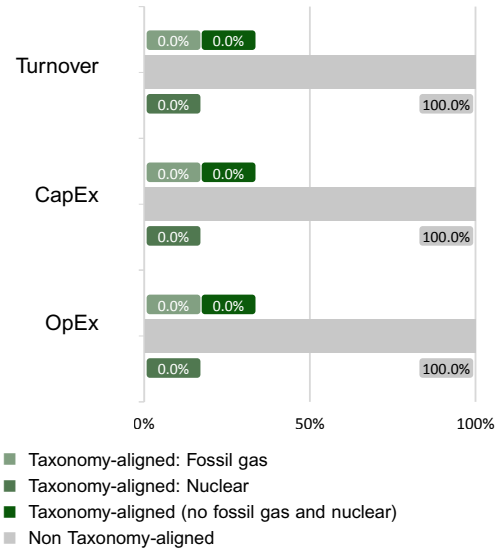

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

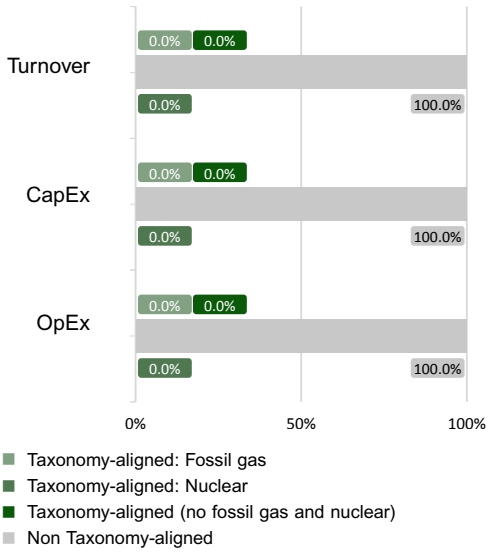

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 98% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 36.87% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 37.04% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Investment SICAV - PB Bond Aggregate EUR Short Term

Legal entity identifier: 549300VRCFJL527TAG08

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **35.12%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The minimum portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electicity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landimines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. In this regard, Eurizon has adopted a specific framework that provides for the use of specific environmental and social indicators to assess the main negative effects on sustainability factors determined according to the characteristics and objectives of individual financial products. Specifically:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

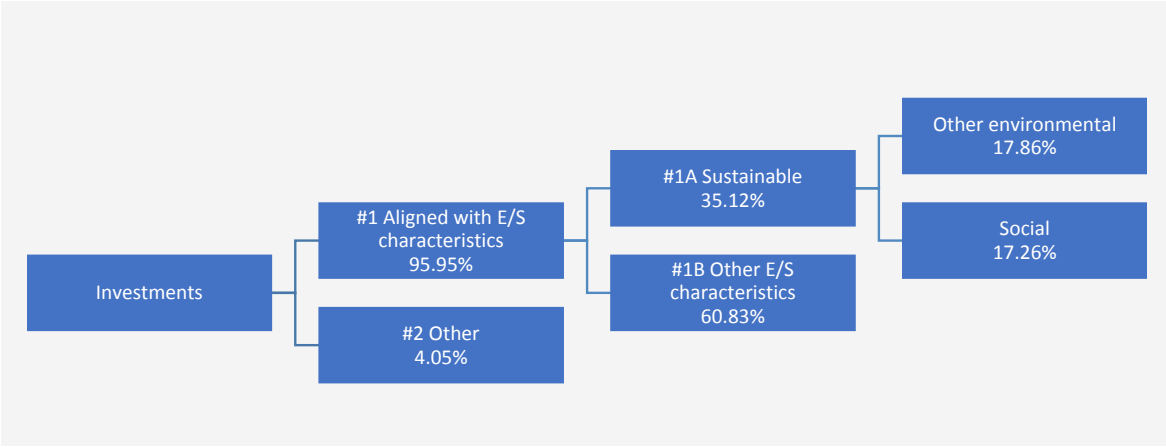

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

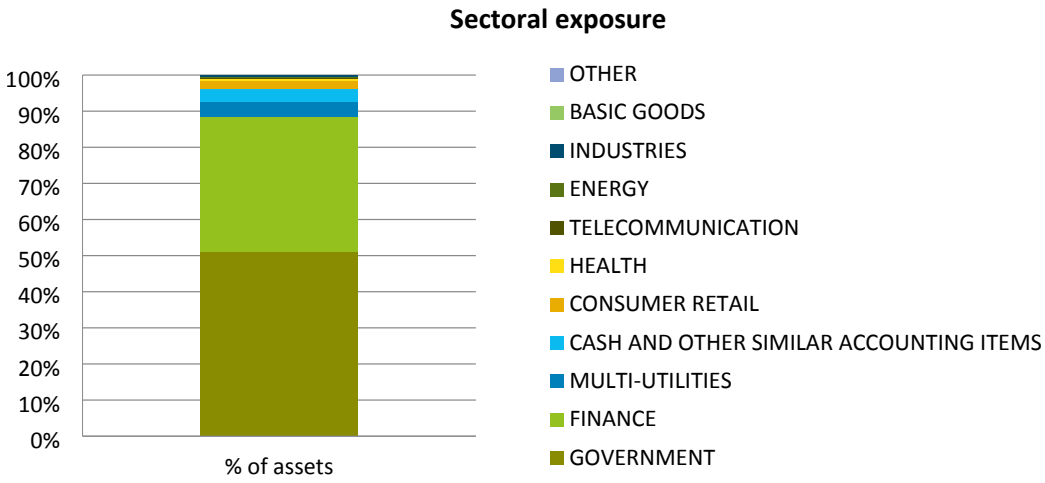

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

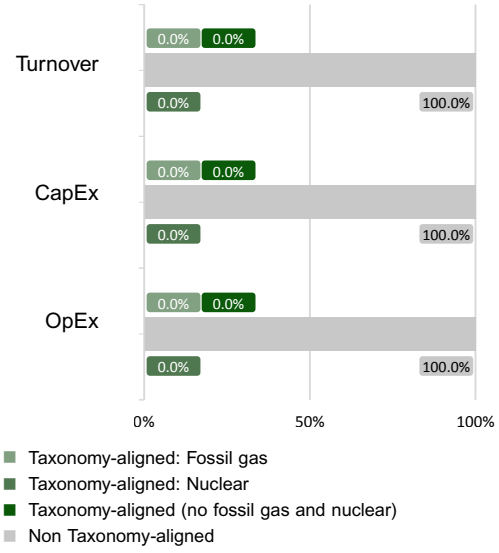

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

☑ No

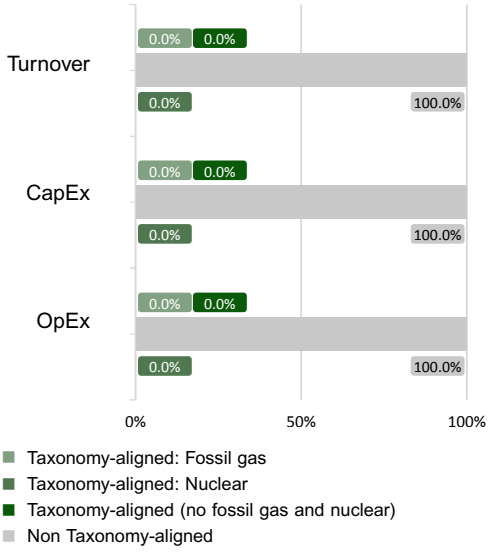

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 49% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 17.86% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 17.26% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Investment SICAV - PB Equity EUR

Legal entity identifier: 549300B6WQMTJ439WR35

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **71.44%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.97 Benchmark: 7.81

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2023
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 8.06 Benchmark: 7.81

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The minimum portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electicity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landimines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. In this regard, Eurizon has adopted a specific framework that provides for the use of specific environmental and social indicators to assess the main negative effects on sustainability factors determined according to the characteristics and objectives of individual financial products. Specifically:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies

- Exposure to fossil fuel companies

What were the top investments of this financial product?

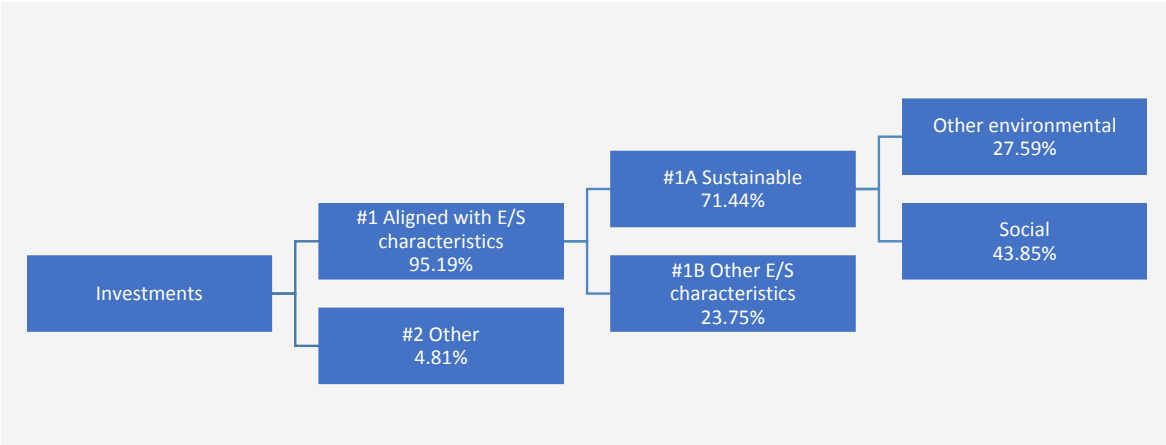

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

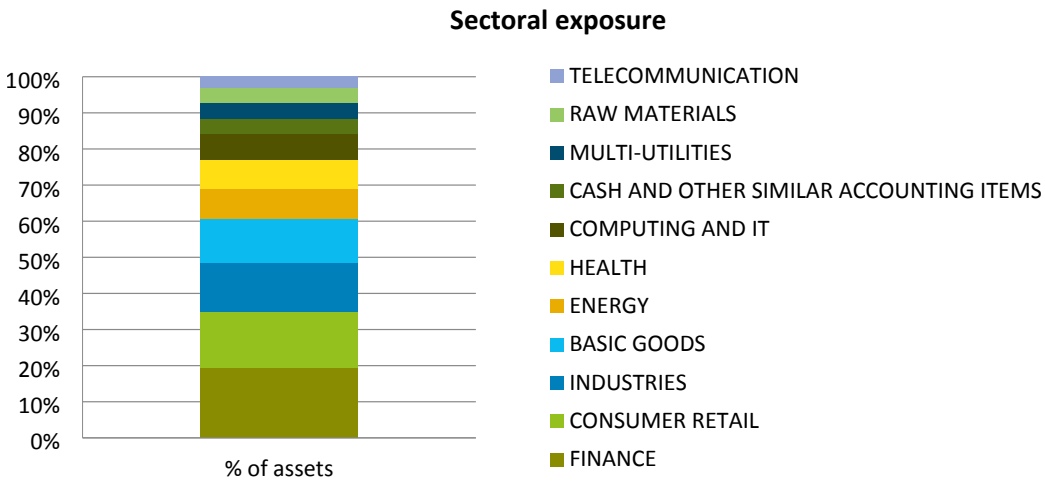

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

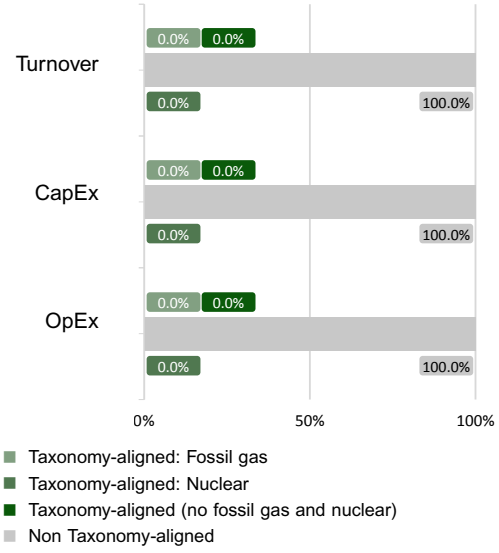

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

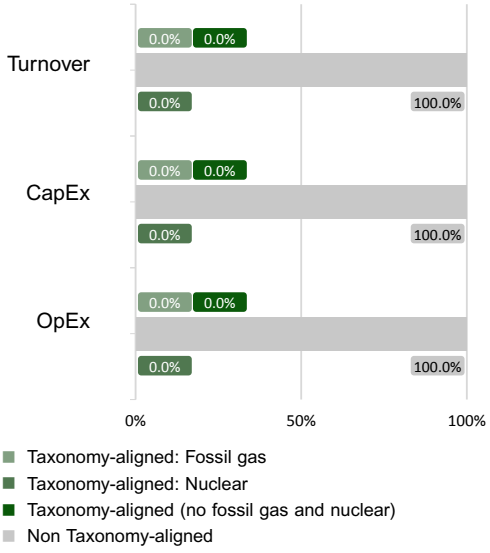

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 27.59% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 43.85% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Investment SICAV - PB Equity US

Legal entity identifier: 549300F54I5B1TGEVH64

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **56.06%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.91 Benchmark: 6.64

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The minimum portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electicity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landimines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. In this regard, Eurizon has adopted a specific framework that provides for the use of specific environmental and social indicators to assess the main negative effects on sustainability factors determined according to the characteristics and objectives of individual financial products. Specifically:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies

- Exposure to fossil fuel companies

What were the top investments of this financial product?

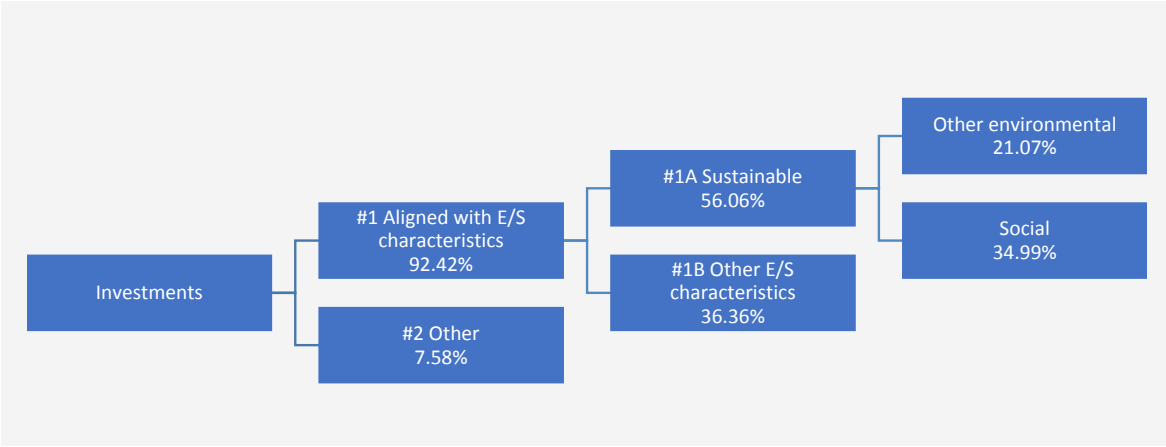

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2024

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

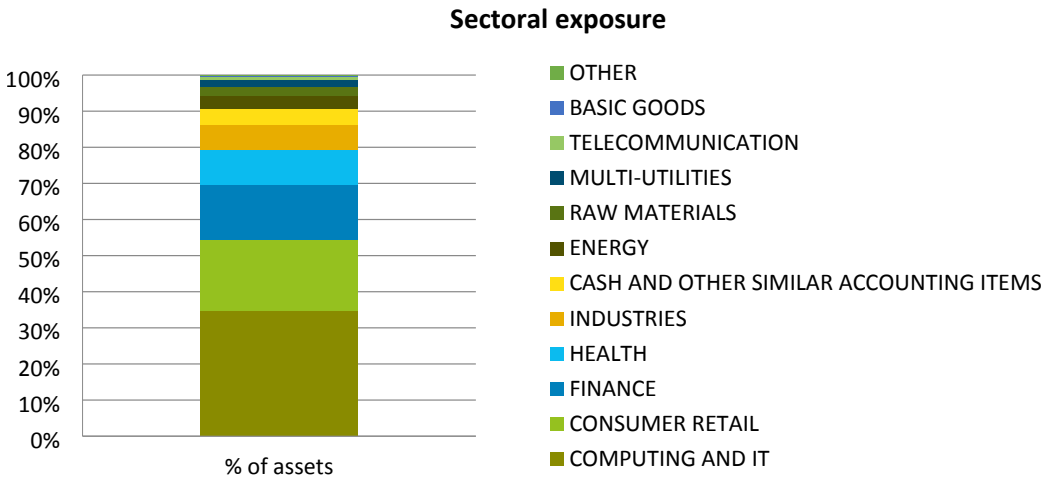

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

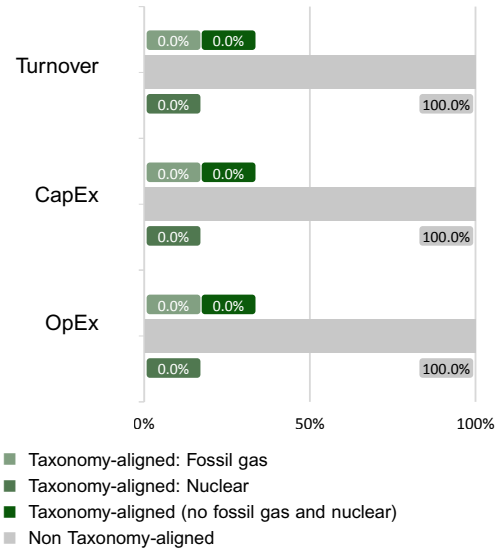

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

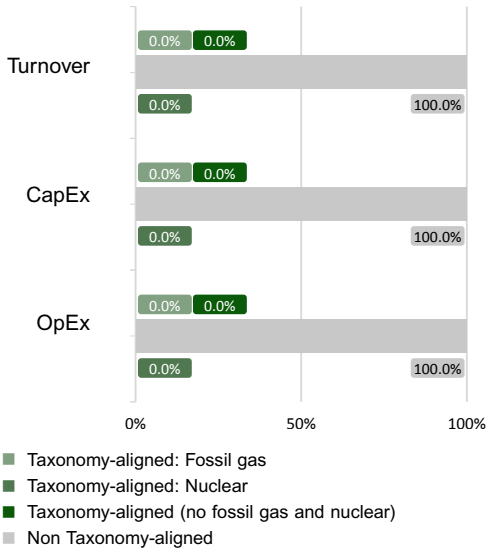

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 21.07% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 34.99% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Investment SICAV - Sustainable Equity Europe

Legal entity identifier: 549300NVWJPO17MLDK09

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **81.79%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its benchmark, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 8.40 Benchmark: 7.85
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers.	Fund: 40.87 Benchmark: 83.56

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers	Fund: 48.66 Benchmark: 103.85	Fund: 58.10 Benchmark: 130.79

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The minimum portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electicity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landimines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

  The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. In this regard, Eurizon has adopted a specific framework that provides for the use of specific environmental and social indicators to assess the main negative effects on sustainability factors determined according to the characteristics and objectives of individual financial products. Specifically:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

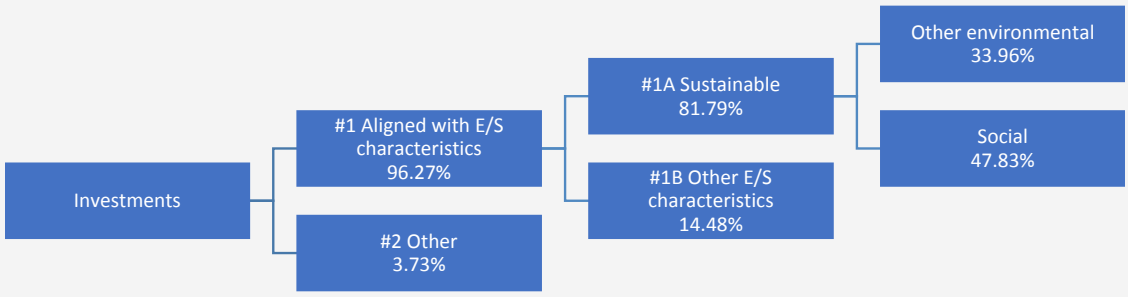

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

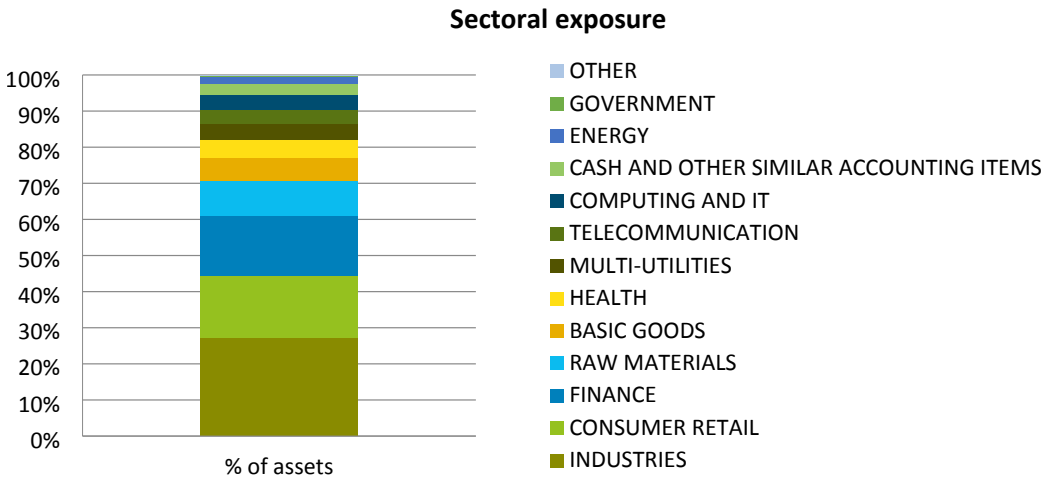

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:

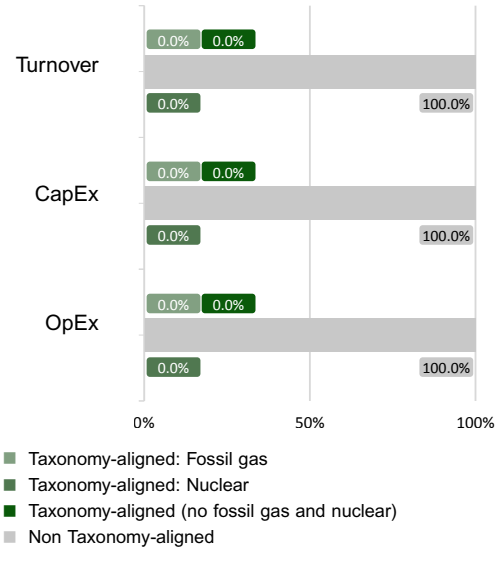

☐ In fossil gas ☐ In nuclear energy

☑ No

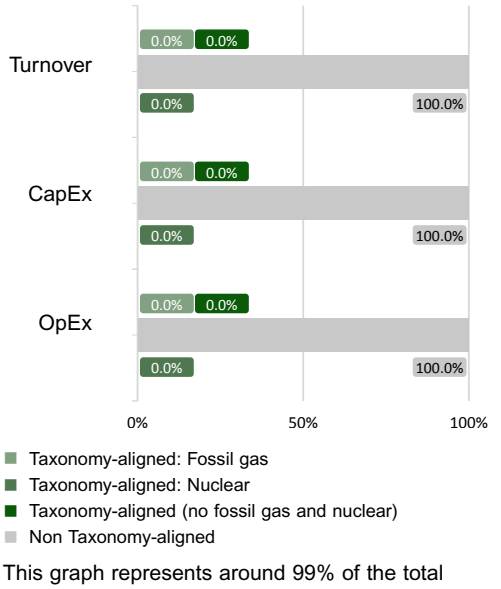

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 99% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 33.96% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 47.83% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Investment SICAV - Sustainable Equity US

Legal entity identifier: 549300BEGX2OHJQ7TU25

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **83.36%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its benchmark, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.28 Benchmark: 6.62
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers.	Fund: 38.11 Benchmark: 95.78

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “socially and environmentally responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.46 Benchmark: 6.60	Fund: 6.94 Benchmark: 6.35
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers	Fund: 42.07 Benchmark: 113.80	Fund: 53.37 Benchmark: 145.98

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The minimum portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electicity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landimines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

  The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. In this regard, Eurizon has adopted a specific framework that provides for the use of specific environmental and social indicators to assess the main negative effects on sustainability factors determined according to the characteristics and objectives of individual financial products. Specifically:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

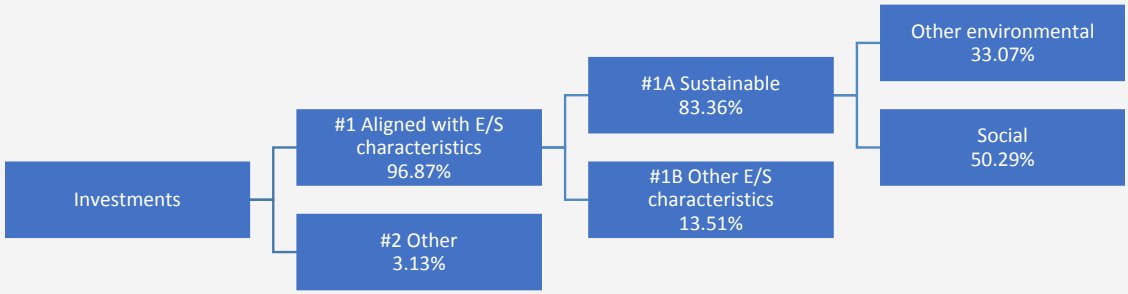

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

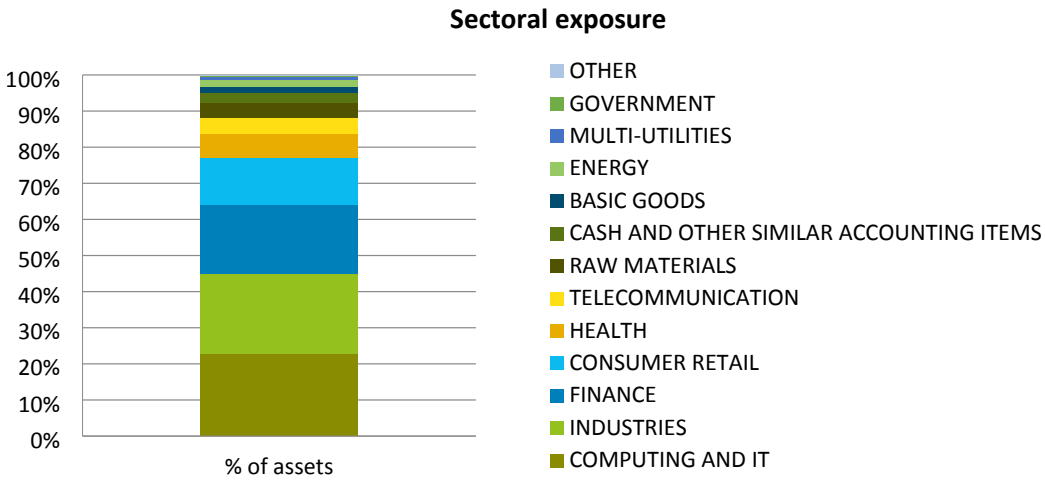

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:

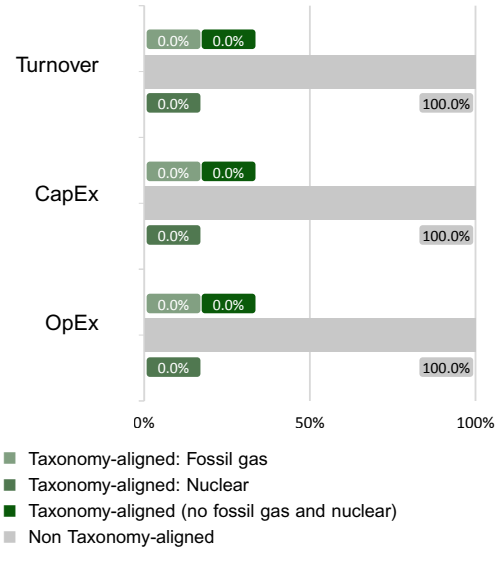

☐ In fossil gas ☐ In nuclear energy

☑ No

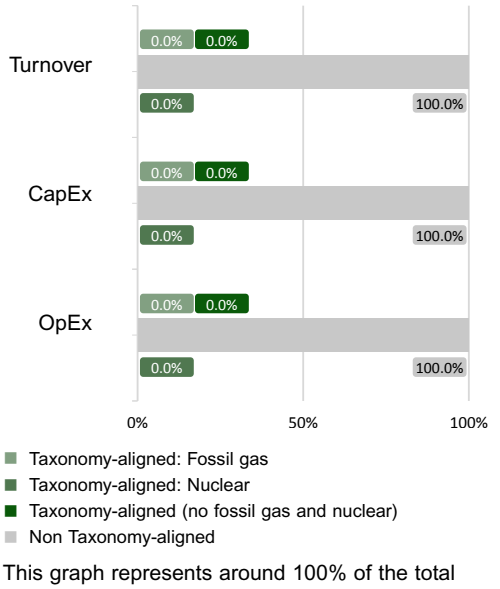

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 33.07% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 50.29% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Investment SICAV - Equity Europe ESG Leaders

Legal entity identifier: 549300SUXODQ2ILGP985

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **81.81%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	95.42%

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The minimum portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electicity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landimines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. In this regard, Eurizon has adopted a specific framework that provides for the use of specific environmental and social indicators to assess the main negative effects on sustainability factors determined according to the characteristics and objectives of individual financial products. Specifically:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

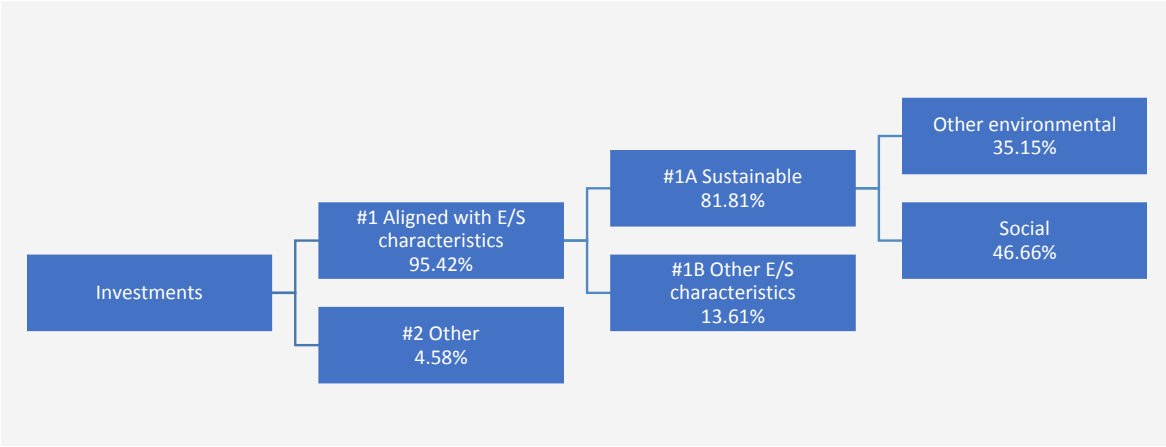

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

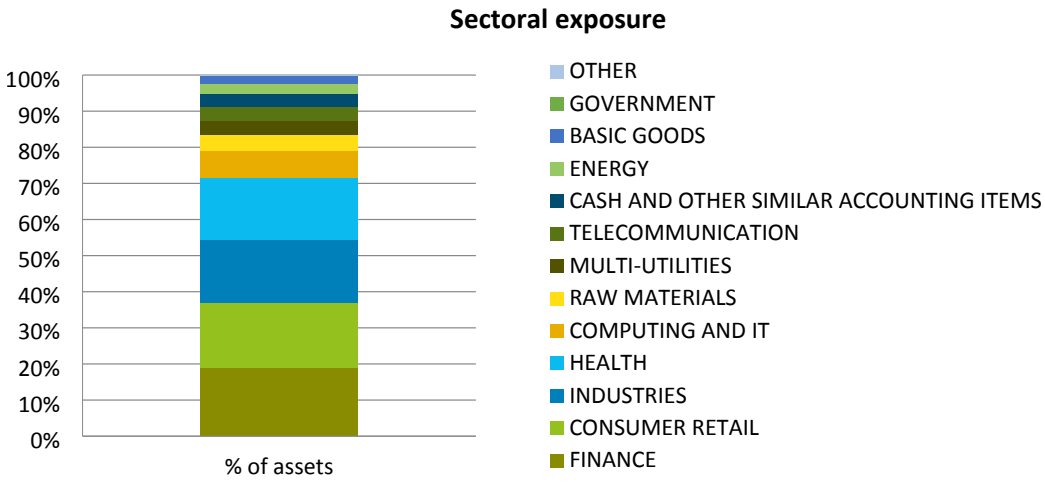

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

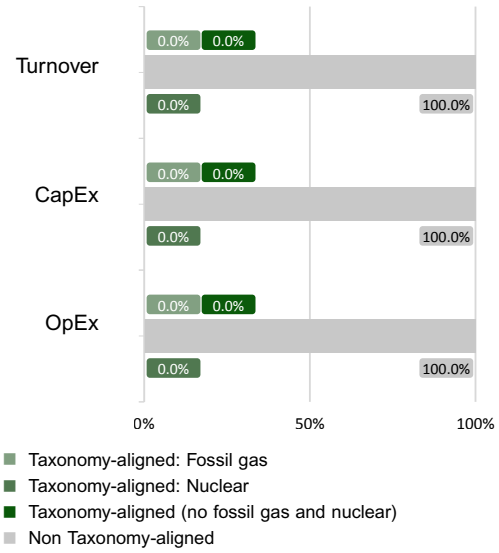

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

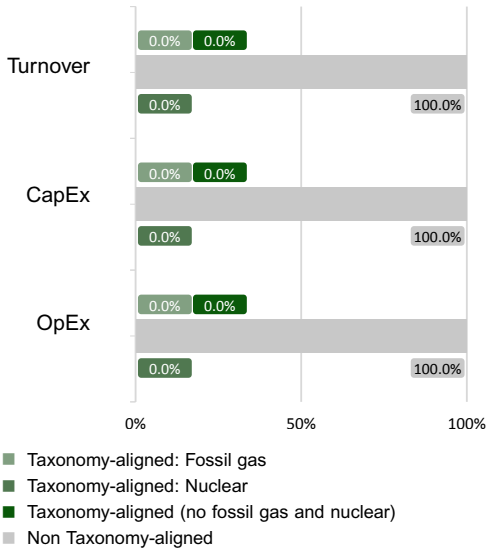

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 35.15% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 46.66% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers not included in the fund's benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% MSCI Europe ESG Leaders Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The MSCI Europe ESG Leaders Index is based on MSCI Europe Index.

The MSCI Europe ESG Index is a capitalization weighted index that provides exposure to companies with high Environmental, Social and Governance (ESG) performance relative to their sector peers. MSCI Europe ESG Leaders Index consists of large and mid cap companies in 15 developed markets countries*. The Index is designed for investors seeking a broad, diversified sustainability benchmark with relatively low tracking error to the underlying equity market. The index is a member of the MSCI ESG Leaders Index series. Constituent selection is based on data from MSCI ESG Research.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (***https://www.msci.com/msci-esg-leaders-indexes***).

*Developed Markets countries in Europe include: Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the UK.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainability indicators performance with reference to the product:
Sector exclusion: 0.00%
Issuer exclusion: 0.00%
ESG Index integration: 95.42%

How did this financial product perform compared with the reference benchmark?

Sustainability indicators performance with reference to the benchmark:
Sector exclusion: 0.00%
Issuer exclusion: 0.00%
ESG Index integration: Not Applicable

How did this financial product perform compared with the broad market index?

Sustainability indicators performance with reference to the broad market index:
Sector exclusion: 0.00%
Issuer exclusion: 0.00%
ESG Index integration: Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Investment SICAV - Equity World Ex-Europe ESG Leaders

Legal entity identifier: 549300HP1UV5BUFWVQ33

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **75.28%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	94.79%

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	94.63%	91.65%

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The minimum portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electicity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landimines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. In this regard, Eurizon has adopted a specific framework that provides for the use of specific environmental and social indicators to assess the main negative effects on sustainability factors determined according to the characteristics and objectives of individual financial products. Specifically:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

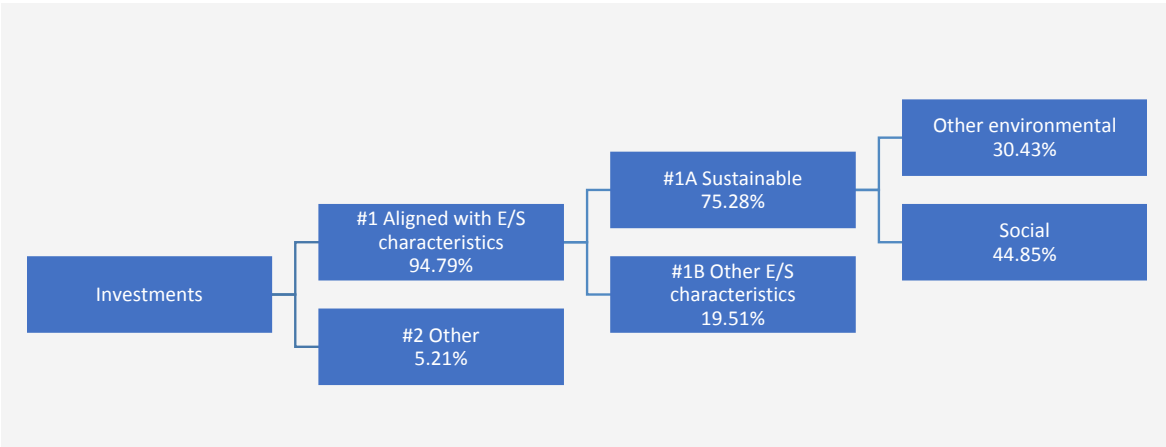

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2024

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

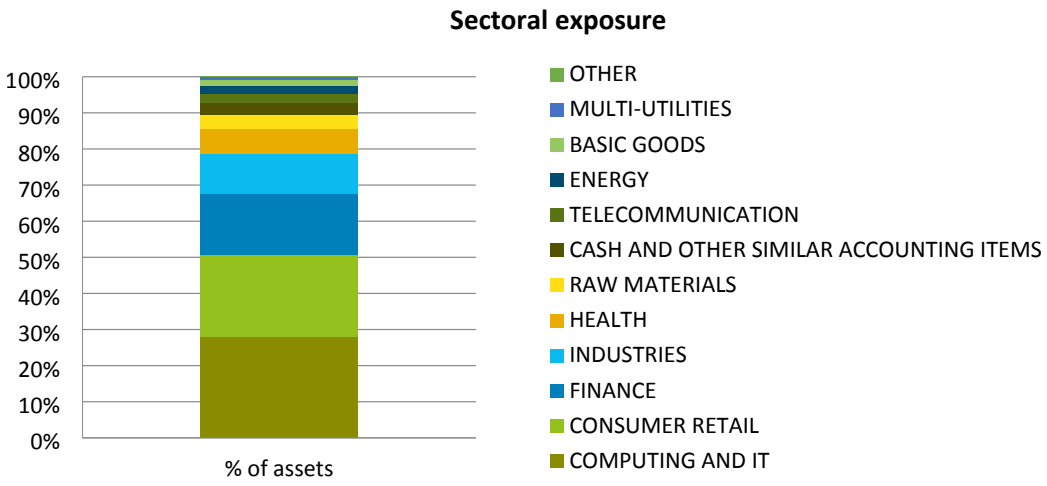

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

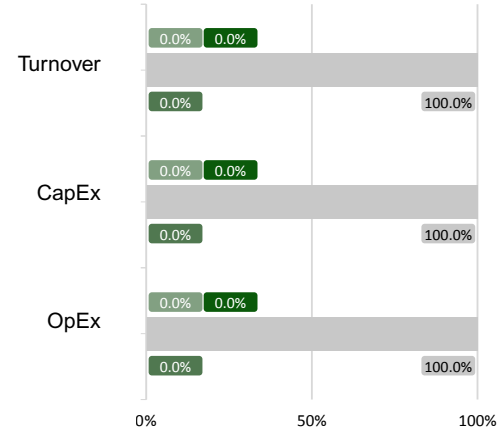

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

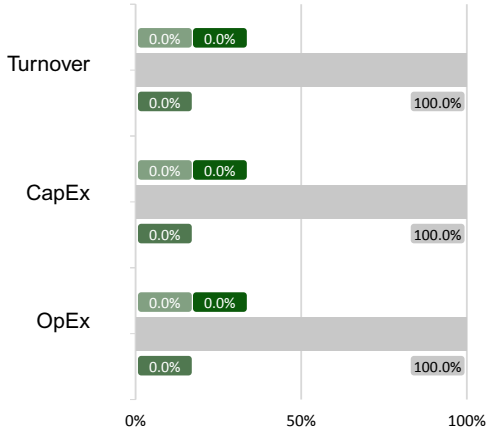

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 30.43% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 44.85% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers not included in the fund's benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% MSCI World Ex-Europe ESG Leaders Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  The MSCI World ex Europe ESG Leaders Index is based on MSCI World ex Europe Index.

  The MSCI World ex Europe ESG Leaders Index is a capitalization weighted index that provides exposure to companies with high Environmental, Social and Governance (ESG) performance relative to their sector peers. MSCI World ESG Leaders Index is constructed by aggregating the following regional Index MSCI Pacific ESG Leaders Index, MSCI Middle East ESG Leaders Index, MSCI Canada ESG Leaders Index and MSCI USA ESG Leaders Index. The parent index is MSCI World ex Europe Index, which captures large and mid cap representation across 8 of 23 Developed Markets (DM) countries*. The Index is designed for investors seeking a broad, diversified sustainability benchmark with relatively low tracking error to the underlying equity market. The index is a member of the MSCI ESG Leaders Index series. Constituent selection is based on data from MSCI ESG Research.

  For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (***https://www.msci.com/msci-esg-leaders-indexes***).

  * Developed Markets countries include: Australia, Canada, Hong Kong, Israel, Japan, New Zealand, Singapore and the USA.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Sustainability indicators performance with reference to the product:

  Sector exclusion: 0.00%

  Issuer exclusion: 0.00%

  ESG Index integration: 94.79%

How did this financial product perform compared with the reference benchmark?

Sustainability indicators performance with reference to the benchmark:
Sector exclusion: 0.03%
Issuer exclusion: 0.00%
ESG Index integration: Not Applicable

How did this financial product perform compared with the broad market index?

Sustainability indicators performance with reference to the broad market index:
Sector exclusion: 0.90%
Issuer exclusion: 0.03%
ESG Index integration: Not Applicable
